Religion in the Modern University Donald Wiebe, 2019-11-14 In these essays Donald Wiebe unveils a significant problem

in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena *Topographies of Faith*, 2013-04-15 Based on ethnographic explorations in cities across the globe *Topographies of Faith* offers a unique and compelling analysis of contemporary religious dynamics in metropolitan centers While most scholarship on religion still sidelines questions of spatiality and scale this book creatively draws on perspectives from urban studies to study the spatiality of religion in modern cities It shows how globalization transnational migration and urban expansion in big cities engender new religious forms and practices and their spatial underpinnings Space affects urban religious diversity religious innovations decline or vitality But it also shapes the relationships between religion and social equalities Spanning distances between New York Delhi and Johannesburg the book also engages with issues of secularity and religious vitality in genuinely new ways Contributors include Irene Becci Synn ve Bendixsen Marian Burchardt Jos Casanova Murat Es Ajay Gandhi Weishang Huang Godwin Onuoha Samadia Sadouni Peter van der Veer and Leilah Vevaina **Forthcoming Books** Rose Arny, 2004 *The Oxford Handbook of the Study of Religion* Michael Stausberg, Steven Engler, 2016-10-27 The Oxford Handbook of the Study of Religion provides a comprehensive overview of the academic study of religion Written by an international team of leading scholars its fifty one chapters are divided thematically into seven sections The first section addresses five major conceptual aspects of research on religion Part two surveys eleven main frameworks of analysis interpretation and explanation of religion Reflecting recent turns in the humanities and social sciences part three considers eight forms of the expression of religion Part four provides a discussion of the ways societies and religions or religious organizations are shaped by different forms of allocation of resources Other chapters in this section consider law the media nature medicine politics science sports and tourism Part five reviews important developments distinctions and arguments for each of the selected topics The study of religion addresses religion as a historical phenomenon and part six looks at seven historical processes Religion is studied in various ways by many disciplines and this Handbook shows that the study of religion is an academic discipline in its own right The disciplinary profile of this volume is reflected in part seven which considers the history of the discipline and its

relevance Each chapter in the Handbook references at least two different religions to provide fresh and innovative perspectives on key issues in the field This authoritative collection will advance the state of the discipline and is an invaluable reference for students and scholars
