*Religions of the Silk Road* R. Foltz, 1999-10-19 During the latter decades of the nineteenth century popular European fascination with the world beyond reached an all time high The British and French empires spanned the globe and their colonial agents sent home exotic goods and stories The Silk Route dates from this romantic period in name if not in reality In the century since its invention as a concept the Silk Route has captured and captivated the Western imagination It has given us images of fabled cities and exotic peoples Religions of the Silk Road tells the story of how religions accompanied merchants and their goods along the overland Asian trade routes of pre modern times It is a story of continuous movement encounters mutual reactions and responses adaptation and change Beginning as early as the eighth century BCE Israelite and Iranian traditions travelled eastwards in this way and they were followed centuries later by the great missionary traditions of Buddhism Christianity Manichaeism and Islam The Silk Route was more than just a conduit along which these religions hitched rides East it was a formative and transformative rite of passage and no religion emerged unchanged at the end of that arduous journey

Religion and Trade Francesca Trivellato, Leor Halevi, Catia Antunes, 2014-08-20 Although trade connects distant people and regions bringing cultures closer together through the exchange of material goods and ideas it has not always led to unity and harmony From the era of the Crusades to the dawn of colonialism exploitation and violence characterized many trading ventures which required vessels and convoys to overcome tremendous technological obstacles and merchants to grapple with strange customs and manners in a foreign environment Yet despite all odds experienced traders and licensed brokers as well as ordinary people travelers pilgrims missionaries and interlopers across the globe concocted ways of bartering securing credit and establishing relationships with people who did not speak their language wore different garb and worshipped other gods Religion and Trade Cross Cultural Exchanges in World History 1000 1900 focuses on trade across religious boundaries around the Mediterranean Sea and the Atlantic and Indian Oceans during the second millennium Written by an international team of scholars the essays in this volume examine a wide range of commercial exchanges from first encounters between strangers from different continents to everyday

transactions between merchants who lived in the same city yet belonged to diverse groups In order to broach the intriguing yet surprisingly neglected subject of how the relationship between trade and religion developed historically the authors consider a number of interrelated questions When and where was religion invoked explicitly as part of commercial policies How did religious norms affect the everyday conduct of trade Why did economic imperatives political goals and legal institutions help sustain commercial exchanges across religious barriers in different times and places When did trade between religious groups give way to more tolerant views of the other and when by contrast did it coexist with hostile images of those decried as infidels Exploring captivating examples from across the world and spanning the course of the second millennium this groundbreaking volume sheds light on the political economic and juridical underpinnings of cross cultural trade as it emerged or developed at various times and places and reflects on the cultural and religious significance of the passage of strange persons and exotic objects across the many frontiers that separated humankind in medieval and early modern times

*Managing Supply Chains on the Silk Road* Çağrı Haksöz, Sridhar Seshadri, Ananth V. Iyer, 2011-12-21 Historically important trade routes for goods of all kinds for more than 3000 years the Silk Road has once again come to prominence Managing Supply Chains on the Silk Road Strategy Performance and Risk present emerging supply chain practices from the Silk Road regions that include China Hong Kong India Pakistan Iran Central Asia Lebanon

Early Buddhist Transmission and Trade Networks Jason Neelis, 2010-11-19 This book examines catalysts for Buddhist formation in ancient South Asia and expansion throughout and beyond the northwestern Indian subcontinent to Central Asia by investigating symbiotic relationships between networks of religious mobility and trade

Silk Road Footprints: Transnational Transmission of Sacred Thoughts and Historical Legacy David W. Kim, 2025-06-10 The Silk Road generally evokes images of places cultures and peoples linked by the exchange of exotic goods and fabled treasures The notion of the subject however often disregards the historical fact that the Silk Road routes functioned as a unique channel for spreading religious ideas culture and literature The personal or community beliefs of the Silk Road were changed radically as a result of the impact of external influences Silk Road Footprints Transnational Transmission of Sacred Thoughts and Historical Legacy demonstrates that sacred communities interacted coexisted competed and influenced each other over long periods These include those local traditions that evolved in ancient China the Middle East Africa Central Asia Korea and Japan and the subsequent larger traditions that arose in the region Judaism Buddhism Christianity and Islam as well as the shamanistic and animistic traditions of various nomadic peoples The history of religions along the Silk Road is a remarkable illustration of how beliefs and civilisations often reflect a broad pattern of synthesis rather than clash This book indicates that Asia South Southeast East Asia and China one of the most pluralistic religious regions in the world has become a center of attention as a bridge between cultures Ultimately the creative study of the Silk Road and religious transnationalism evidences the implication that the local groups have been developed under the new environment of sacred principles and traditions as well

as political influence

**Teaching the Silk Road** Jacqueline M. Moore, Rebecca Woodward Wendelken, 2012-02-01

Advocating a global as opposed to a Eurocentric perspective in the college classroom discusses why and how to teach about China's Silk Road. The romance of the Silk Road journey with its exotic locales and luxury goods still excites the popular imagination. But study of the trade routes between China and central Asia that flourished from about 200 BCE to the 1500s can also greatly enhance contemporary higher education curricula. Indeed with people, plants, animals, ideas and beliefs traversing it, the Silk Road is both a metaphor of globalization and an early example of it. Teaching the Silk Road highlights the reasons to incorporate this material into a variety of courses and shares resources to facilitate that process. It is intended for those who are not Silk Road or Asian specialists but who wish to embrace a global history and civilizations perspective in teaching as opposed to the more traditional approach that focuses on cultures in isolation. The book explores both classroom and experiential learning and is intentionally interdisciplinary. Each essay focuses on pedagogical strategies or themes that teachers can use to bring the Silk Road into the classroom. Based on years of experience, the authors of Teaching the Silk Road offer sound strategies for both stand alone courses on aspects of the route and mainstreaming what has been uncovered in three decades of research into existing courses in a variety of disciplines. H Net Reviews H Asia. This collection of essays and personal reflections allows the reader to listen in on a relaxed conversation on teaching the topic of the Silk Road. It offers a nice blueprint for integrating the Silk Road into new or existing curricula. J Michael Farmer, author of *The Talent of Shu Qiao Zhou and the Intellectual World of Early Medieval Sichuan*.

**Premodern Travel in World History**

Stephen Gosch, Peter Stearns, 2007-12-12. This book features some of the greatest travellers in human history: people who undertook long journeys to places they knew little or nothing about. From Roman tourists to the establishment of the Silk Road, an epic trek round China and India in the seventh century to Marco Polo and through to the first speculations on space travel. *Premodern Travel in World History* provides an overview of long distance travel in Afro Eurasia from around 400 BCE to 1500. This survey uses succinct accounts of the most epic journeys in the premodern world as lenses through which to examine the development of early travel, trade and cultural interchange between China, central Asia, India and southeast Asia, while also discussing themes such as the growth of empires and the spread of world religions. Complete with maps, this concise and interesting study analyzes how travel pushed and shaped the boundaries of political, geographical and cultural frontiers.

*Social Scientific Studies of Religion in China* Fenggang Yang, Graeme Lang, 2011-01-27. The revival of religious belief and practice in China over the past thirty years after decades of severe repression has attracted much attention by scholars. Social scientific studies of religion by mainland Chinese scholars has also increased in recent years, using theories and methods developed mainly outside China. Increasingly, mainland scholars are also debating whether theories and concepts developed in western societies are fully appropriate for the study of religion in Chinese societies. This volume presents a selection of papers by sociologists, anthropologists and historians of religion on these themes. The chapters include

rich field studies of particular religions and religious activities along with theoretical and historical reflections by scholars inside and outside China on problems and opportunities in the revival of the social scientific study of religion in Chinese societies
