Religious Influences On Health And Well Being In The Elderly:

Religious Influences on Health and Well-Being in the Elderly K. Warner Schaie, PhD, Neal Krause, PhD, Alan Booth, PhD, 2004-06-15 What makes the book's approach so captivating is that each chapter is written by a different researcher in the study of religion and health. These researchers are responsible for significant portions of the existing literature and methodologies found in this field today. The versatility of the book warrants special mention. It is effective as a survey of work that has already been done on this topic. At the same time it serves as a wellspring of ideas for new research. This work makes a valuable contribution to the present understanding of research on religion and health. It also serves as a road map to help chart directions for future endeavors in the field. **Sociology of Religion** This volume focuses on the ways in which religious institutions, religious practices, and religious organizations impact the health and well-being of older persons. Topics examined include the conceptualization and measurement of religion in late life, the relationship between religious coping and possible stress reduction, the role of forgiveness as an alternate mediator, how social class, gender, and race can influence the specific effect of religion, and religious institutions in a diverse aging society. Contributors include L. Chatters, K. Ferraro, L. K. George, E. Idler, S. McFadden, and K. Meador. **Managing Geriatric Health Services** Alice McDonnell, 2013. **Managing Geriatric Health Services** provides an overview of the many disciplines related to geriatric health administration, as well as specialty topics in long-term care. Ideal for students studying geriatric health services administration, as well as active professionals currently working in the field, **Managing Geriatric Health Services** thoroughly examines core topics such as administration, nursing, and rehabilitative therapies. It also covers specialty topics including spirituality, dementia, quality assurance, oral history, and ethical issues. This text examines the various jobs within the continuum of care from an administrative and management standpoint and also looks at the various roles or disciplines within long-term care and the specific challenges to each. With contributions from experienced professionals in the field, this book includes an entire section of interdisciplinary case study examples and reflection exercises. Individual chapters include learning objectives, key terms, chapter-specific case studies, and chapter summaries. **Key Features:** Discussion questions in each chapter engage the reader in learning and understanding the topics presented. Interdisciplinary case studies allow the reader to see the practical application of the concepts presented. Chapters are supported by current research from prominent experts in the field. A unique chapter on Oral Histories explores the aging process and the value of reminiscing. **Instructor Resources:** PowerPoint, Lecture Slides, Test Bank.

Methods in Religion, Spirituality & Aging James W. Ellor, 2013-10-18. Since the 1971 White House Conference on Aging in the United States, the need to move from religiosity into new areas such as Spiritual Assessment and Spirituality has emerged. This movement has picked up momentum among scholars, particularly in terms of research in the area of Spirituality. While spirituality as a term is employed in many new studies, this term continues to defy the quest for a single definition and method. This book is divided into three sections. In the first, the authors reflect on the philosophical and

theological issues presented by these terms from a variety of both cognate and practical methodological approaches The second section offers insights from the major professions of sociology psychology public health nursing and social work The final section offers insight and assistance to researchers and authors on specific religious traditions This book will be important for anyone working to develop such practical tools as spiritual assessment forms to those who engage in more formal scholarly investigation

Wagner,Chandra Mehrotra,2013-03-07 This new edition has been completely rewritten and includes chapters that address key topics in diversity and aging research methods psychological aging health beliefs behaviors and services health disparities informal and formal care for older persons work and retirement religious affiliation and spirituality and death dying and bereavement Taking a broad view of diversity Mehrotra and Wagner discuss elements of diversity such as gender race or ethnicity religious affiliation social class rural urban community location and sexual orientation Including these elements allows them to convey some of the rich complexities of our diverse culture complexities that provide both challenges to meet the needs of diverse population and opportunities to learn how to live in a pluralistic society Throughout the book Mehrotra and Wagner present up to date knowledge and scholarship in a way that engages readers in active learning Rather than simply transmitting information the authors place ongoing emphasis on developing readers knowledge and skills fostering higher order thinking and encouraging exploration of personal values and attitudes Distinctive features of the book include Opening vignettes for each chapter that present a sampling of how the issues to be discussed apply to diverse elders Active learning experiences that invite readers to interview diverse elders conduct internet searches and give an analysis of a case study Quizzes at the end of the chapters help readers ascertain the extent to which they have learned the material the key for each quiz includes details about correct and incorrect responses so that additional learning can occur Aging and Diversity Online boxes interspersed throughout the book provide internet resources that readers may use to find new research and publications Suggested readings and audiovisual resources given at the end of each chapter serve as a guide to additional information on topics covered in the chapter This approach of presenting the material will help the readers understand and apply key concepts and principles in ways that will not only improve the lives of older people they serve but will also enhance their own aging experience **Social Structures, Aging, and Self-Regulation in the Elderly** K. Warner Schaie, PhD,Laura L. Carstensen, PhD,2006-07-06 This collection considers ways in which societal contexts influence aging by influencing self regulatory processes No one doubts that the social contexts in which individuals develop exert strong influence on life trajectories Those born into environments that provide high quality education supportive social relations and economic assets do better in old age than those born into environments

bereft of such resources The extent of this influence however is only beginning to be revealed Recent research shows that life experiences influence basic brain structures e g the effect of musical training on neural organization and functions e g inflammatory processes and that social embeddedness may even protect against Alzheimer s disease Similarly education increasingly appears to have a real effect on neural integrity Thus societal contexts may not simply open or close doors for individuals but may influence self regulatory processes at the most basic levels of functioning Although social structures are generally seen as the independent variables that affect individual aging it is also possible to think of a lifetime development of self regulatory processes leading to behaviors in old age that can have impact on and modify societal structures Two parts of this book consider self regulation as the dependent variable asking how social contexts influence cognitive emotional and self regulatory processes The third part reverses the question treating self regulation as the independent variable and retirement and physical health as dependent variables In this part consideration is given to how the effectiveness of self regulation influences physical and economic outcomes in old age
