Religious Violence in Contemporary Japan Ian Reader, 2013-10-11 The Tokyo subway attack in March 1995 was just one of a series of criminal activities including murder kidnapping extortion and the illegal manufacture of arms and drugs carried out by the Japanese new religious movement Aum Shinrikyo under the guidance of its leader Asahara Shoko Reader looks at Aum s claims about itself and asks why did a religious movement ostensibly focussed on yoga meditation asceticism and the pursuit of enlightenment become involved in violent activities Reader discusses Aum s spiritual roots placing it in the context of contemporary Japanese religious patterns Asahara s teaching are examined from his earliest public pronouncements through to his sermons at the time of the attack and statements he has made in court In analysing how Aum not only manufactured nerve gases but constructed its own internal doctrinal justifications for using them Reader focuses on the formation of what made all this possible Aum s internal thought world and on how this was developed Reader argues that despite the horrors of this particular case Aum should not be seen as unique nor as solely a political or criminal terror group Rather it can best be analysed within the context of religious violence as an extreme example of a religious movement that has created friction with the wider world that escalated into violence

How Terrorist Groups End Seth G. Jones, Martin C. Libicki, 2008-07-17 All terrorist groups eventually end But how do they end The evidence since 1968 indicates that most groups have ended because 1 they joined the political process 43 percent or 2 local police and intelligence agencies arrested or killed key members 40 percent Military force has rarely been the primary reason for the end of terrorist groups and few groups within this time frame have achieved victory This has significant implications for dealing with al Qaeda and suggests fundamentally rethinking post 9 11 U S counterterrorism strategy Policymakers need to understand where to prioritize their efforts with limited resources and attention The authors report that religious terrorist groups take longer to eliminate than other groups and rarely achieve their objectives The largest groups achieve their goals more often and last longer than the smallest ones do Finally groups from upper income countries are more likely to be left wing or nationalist and less likely to have religion as their motivation The authors conclude that policing and intelligence rather than military force should form the backbone of U S efforts against al Qaeda And U S policymakers should end the use of the phrase war on terrorism since there is no battlefield solution to defeating al Qaeda

Newport, Crawford Gribben, 2006 Jesus promise that the end draws near has spawned an expectation of that grand event across various religious groups This volume examines the abiding social issues that surround the continued presence of apocalyptic anticipation by setting them in historical present day and future manifestations Approaching this fervent expectation from a broad perspective Gribben and Newport explore the contemporary movements with insightful analysis that provokes discussion and even self reflection

Japanese Religions on the Internet Erica Baffelli, Ian Reader, Birgit Staemmler, 2013-05-13 Japanese Religions on the Internet draws attention to how religion is being presented represented and discussed on the Japanese Internet Its intention is to contribute to wider discussions about religion and the Internet by providing an important example based on one of the Internet s most prominent languages of how new media technologies are being used and are impacting on religion in the East Asian context while also developing further our understandings of religion in a technologically advanced country Scholars studying the relationship of religion and the Internet can no longer work on prevailing notions that have thus far characterised the field such as the assumption that the Internet is a Western centric phenomenon and that studies of English language sites relating to religion can provide a viable model for wider analyses of the topic Despite this growing amount of research on religion and the Internet comparatively little has focused on non Western cultures The general field of study relating to religion and the

Internet has paid scant attention to Asian contexts The field needs a full length and comprehensive study that focuses on the Japanese religious world and the Internet not merely to redress the imbalances of the field thus far but also because such studies will be central to the emerging field of the study of religion and the Internet in future They will provide important means of developing new theories constructing new paradigms and understanding the underlying dynamics of this new media form
