Voices of Collective Remembering James V. Wertsch, 2002-07-15 There is currently a great deal of discussion in the humanities and social sciences about collective memory but there is very little agreement on what it is The first goal of this volume is to review various understandings of this term to bring some coherence to the discussion Drawing on this review James V Wertsch goes on to outline a particular version of collective remembering grounded in the use of textual resources especially narratives This takes him into the special properties of narrative that shape this process and into the issues of how these textual resources are produced and consumed Wertsch brings these general ideas to life by examining the rapid massive transformation of collective memory during the transition from Soviet to post Soviet Russia Modern General Psychology, Second Edition (revised And Expanded) (in 2 Vols.) and the men who taught him to love he confronts the challenges of his life Body Remember is a story about connection a redemptive and passionate testimony to one man s search for the sources of identity and difference The Impact of Complex Trauma on Development Cheryl Arnold,Ralph Fisch,2011-10-16 The Impact of Complex Trauma on Development describes what happens cognitively and emotionally behaviorally and relationally to people who are repeatedly traumatized in childhood Part One brings together trauma theory with a number of theories of human development It directly addresses and describes developmental pathology and its origins Through powerful examples it conveys to the reader the pain and destruction caused by ongoing trauma abuse and continuous stress Part Two written from the perspective of a clinician who has worked extensively with traumatized children and adults is primarily directed to mental health professionals and graduate students These chapters are devoted to describing how to recognize the pathological consequences of trauma and how to intervene and remediate these developmental deficits The overarching theory is psychoanalytically based and developmental but other treatment approaches are integrated into the therapy when they are developmentally and therapeutically appropriate The text raises important questions related to the development of the self its relationship to therapy and the diagnosis and treatment of complex trauma in children adolescents and adults **The Bookseller** ,1901 Vols for 1871 76 1913 14 include an extra number The Christmas bookseller separately paged and not included in the consecutive numbering of the regular series **Understanding Suicide and Its Prevention** Federico Sanchez,2010-06-15 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the author s fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community s standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our

heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnesic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors
