**Italian Economics in the Interwar Period — Volume I** Massimo M. Augello, Marco E.L. Guidi, Fabrizio Bientinesi, 2019-11-25 Italy is well known for its prominent economists as well as for the typical public profile they have constantly revealed But when facing an illiberal and totalitarian regime how closely did Italian economists collaborate with government in shaping its economic and political institutions or work independently This edited book completes a gap in the history of Italian economic thought by providing a complete work on the crucial link between economics and the Fascist regime covering the history of political economy in Italy during the so called Ventennio 1922 1943 with an institutional perspective The approach is threefold analysis of the academic and extra academic scene where economic science was elaborated and taught the connection between economics society and politics and dissemination of scientific debate Special attention is given to the bias caused by the Fascist regime to economic debate and careers This Volume I deals with the economics profession under Fascism in particular in light of the political and institutional changes that the regime introduced the restructuring of higher education the restriction of freedom in teaching and of the press and with respect to promoting its own strategies of political and ideological propaganda Volume II available separately considers the public side of the economics profession the fascistisation of culture and institutions banishment and emigration of opponents and post WW2 purge of Fascist economists

**Energy and Seismic Renovation Strategies for Sustainable Cities** Giuseppe

Margani,2019-06-11 The principle of sustainability should be strictly connected with safety since both aim to conserve resources in the case of sustainability the resources are typically thought of as environmental while in the case of safety the resources are basically human In spite of this common ground discussions on sustainability usually give insufficient attention to safety In the last years the EU has made large investments to increase the energy efficiency of the existing building stock paving the way for a low carbon future however less effort has been made to enhance its seismic resilience Therefore the safety and consequently the sustainability of towns situated in earthquake prone countries remain inadequate In such countries energy renovation actions should be combined with seismic retrofitting However a number of barriers considerably limit the real possibility of extensively undertaking combined retrofit actions especially for multi owner housing and high rise buildings These barriers are of different kinds technical e g unfeasibility and or ineffectiveness of conventional retrofit solutions financial e g high renovation costs insufficient incentives subsidies organizational e g occupants disruption and relocation renovation consensus by condominium ownerships and cultural social insufficient information and skills lack of adequate policy measures for promoting renovation actions This book aims to overcome these barriers and to bridge the gap between sustainability and safety so to conserve both human and environmental resources *The Financial Systems of Industrial Countries* Riccardo De Bonis,Alberto Franco Pozzolo,2012-01-05 This book offers a comprehensive overview of the financial systems of major industrialized countries using the statistical framework of the financial accounts After a discussion of how economists agreed to create a framework to monitor the financial linkages between surplus and deficit sectors the book analyzes in detail the composition and the recent evolution of financial assets and liabilities for households including public pension rights firms and intermediaries Next the volume studies the convergence patterns of financial structures and their influence on the effectiveness of monetary policy within European countries The final chapter unifies the previous pictures showing how the effects of financial integration and global imbalances could have been foreseen based on the financial accounts The analysis and information contained in the book will help the readers to understand many issues and challenges raised by the recent financial crisis *Italian Fascism, 1915-1945* Philip Morgan,2017-03-14 It is now 80 years since Mussolini s Fascism came to power in Italy but the political heirs of the original Fascism are part of government in today s Italy The resurgence of neo fascist and neo Nazi extremism all over Europe are a reminder of the continuing place of fascism in contemporary European society despite its political and military defeat in 1945 This thoroughly revised updated and expanded edition provides a critical and comprehensive overview of the origins of Fascism and the movement s taking and consolidation of power Philip Morgan Explains how the experience of the First World War created Fascism Describes how the unsettled post war conditions in Italy enabled an initially small group of political adventurers around Mussolini to build a large movement and take power in 1922 Focuses on the workings of the first ever totalitarian system and its impacts on the lives and outlooks of ordinary Italians Considers the meshing of internal fascistisation and expansionism which

emerged most clearly after 1936 as Italy became more closely aligned with Nazi Germany Examines the demise of Italian Fascism between 1943 and 1945 as Mussolini and his party became the puppets of Nazism Provides an explanation and interpretation of Fascism locating it in contemporary history and taking account of recent debates on the nature of the phenomenon Clear and approachable this essential text is ideal for anyone interested in Italy's turbulent political history in the first half of the 20th century

**Private Bankers in the Italian 19th Century** Luciano Maffi, 2020-12-14 The book analyses the role of private bankers who were pivotal in modernizing the economic and financial system of Italy in the XIX century To achieve this they needed to interact with the international haute banque to organize and place the public loans and the large investments associated with the joint stock companies The theme of reputation which is currently at the centre of the historiographical debate is fundamental for the study of the private banker figures whose professional success is linked to the limitless trust accorded to them by their circle of personal contacts Historiography has studied the role of Italian bankers in the trade credit and international finance during the modern age XVI XVIII centuries but it has not analysed the banking system in the XIX century and its national and international relations The case study of Banca Parodi of Genova fills the historiographical gap concerning the role of private bankers and banking institutions in Italy highlighting the network between the Parodi family and the international haute banque one of the most emblematic cases is the Rothschild family The book presents a re-elaborates series of unpublished data placing them at the disposal of the scientific community and analyses the role of private bankers in the development of Italian banking institutions in the XIX century to launch a scientific debate

Nearly Zero Energy Building Refurbishment Fernando Pacheco Torgal, Marina Mistretta, Artūras Kaklauskas, Claes G. Granqvist, Luisa F. Cabeza, 2013-10-22 The recast of the Energy Performance of Buildings Directive EPBD was adopted by the European Parliament and the Council of the European Union on 19 May 2010 For new buildings the recast fixes 2020 as the deadline for all new buildings to be nearly zero energy and even sooner for public buildings by the end of 2018 This book gives practitioner an important tool to tackle the challenges of building refurbishment towards nearly zero energy This book is welcome at this time and sets the scene for professionals whether practitioners or researchers to learn more about how we can make whether old or new buildings more efficient and effective in terms of energy performance

**Local Economic Systems and Housing Real Estate Markets in University Towns** Alessandra Oppio, Marta Bottero, Stefano Stanghellini, Marco Rossitti, 2025-06-20 This book investigates the relationship between universities real estate markets and local economic systems in light of contemporary urban regeneration processes and sustainability challenges Indeed university settlements can generate important spillovers and opportunities in their territory thus becoming decisive development and transformation factors for cities socio-economic productive environmental and infrastructural components Furthermore the increasing student mobility to university towns raises relevant sustainability issues concerning the housing demand stemming from off-site students which by strongly impacting the real estate market can place students families and

low income residents against important financial barriers By collecting the papers presented at the SIEV Italian Society of Appraisal and Valuation seminar held in Florence Italy in November 2023 within the context of the Urbanpromo Progetti per il Paese cultural event the book delves into understanding and assessing the complexity of the effects generated by investments in university settlements as a fundamental factor for effective urban development policies aimed both at meeting the right to study and maximizing impacts from a circular perspective The proposed reflections finding their common thread in the use of interpretative models and methodological tools of the appraisal and valuation discipline are organized into three parts Part I Investing in university cities sustainability and urban regeneration issues Part II University and real estate markets evaluation issues and models Part III Real estate market and governance in university cities evidence from case studies
