These proceedings derive from an international conference on the history of computing and education This conference is the second of hopefully a series of conferences that will take place within the International Federation for Information Processing IFIP and hence we describe it as the Second IFIP Conference on the History of Computing and Education or simply History of Computing and Education 2 HCE2 This volume consists of a collection of articles presented at the HCE2 conference held in association with the IFIP 2006 World Computer Congress in Santiago Chile Articles range from a wide variety of educational and computing perspectives and represent activities from five continents The HCE2 conference represents a joint effort of

the IFIP Working Group 9.7 on the History of Computing and the IFIP Technical Committee 3 on Education. The HCE2 conference brings to light a broad spectrum of issues. It illustrates topics in computing as they occurred in the early days of computing whose ramifications or overtones remain with us today. Indeed many of the early challenges remain part of our educational tapestry; most likely many will evolve into future challenges. Therefore these proceedings provide additional value to the reader as it will reflect in part the future development of computing and education to stimulate new ideas and models in educational development. These proceedings provide a spectrum of interesting articles spanning many topics of historical interest.
