Renal Effects Of Petroleum Hydrocarbons Advances In Modern Environmental Toxicology Volume 7:

Clinical Environmental Health and Toxic Exposures John Burke Sullivan, Gary R. Krieger, 2001 Now in its revised and updated Second Edition this volume is the most comprehensive and authoritative text in the rapidly evolving field of environmental toxicology The book provides the objective information that health professionals need to prevent environmental health problems plan for emergencies and evaluate toxic exposures in patients Coverage includes safety regulatory and legal issues clinical toxicology of specific organ systems emergency medical response to hazardous materials releases and hazards of specific industries and locations Nearly half of the book examines all known toxins and environmental health hazards A Brandon Hill recommended title **Toxicology of the Kidney** Jerry B. Hook, Robin S. Goldstein, 1993-06-30 This second edition provides a synthesis of recent research on the mechanisms of chemically induced kidney injury The text includes a review of current concepts of clinical nephrotoxicity and renal failure and mechanisms of specific classes of nephrotoxic drugs and environmental chemicals *Nephrotoxicity* Peter Bach, 2013-06-29 There has been a growing awareness that nephrotoxicity represents a key factor in human nephropathies where irrespective of the causative agent only a few clinical end effects are diagnosed Thus nephropathies are generally classified as acute or chronic renal failure malignancies or immunological changes The weaknesses in diagnosing nephropathies arises because of the effective role the kidney plays in maintaining homeostasis despite the fact that it has been extensively damaged The frequencies of some type of chemically induced acute renal failure is well documented but the causes of chronic renal failure malignancy and other nephropathies are far more difficult to associate with a chemical aetiology Many of the new therapeutic agents have important beneficial effects but they are found to have marked nephrotoxic effects Thus there is a growing urgency to increase the stringency of chemical safety evaluation for their potential nephrotoxic effects This is strongly countered by the increased financial pressure to identify potentially nephrotoxic chemicals earlier in their development and humanitarian considerations to more closely relate animal test to the clinical situation Part of the challenge may be achieved by the increasing use of in vitro techniques **Environmental Health Perspectives** ,1993 **Toxicological Profile for Gasoline** ,1995 *Jet Fuel Toxicology* Mark L. Witten, Errol Zeiger, Glenn David Ritchie, 2010-07-30 Currently serving as a resource for the National Center for Toxicological Research in their work with the Gulf Coast oil spill this book presents current research conducted primarily by the airforce on the toxic effects of JP 8 jet fuel on the pulmonary immune dermal and nervous systems In all the book considers 13 toxicology studies *World Scientific Reference Of Water Science, The (In 3 Volumes)* ,2022-09-16 Water is an indispensable resource for our society Essential to sustaining life and economic prosperity water is also the basic component for manufacturing almost everything to keep society alive including energy food clothing cars and electronics among many other examples It is thus an integral part of our lives beyond simply quenching our thirst In addition our future economy and security highly depend upon the availability of clean water Yet given its critical

importance there is a limited supply of renewable freshwater across the globe and there is no substitute. Global population and economic growth, urbanization and climate change further exacerbate the increasing stress on freshwater supplies. As such, society urgently needs to find the scientific and engineering solutions to more efficiently manage our precious water resources. The volumes of this multi-volume reference cover the latest scientific advancements and solutions in managing and treating this crucial resource. The International Life Sciences Institute (ILSI) was established to stimulate and support scientific research and educational programs in nutrition, toxicology and food safety and to encourage cooperation in these programs among scientists from universities, industry and government in order to facilitate the resolution of health and safety issues. The officers and trustees of ILSI believe that questions regarding health and safety are best resolved when government and industry rely on scientific investigations, analyses and reviews by independent experts. This process is furthered by the examination and discussion of issues on an international basis. ILSI is pleased to sponsor this set of monographs on the pathology of laboratory animals. This project collectively brings together the most comprehensive information on non-neoplastic and neoplastic lesions that occur in commonly used laboratory animals. The international composition of the authors, editors and editorial board who have contributed to these monographs strengthens our expectations that understanding and cooperation will be strengthened worldwide through this series. **NTP Toxicity Study Reports**, 1991. Dictionary of Substances and their Effects (DOSE) S. D. Gangolli, 2007-10-31. This new edition of The Dictionary and Substances and their Effects (DOSE) supersedes the renowned 1st edition. The 1st edition has been completely revised, updated and extended with all the latest significant data on the chemicals known to have adverse effects on life forms or the environment. The new edition is a must for all those who need easy access to a single source of the latest essential and fully referenced data on chemicals which are known to have significant toxic or environmental effects. The web database is ideal for targeted searches and customised data retrieval. The 2nd edition of DOSE includes new toxicity, environmental and regulatory data from the world's literature presented in concise summaries. These new data are essential for the accurate assessment of the risks associated with the use and disposal of chemicals. Data on over 100 chemicals new to this edition have been added, including endocrine disruptors, food carcinogens, pesticides and compounds studied by IARC and NTP. All of the 4000 chemicals contained in the 1st edition have been reviewed. New and updated information for these chemicals includes occupational exposure limits for 6 countries, recent toxicity and ecotoxicity data, results of new carcinogenicity, mutagenicity and environmental fate studies, the latest regulatory requirements. DOSE 2nd edition comprises 7 hardcover volumes covering over 4000 chemicals alphabetically and includes indexes of substance names and synonyms, molecular formulae and CAS Registry Numbers, glossaries of medical terms and Latin to English organism names and abbreviations listing and a comprehensive guide to the types of data and their origin.
