Blacklock, 2010-11-10 No Drug deal is worth dying for was the first rule of the street that I chose to call a Street Smart rule and was one of ten informal rules which guided me through a career as a Federal Agent with the Drug Enforcement Administration DEA In my book Breakfast in Kersey I detail these ten rules the Street Smarts that I deduced from actual street experience and incorporated them with anecdotal incidents which traced the highs and lows of my Special Agent career In tracing my long career the many facets of drug law enforcement are exposed from the exciting and dangerous work of undercover to the rather mundane tasks such as long term surveillance Additionally the highs and lows of a federal narcotics career are examined from the thrill of making a big seizure or arrest to the heartbreaking hardships that this job has on a family and personal life And finally I offer insights at the frustrations of the job such as inane policies and procedures established by a higher headquarters that tended to hinder investigations and at times agent safety to the petty bickering that existed between local state and federal agencies over drug and or money seizures and jurisdiction Interwoven into these facets are anecdotes both humorous and sad but every one of them real allowing a keen insight as to what it was really like to toil in the realm of narcotics enforcement Rocks and Bottles E.S. Tasker, 2021-10-12 When the author sat down and began writing Rocks and Bottles his thoughts centered around the problems facing our society today He recognized that there were many within the society who had a tendency to blame one particular segment our law

enforcement for much of what was going on Nothing could be further from reality than that belief Truth be known our law enforcement much like our society isn't perfect But without our law enforcement there would be no society worth having The demands placed on our police officers today are at times excruciating Theirs is a tough job It always has been Yes occasionally mistakes are made There is no excuse for those They are human beings just like you and me but with one exception they are each willing to sacrifice what some refer to as a normal life to protect the lives of others When reading the various chapters within *Rocks and Bottles* it is hoped that you the reader will gain a better perspective as to the type of person many officers are and that you will conclude that they are very much like yourself *California. *Nottingham Harbor* Jack Lorenz,2015-05-04 When I started to write the novel

NOTTINGHAM HARBOR it was to just be a fictional crime novel set in northern New England After working on the story and reading about the DNA analysis stories I realized the novel had a very significant purpose It was and is the story of how to catch serial rapist after law enforcement has the results from the DNA analysis The story is about a task force attempting to identify a number of rapist DNA does not identify the criminal The FBI maintains a database called CODIS This is a database of DNA of persons convicted of crimes Unless a person has been convicted of a crime their DNA is NOT in CODIS The Author Jack Lorenz of NOTTINGHAM HARBOR fully agrees with this legal restriction When the DNA from the rape kits is determined very few of the results match the DNA in CODIS Rape is a unique type of crime Most criminals do NOT rape in addition to other crimes So very few rapist are in the CODIS database So in a number of jurisdictions where several hundred to a thousand rape kits have been analyzed only two or three rapist are identified The secondary problem is that the serial rapists move from jurisdiction to jurisdiction and only rape once in each jurisdiction It is very difficult to identify the rapist with the information from only one case Use of the physical characteristics of the criminal and the DNA must be used to tie cases together This is what the team of Mattie Greene the mathematics teacher and Sergeant Bill Simpson do in NOTTINGHAM HARBOR They find a common denominator between the cases with regard to the identity of the rapist Since rapists like other people must reside work eat and drink at physical places these types of information can be used to identify the specific person The techniques in the fictional story are the methods required in the real world to catch these dangerous criminals DNA will not catch but a few rapists There may be as many as 2000 rapists running around North America They rape randomly on the streets of this country and Canada The police and district attorneys in United States must work across jurisdictional lines as in NOTTINGHAM HARBOR Beside a good story the novel has a higher purpose It explains how to identify and catch these violent criminals The other fact about these criminals is some of them are murders in addition to being rapists If you are victim of a rape then you need to urge the local police to work with other jurisdictions and using technique similar those in NOTTINGHAM HARBOR identify and catch the rapist This is the purpose of the novel in addition to being a good story Enjoy the novel

*Historical Climate Variability and Impacts in North America* Lesley-Ann Dupigny-Giroux, Cary J. Mock, 2009-09-18

Climatologists with an eye on the past have any number of sources for their work from personal diaries to weather station reports Piecing together the trajectory of a weather event can thus be a painstaking process taking years and involving real detective work Missing pieces of a climate puzzle can come from very far afield often in unlikely places In this book a series of case studies examine specific regions across North America using instrumental and documentary data from the 17th to the 19th centuries Extreme weather events such as the Sitka hurricane of 1880 are recounted in detail while the chapters also cover more widespread phenomena such as the collapse of the Low Country rice culture The book also looks at the role of weather station histories in complementing the instrumental record and sets out the methods that involve early instrumental and documentary climate data Finally the book s focus on North America reflects the fact that the historical climate community there has only grown relatively recently Up to now most such studies have focused on Europe and Asia The four sections begin with regional case studies and move on to reconstruct extreme events and parameters This is followed by the role of station history and lastly methodologies and other analyses The editors aim has been to produce a volume that would be instrumental in molding the next generation of historical climatologists They designed this book for use by general researchers as well as in upper level undergraduate or graduate level courses
