Second Food Security Measurement and Research Conference: Papers, 2001 *Second Food Security Measurement and Research Conference*, 2001 **Second Food Security Measurement and Research Conference, Volume I** M.S. Andrews, M.A. Prell, 2001 The Second Food Security Measurement and Research Conference February 23-24 1999 was co-sponsored by the U.S. Department of Agriculture's Food and Nutrition Service and Economic Research Service and the U.S. Department of Health and Human Services National Center for Health Statistics. The conference was part of an ongoing program of Federal food security research the goal of which has been to establish a stable measurement strategy to assess annually the food security status of the U.S. population. This report is Volume II of a two-volume set and contains a set of research papers that conference participants prepared to provide further detail on the content and findings of some research presented at the conference. **Household Food Security in the United States, 2009**, 2010 **Household Food Security in the United States**, 2009 *Food Assistance and Nutrition Research Report*, 1999 **Household Food Security in the United States, 2000**, 2001 *107-2 Hearings: Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 2003, Part 4, February 28, 2002, **, 2002 **Household Food Security in the United States, 2000** Mark Nord, 2002 **Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations for 1997** United States. Second Food Security Measurement and Research Conference, 2001 *Household Food Security in the United States (2008)* Mark Nord, 2010-11 Eighty-five percent of American households were food secure throughout the entire year in 2008 meaning that they had access at all times to enough food for an active healthy life for all household members. The remaining households 14.6 percent were food insecure at least some time during the year including 5.7 percent with very low food security meaning that the food intake of one or more household members was reduced and their eating patterns were disrupted at times during the year because the household lacked money and other resources for food. Prevalence rates of food insecurity and very low food security were the highest recorded since 1995 when the first national food security survey was conducted. Charts and tables *Food Insecurity and Hunger in the United States* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel to Review the U.S. Department of Agriculture's Measurement of Food Insecurity and Hunger, 2006-05-02 The United States is viewed by the world as a country with plenty of food yet not all households in America are food secure meaning access at all times to enough food for an active healthy life. A proportion of the population experiences food insecurity at some time in a given year because of food deprivation and lack of access to food due to economic resource constraints. Still food insecurity in the United States is not of

the same intensity as in some developing countries Since 1995 the U S Department of Agriculture USDA has annually published statistics on the extent of food insecurity and food insecurity with hunger in U S households These estimates are based on a survey measure developed by the U S Food Security Measurement Project an ongoing collaboration among federal agencies academic researchers and private organizations USDA requested the Committee on National Statistics of the National Academies to convene a panel of experts to undertake a two year study in two phases to review at this 10 year mark the concepts and methodology for measuring food insecurity and hunger and the uses of the measure In Phase 2 of the study the panel was to consider in more depth the issues raised in Phase 1 relating to the concepts and methods used to measure food security and make recommendations as appropriate The Committee on National Statistics appointed a panel of 10 experts to examine the above issues In order to provide timely guidance to USDA the panel issued an interim Phase 1 report *Measuring Food Insecurity and Hunger Phase 1 Report* That report presented the panel s preliminary assessments of the food security concepts and definitions the appropriateness of identifying hunger as a severe range of food insecurity in such a survey based measurement method questions for measuring these concepts and the appropriateness of a household survey for regularly monitoring food security in the U S population It provided interim guidance for the continued production of the food security estimates This final report primarily focuses on the Phase 2 charge The major findings and conclusions based on the panel s review and deliberations are summarized
