

ICH

The term ICH is international conference harmonisation of technical requirements for registration of pharmaceuticals for human use.

The name of ICH has now become more associated with the process of harmonisation, than the actual conferences. The ICH project is unique and since 1991 it has brought together by Drug Regulatory Authorities and experts from the pharmaceutical industry in USA, European union and Japan to develop agreement on core documentation, technical requirements and dossier for registration of new drugs.

The vast majority of new drugs and medicines are developed in Western Europe, Japan and USA and therefore when ICH was established, it was agreed that its scope would be confined to registration in these three regions.

The ICH was born in 1990 .The first ICH was held from 5-7 November 1991 at Brussels.

MEMBERS OF ICH:

1) ICH is a joint initiative involving both regulations and industry as equal partners. There are six parties directly involved representing the regulation bodies and the research based industry associations in each region. The parties involved from the European Union, Japan and USA are:

- i) European Commission
- ii) European Federation of Pharmaceutical Industries Associations.
- iii) Ministry of Health and Welfare
- iv) Japan Pharmaceutical Manufacturers Association
- v) US Food and Drug Administration
- vi) Pharmaceutical Research and Manufacturers of America

Each of the six co-sponsors has two seats on the ICH steering committee which oversees the harmonization activities.

2) There are three observers:

- i) World Health Organization
- ii) European Free Trade Area (EFTA) represented at ICH by Switzerland and Canada.
- iii) EFTA represented at ICH by the drugs Directorate Health Canada.

Each of the observer parties has a seat on the ICH steering committee.

3)The International Federation of Pharmaceutical Manufacturers Association(IFPMA) which is a federation of member associations representing the research based pharmaceutical industry and other manufacturers of prescription medicines in 56 countries has been closely associated IFPMA has two seats on the ICH steering committee as non-voting members.

4) For smooth running of ICH, each of six co-sponsors designate an ICH coordinator to act as the main contact point with the ICH secretariat and ensure that ICH documents are distributed to the appropriate persons within the area of their responsibilities.

5)Each party has also established a contact network of experts with in their own organization (or region) in order to ensure that they reflect the views and policies of the co sponsor they represent the way in which this network operates differs according to administrative structure of the party concerned.

The Handbook of Transnational Governance Thomas Hale,David Held,2018-02-12 When we speak of global governance today we no longer mean simply state to state diplomacy international treaties or intergovernmental organizations like the United Nations Alongside these traditional elements of global politics are a host of new institutions ranging from global networks of governmental officials to private codes of conduct for corporations to action oriented partnerships of NGOs governments corporations and other actors These innovative mechanisms offer intriguing solutions to pressing transnational challenges as diverse as climate change financial governance workers rights and public health But they also raise new questions about the effectiveness and legitimacy of transnational governance An expanding body of scholarship has sought to identify and assess these new forms of governance but this young body of work has lacked a sense of the larger picture This volume seeks to fill that need by presenting a comprehensive overview of new forms of transnational governance This resource is essential for those who want to explain why transborder governance has changed and to understand what implications these changes have for global politics *International Stability Testing* David J. Mazzo,2020-08-26 In this book recognized industry experts and regulatory inspectors from the world s pharmaceutical manufacturing regions provide stability requirements in all the major markets and discuss all aspects of stability testing and biotechnology Participants in the ICH debates interpret the ICH guidelines Other discussions focus on European requirements the ICH initiatives the US SUPAC initiative matrixing and bracketing approaches from the cGMP and FDA perspective and stability requirements in Japan Australia and WHO Stress programs testing of preservatives and physical stability topics are addressed as well as various protocols and statistical approaches **Comprehensive Toxicology: Toxicological testing and evaluation I.**

Glenn Sipes,1997 This volume in the Comprehensive Toxicology series demonstrates how the use of extremely powerful molecular and cell biology techniques has stimulated the growth of toxicology as a scientific discipline The field of toxicology has evolved from its earlier days of in vivo and descriptive studies to focusing on mechanisms Frequently mechanisms require an examination at the cellular and molecular level Molecular toxicology has opened the door to comprehending the basic mechanisms of how toxicants show their effects The volume is a comprehensive integrated profile of the molecular effects of toxicants and the molecular mechanisms involved in producing cellular and tissue injury Nonclinical Safety Assessment William J. Brock,Kenneth L. Hastings,Kathy M. McGown,2013-03-05 Nonclinical Safety Assessment Nonclinical Safety Assessment A Guide to International Pharmaceutical Regulations Bringing a new drug to market is a costly time consuming process Increased regional and international regulation over the last twenty years while necessary has only served to amplify these costs In response to this escalation developmental strategies have shifted towards a more global approach In order to create the most cost effective and safe processes it is critical for those bringing drugs to market to

understand both the globally accepted regulations and the local variations Nonclinical Safety Assessment A Guide to International Pharmaceutical Regulations provides a practical description of nonclinical drug development regulations and requirements in the major market regions It includes ICH the International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use National regulations including US FDA Canada Mercosur and Brazil South Africa China Japan India and Australia Repeated dose toxicity studies Carcinogenicity Genotoxicity Developmental and reproductive toxicology Immunotoxicology Biotechnology derived pharmaceuticals Vaccine development Phototoxicity and photocarcinogenicity Degradants impurities excipients and metabolites Primarily intended for those professionals actively involved in the nonclinical and clinical development of a pharmaceutical product including toxicologists pharmacologists clinicians and project managers this book provides a roadmap for successful new drug approval and marketing

Toxicology and Risk Assessment Helmut Greim,Robert Snyder,2008-04-15 This new book written by two outstanding scientists in the field describes the basic principles of toxic mechanisms and organ toxicity providing detailed information on specific mechanisms or chemicals for exemplification The goal is to provide sufficient information that the reader becomes familiar with the basic concepts in toxicology to enable him or her to understand the basic principles in toxicology and to evaluate the risks at given exposures With this basic understanding the reader also will be able to critically evaluate the available information on a chemical and to identify data gaps In addition to the introductory chapters the book will offer the following systematic information presented in six special sections Principles in Toxicology Organ Toxicology Methods in Toxicology Risk Assessment Risk Management Toxicity of Chemicals Fulfilling a demand for such a book this will be a welcomed introductory text for students and non experts alike to focus on and understand the principles of hazard identification and risk assessment of toxicants Relevant to all those studying toxicology biochemistry biology medicine and chemistry as well as toxicologists in hospitals universities and in industry *Proceedings of the Third International*

Marzulli,Howard I. Maibach,2019-05-07 This work presents and evaluates methods employed to identify the potential of certain types of chemicals to adversely affect the skin A variety of

test methods are included such as tests for skin penetration metabolism irritation the skin immune system photo effects skin cancer and topical effects of retinoids and depigmenting chemicals Tests for chemicals that affect the reproductive and nervous system are also included Both animal and human tests that have been standardised and tests that are under development and employ animal alternatives are addressed in this book Besides different testing methods a rationale for accepting non animal models and a review of some regulatory agency discussions about animal alternative tests are included

McAuslane,C. Lumley,S.R. Walker,2012-12-06 Over the past twelve years the Centre for Medicines Research has held a series of Workshops on a number of topics related to the drug discovery and development process The major objective of these Workshops has been to provide an international forum for regulatory academic and industry representatives to debate together and suggest solutions to specific problems The meeting reported in this volume represents a departure from this approach in that the participants were drawn largely from the pharmaceutical industry Senior clinicians pharmacologists and toxicologists from companies in Europe the USA and Japan met in May 1994 to discuss a scientific rationale for the conduct of toxicity studies to support the clinical development of new medicines and to begin to work towards an industry consensus Achievement of such a consensus is seen as an important step in the process leading towards international harmonisation of the recommendations on the timing of toxicity studies in relation to clinical trials *Nanoparticulate Drug Delivery* Vandana Patravale,Prajakta Dandekar,Ratnesh Jain,2012-10-31 Nanotechnology based therapeutics operating at scales of billionths of a metre have great potential for future expansion in altering the scale and methods of drug delivery The availability of these novel formulations to once inaccessible areas of the body has greatly expanded the therapeutic window of existing drug molecules Nanoparticulate drug delivery highlights and examines the transition of nanoparticulate drug delivery systems from the laboratory into a commercially viable sector The first chapters of the book provide an overview of the use and characterization of nanoparticulate systems as drug carriers including the assessment of their morphology sterility and potential toxicity In the latter part of the book chapters cover nanotoxicology regulatory aspect and clinical trials ending with an overview of several case studies and a look towards future developments Discusses the issues surrounding nanoparticulate products based on personal experience of their formulation Provides an overview of new application areas including RNA interference Outlines the pros and cons of nanoparticulate products and discusses how these may influence their route into the commercial sector **Handbook of Modern Pharmaceutical Analysis** Satinder Ahuja,Stephen Scypinski,2001 This book describes the role modern pharmaceutical analysis plays in the development of new drugs Detailed information is provided as to how the quality of drug products is assured from the point of discovery until the patient uses the drug Coverage includes state of the art topics such as analytics for combinatorial chemistry and high throughput screening formulation development stability studies international regulatory aspects and documentation and future technologies that

are likely to impact the field Emphasis is placed on current easy to follow methods that readers can apply in their laboratories No book has effectively replaced the very popular text *Pharmaceutical Analysis* that was edited in the 1960s by Tak Higuchi This book will fill that gap with an up to date treatment that is both handy and authoritative **Photostability Of Drugs And Drug Formulations** Hanne Hjorth Tonnesen,1996-09-03 This text discusses various aspects of the combination of drugs and light Degradation processes stabilization of photolabile drug substances within formulations benefits from the combination of drugs and light and testing of drug photoreactivity are some of the topics discussed

Statistics In the Pharmaceutical Industry C. Ralph Buncher, Jia-Yeong Tsay, 2019-03-07 The growth of the pharmaceutical industry over the past decade is astounding but the impact of this growth on statistics is somewhat confusing While software has made analysis easier and more efficient regulatory bodies now demand deeper and more complex analyses and pharmacogenetic genomic studies serve up an entirely new set of challenges For more than two decades Statistics in the Pharmaceutical Industry has been the definitive guide to sorting through the challenges in the industry and this Third Edition continues that tradition Updated and expanded to reflect the most recent trends and developments in the field Statistics in the Pharmaceutical Industry Third Edition presents chapters written by experts from both regulatory agencies and pharmaceutical companies who discuss everything from experimental design to post marketing studies This approach sheds light on what regulators consider acceptable methodologies and what methods have proven successful for industrial statisticians Both new and revised chapters reflect the increasingly global nature of the industry as represented by authors from Japan and Europe the increasing trend toward non inferiority equivalence testing adaptive design in clinical trials global harmonization of regulatory standards and multiple comparison studies The book also examines the latest considerations in anti cancer studies Statistics in the Pharmaceutical Industry Third Edition demystifies the approval process by combining regulatory and industrial points of view making it a must read for anyone performing statistical analysis at any point in the drug approval process
