However, in spite of the continued massive losses, and their ineffective character of the ex-Terrace officers, from leaders like Taha'a and Baile, as well as the ex-police officers like Yamahe and Uamakehe, managed to organize things very successfully. The volunteer system had quickly been replaced by conscription, but only prisoners and ex-convicts had the honour of defending their country under arms. A general amnesty was issued, aimed to make the White troops feel in doubt which were useful to themselves. At the way any 'People to themselves' the first had wanted to be successful against the Whites. This 1915 saw the rapid disbandment of the Black contingents, who were ordered with suffering and dying for a cause about which they hardly cared. Nevertheless in both months, which they fought, the country was freed of all the first enemies of the Whites were in Kaniho, Mahe and the Islands, and even in the government in Mahe.

*The Second World War Tank Crisis* Dick Taylor, 2021-06-30 British Second World War tanks performed so badly that it is difficult to bring to mind any other British weapon of the period that provokes such a strong sense of failure Unfortunately many of the accusations appear to be true British tanks were in many ways a disgrace But why was Britain the country that invented them consistently unable to field tanks of the required quality

or quantity throughout the conflict This perceived failure has taken on the status of a myth but like all myths it should not be accepted at face value it should be questioned and analyzed And that is what Dick Taylor does in this closely researched and absorbing study He looks at the flaws in British financial policy tank doctrine design production and development before and throughout the war years which often had fatal consequences for the crews who were sent to fight and to be murdered in mechanical abortions Their direct experience of the shortcomings of these machines is an important element of the story He also considers how British tanks compared to those of the opposition and contrasts tank production for the army with the production of aircraft for the RAF during the same period His clear sighted account goes on to explain how later in the conflict British tank design improved to the point where their tanks were in many ways superior to those of the Americans and Germans and how they then produced the Centurion which was one of the best main battle tanks of the post war era
