

The book cover features a dramatic illustration of two German aircraft flying through a cloudy sky. The aircraft in the foreground is a Messerschmitt Me 262, shown from a low angle, flying towards the viewer. It has a sleek, delta-wing design with two engines mounted on the wings. The aircraft in the background is a Junkers Ju 87, a dive bomber, also flying towards the viewer. The sky is filled with large, billowing clouds in shades of blue, white, and grey. The title 'SECRET AIRCRAFT DESIGNS of the THIRD REICH' is printed in large, bold, yellow capital letters in the upper right corner. The author's name 'David Myhra' is in white capital letters below the title. In the bottom left corner, there is a small circular logo with a red and white design, and the text 'A SCHIFFER MILITARY HISTORY BOOK' is printed in yellow capital letters.

Secret Aircraft Designs Of The Third Reich:

Secret Aircraft Designs of the Third Reich David Myhra, 1998 In *Secret Aircraft Designs of the Third Reich* aircraft biographer David Myhra gives the reader much more than pictures of proposed German aircraft projects although this work is richly illustrated by state of the art digital images by Mario Merino The total number of German projects is in excess of 400 Blohm und Voss tops the list with over 200 project designs The reader is introduced to the men behind these proposed aircraft One will discover Woldemar Voigt's frustration with his Me P 1101 and why it simply would not sell The reader will learn why Dr Gert of Gotha lobbied the RLM to take his Go P 60 designs and scrap the Horten Ho 229 We see why critics of design genius Alexander Lippisch said that he was a man who had a new design almost every day but fails to put most of them into the air Myhra describes the shameful handling of Hugo Junkers the father of German aviation by the Gestapo It was Junkers who said that ideas for advanced aircraft projects were about as cheap as blueberries To an idea must be added materials resources and time And time in all the secret projects was short very short Although over 400 aircraft projects were on the drawing board when the war in Europe ended in May 1945 only a handful were in the prototype stage This outstanding book also offers a superb collection of photographs of scale models from contributors throughout the world and digital images by Mario Merino and Andreas Ott that offer a one of a kind look at secret German designs [Luftwaffe Secret](#)

[Projects of the Third Reich](#) Dan Sharp, 2019-08 **Secret Wings of World War II** Lance Cole, 2015-06-30 There are many myths and legends surrounding the advanced German aeronautical technology of the Second World War There are also facts and proven events Yet within these stories and behind these facts lie conspiracy theories mistaken assumptions and denials that seem to contradict the evidence So what really happened How far ahead were the German scientists And of even greater interest why and how There have been other books about advanced German wartime aeronautics yet few authors have fully examined the detail of the designs and their relevance to the fighter and bomber legends of the 1950s and 60s let alone the current crop of military and civil all wing or blended wing aircraft This book charts the story from its origins through current day innovations and beyond into the all wing future of tomorrow , *Sack AS 6- Source of Nazi Germany UFO Claims?* David Myhra PhD, 2013-09-13 Much has been written about the alleged existence of Nazi flying saucers or disk shaped flying machines from World War II however despite claims of a few would be obscure former Nazi aviation designers from about mid 1947 and on there are no original first hand historical accounts or documents to support these claims The closest aircraft to fit these descriptions is the Sack AS 6 V1 by a farmer and model builder flier Arthur Sack whose AS 6 and Sack himself disappeared completely in 1945 Enjoy reading and viewing the rare photographs about the truth about Nazi Germany's Flying Saucers [A History of the Future](#) Peter J. Bowler, 2017-11-02 In this wide ranging survey Peter J Bowler explores the phenomenon of futurology predictions about the future development and impact of science and technology on society and culture in the twentieth century Utilising science fiction popular science literature and the novels of the literary elite Bowler

highlights contested responses to the potential for revolutionary social change brought about by real and imagined scientific innovations Charting the effect of social and military developments on attitudes towards innovation in Europe and America Bowler shows how conflict between the enthusiasm of technocrats and the pessimism of their critics was presented to the public in books magazines and exhibitions and on the radio and television A series of case studies reveals the impact of technologies such as radio aviation space exploration and genetics exploring rivalries between innovators and the often unexpected outcome of their efforts to produce mechanisms and machines that could change the world

Secret Projects of the Luftwaffe - Vol 1 - Jet Fighters 1939 -1945 Dan Sharp,2020-09-22 Germany's air ministry was quick to grasp the potential of the jet engine as early as 1938 and by 1939 several German aircraft manufacturers were already working on fighter designs that would utilize this new form of propulsion Rocket engines too were seen as the way of the future and companies were commissioned to design fighters around them As the Second World War began the urgent need to bring these advanced new types into production saw a host of innovative aircraft designs being produced which would eventually result in Messerschmitt's Me 262 jet fighter and the Me 163 rocket propelled interceptor And as the war progressed efforts were increasingly made to find better ways of utilizing jet rocket and latterly ramjet engines in fighter aircraft Aviation companies from across Germany set their finest minds to the task and produced some of the most radical aircraft designs the world had ever seen They proposed rotating wing ramjet fighters arrowhead shaped rammers rocket firing bat winged gun platforms sleek speed machines tailless flying wings tiny mini fighters and a host of others ranging from deadly looking advanced fighters to downright dangerous vertical launch interceptors Secret Projects of the Luftwaffe Volume 1 Jet Fighters 1939 1945 by Dan Sharp based on original research using German wartime documents offers the most complete and authoritative account yet of these fascinating designs through previously unseen photographs illustrations and period documentation from archives around the world

Modelling Luftwaffe Jets and Wonder Weapons Brett Green,2012-11-20 While the Allies largely relied on mass production to help them win World War II Germany put a great deal of their limited resources into new technologies and wonder weapons In addition to these tangible assets which were used with varying degrees of success the drawing boards of Germany were littered with dozens of advanced designs that never reached the prototype or production stages Many of these operational and paper projects advanced the pace and influenced the direction of aircraft development in the decades following World War II with many of the German engineers responsible for these innovations seamlessly continuing their roles in the United States and the USSR Modellers have had a long fascination for the Luftwaffe's jet arsenal and secret weapons of fact and fiction and this new Osprey Masterclass will explore the Luftwaffe jets and rocket planes that saw service at the end of World War II

Conversations With: Reimar Horten-Volume 1 David Myhra, PhD., In the winter of 1982 the author Dr David Myhra boarded an evening flight to Cordoba Argentina to interview one the most forward thinking and original aircraft designers in German aviation Upon arriving Dr Myhra retrieved his bags containing a cassette recorder

and 100 2 hour cassettes among his personal effects and exited the terminal After a short time a white half ton short bed Ford pick up pulled up Inside was Reimar Horten Reimar was one of the 2 people Dr Myhra has met that has the gift of total recall Contained in these pages are direct transcripts of the conversations shared by Dr Myhra and Reimar Horten close to 400 pages Volume 4 contains an exclusive sneak preview of the next ebook by David Myhra The Day the Horten Ho 229 Jumo 004B Powered All Wing Project Died

VC10: Icon of the Skies Lance Cole,2017-03-30 An excellent account of the political battles and the commercial skulduggery and its outstanding service as a transport and tanker with the RAF Firetrench The VC10 was the nation s biggest jet airliner of its age and regarded as the world s best looking airliner It was safe fast and designed to take off from short runways in Africa and Asia at the request of its main operator BOAC the airline that would later go on to become today s British Airways The VC10 and the larger Super VC10 were beloved by pilots and passengers alike and became icons of the 1960s They were hugely popular all over the world Yet the VC10 was eclipsed by Boeing s 707 which sold by the hundreds despite the fact that the 707 was less capable and could not initially operate from the runways of the Commonwealth and old British Empire routes as the VC10 undoubtedly could This book blends the story of VC10 development with a well researched tale of corporate and political power play It asks just what lay behind the sales failure of the VC10 Politics played an important part of course as did BOACs tactics and a whodunnit cast of politico corporate events and machinations at the highest level of society during the dying days of Empire in 1960s Britain Key players in the story from Tony Benn to famous test pilot Brian Trubshaw Concorde are cited and quoted By exploring this historical period in depth and highlighting all the various impediments that stood in the way of success for the VC10 Lance Cole adds an important layer to our understanding of twentieth century history

Antarctica and the Secret Space Program David Childress,2020-05-20 David Childress popular author and star of the History Channel show Ancient Aliens brings us the incredible tale of Nazi submarines and secret weapons in Antarctica and elsewhere He looks into the strange life and death of Rudolf Hess as well as the mystery of James Forrestal and the secret group called MJ 12 He examines Operation Highjump led by Admiral Richard Byrd in 1947 and the battle that he apparently had in Antarctica with flying saucers Through Operation Paperclip the Nazis infiltrated aerospace companies banking media and the US government including NASA and the CIA after WWII He reveals that the Nazis had built secret bases in a variety of places during WWII including Greenland the Canary Islands Tibet and Antarctica Childress discusses the secret U boat fleet that patrolled the Atlantic and Antarctic Oceans for decades after the war He looks into the secret German space program and its flying disks and tubular aircraft the secret technology involved including anti gravity propulsion technology underground and under ice bases strange things happening in South America and secret bases on the Moon and Mars Childress looks at the possible merger of Nazi assets in Antarctic with the Americans and the use of Antarctica as a space base for traffic to secret space stations in orbit and below the surface of the Moon The author looks at military space programs such as Solar Warden Lunex and Project Horizon Does the US Space Force have a secret

space program that maintains huge ships in orbit around the Earth and employs hundreds of astronauts as crew for these vehicles Includes a 16 page color section The Third Reich 1919-1939 Andrew Rawson,2016-09-14 The rise of Hitler's Nazi Party is one of the defining phenomena of the twentieth century The manner in which National Socialist ideologies took over life in Germany is difficult to comprehend over 75 years later This fully illustrated book is a single volume encyclopedia on all aspects of this period in modern history It starts with a shattered post war Germany and charts the violent political tactics used by the Nazis to seize political control in 1933 The subsequent consolidation of power and brutal suppression of opponents followed as they took over all areas of society introducing a new festival calendar to celebrate their takeover The various military political and youth organisations are considered the Nazis warped methods for maintaining law and order and their use of the press and propaganda to control the people and introduce their racial ideals Chapters also cover art culture education the economy resistance the leaders themselves and more Luftwaffe Dan Sharp (Journalist),2019

Hitler's Miracle Weapons: The Luftwaffe and Kriegsmarine Friedrich Georg,2003 How close did Hitler come to his dream of developing nuclear weapons What evidence is there for the design testing and production of such weapons and their carrier systems With this first volume in a series of at least three Friedrich Georg has begun to answer these questions in great detail The result is a groundbreaking new book on this topic This first volume describes the efforts of the Luftwaffe and Kriegsmarine to design and produce carrier systems for the nuclear weapons the scientists of the Third Reich were developing Following an introductory section in which the author outlines the Nazi atom bomb programme Georg then investigates the enormous variety of craft the Luftwaffe began to either adapt or develop anew that would be used to carry such weapons of mass destruction These included the search for an intercontinental Amerikabomber including the innovative Horten Ho XVIII Lighter designs such as the Arado Ar E 555 Messerschmitt P 1107 1108 and Junkers EF 132 140 are also described The various atom bombs themselves are thoroughly investigated from the 1 ton to the massive 30 ton variety Information about the variety of carrier systems being developed and in at least one case actually built by the Kriegsmarine is also provided Finally the author investigates the reasons why Germany ultimately failed to produce the atom bomb Appendices provide the most up to date research on a variety of topics including the small number of craft Japan was developing to carry atom bombs and the Soviet capture of German nuclear research centres in the Baltic region at the end of the war Throughout the author is keen to only rely on the most reliable sources and lays many myths to rest in the process The result is a truly compelling and groundbreaking work **German Secret Weapons of World War II** Ian V. Hogg,2016-04-12 Hitler's regime was notorious for its many experiments and its various secret ploys weapons and technological developments But typically the term secret German weapons only turns up images of the V 1 and V 2 missiles that played a part in bombing London in 1944 But truth be told there were many more unheard of weapons behind the Third Reich Many of these weapons have been unknown to the general public Here Ian V Hogg one of the world's leading experts

on weaponry reveals the sheer magnitude of Hitler's secret weapon projects from the V 3 and the V 4 missiles to the Schmetterling to the German nuclear bomb to the question of nuclear war and more. This detailed account of the myths surrounding secret German weapons examines the various fields the Germans concentrated on during their weapon development process and discusses difficulties that arrived in the process and how in many cases the ideas were exploited by other nations. *German Secret Weapons of the Second World War* draws comparisons between similar Allied projects and narrates the deeper purpose behind many of these projects. Many of these developments were not completed before the end of the war but have created a solid foundation for many of today's great military developments. HAUNEBU: THE SECRET FILES David Childress, 2020-01-01 David Childress popular author and star of the History Channel show *Ancient Aliens* brings us the incredible tale of the German flying disk known as the Haunebu. Although rumors of German flying disks have been around since the late years of WWII it was not until 1989 when a German researcher named Ralf Ettl living in London received an anonymous packet of photographs and documents concerning the planning and development of at least three types of unusual craft which we would classify today as UFOs or flying saucers. Ettl went on to make several television documentaries based on the material in the packet and released most of the documents and photos to researchers in Austria and other parts of Europe. What the Ralf Ettl document dump shows us is what many have suspected for a long time that WWII did not end in the manner in which we have been told and a remnant of the Nazi military particularly the SS continued to operate flying saucers and submarines around the world in the decades after the end of the war. This activity involving a flying saucer known as the Haunebu was particularly notable in South America but it ultimately involved all the continents of the world including Antarctica. Join Childress as he shows us the secret files involving the Haunebu the Vril craft the Andromeda craft and others. Includes a 16 page color section. Over 120 photographs and diagrams

German Secret Weapons of the Second World War Ian V. Hogg, 2020-01-24 A comprehensive highly detailed study that displays a stunning wealth of technical knowledge a brisk and understandable narrative. HistoryNet The phrase German secret weapons immediately conjures up images of the V 1 and V 2 missiles that bombarded London in 1944. But what of the V 3 and V 4 What of Schmetterling the Rochling shell the Kurt bomb the Hs293. These and many other devices were all part of the German secret armory but are relatively unknown except to a handful of

specialists What of the German nuclear bomb And the question of chemical warfare The sheer magnitude of the secret weapon projects of the Third Reich is revealed in this comprehensive study written by one of the world's great experts on weaponry The book explores the various fields in which the Germans concentrated their weapon development and discusses the multiplicity of ideas the difficulties and in several cases how these ideas were subsequently exploited by the victors Although much of the German wartime development was not completed before the war's end it nevertheless provided a foundation for a great deal of the munitions development that has since taken place Comparisons with Allied projects are also drawn This book explodes some of the myths surrounding Hitler's secret weapons to reveal a truth all the stranger for being fact Includes photographs and line drawings
