Teaching and Learning Japanese Martial Arts Vol. 1: Scholarly Perspectives Michael DeMarco, 2017-03-05 In contrast to the overabundance of writings about martial arts that are often promotional and misinformative there are rare works by scholars that are praiseworthy for their sincere unbiased approach to writing This is the very definition of scholarly This two volume anthology brings together the best scholarly works published in the *Journal of Asian Martial Arts* on the topic of teaching and learning Japanese martial arts In this volume you ll find ten chapters that dive deep into Japanese martial traditions combining aspects of history and culture that explain how teaching methods developed and evolved Dr Harrison Pepper s chapter sets the tone with a focus on the fundamental student teacher relationship that is responsible for the transmission of any art She uses sociological and performance studies to analyze the martial art s maturing process

Understanding the teacher student relationship is vital for all involved Japanese combative arts Since Japan was ruled by a warrior class for nearly 700 years it is necessary to understand the method by which warriors were educated through the ryuha system Nyle Monday s chapter presents this system Dr Lewis Hershey explores the way in which a martial art can serve as a vehicle for non discursive intercultural exchange in the teaching process His chapter provides a discussion of the importance of embodying the feeling or aesthetic of a particular system as a way of knowing and understanding martial techniques The next three chapters were originally prepared for a meeting of the Association for Asian Studies Dr Paul Varley states that most who have written about martial arts practice are not trained scholars and their writings vary greatly in quality He discusses the state of writing in this field and introduces the other authors Dr Cameron Hurst discusses the characteristics of the martial arts that place them squarely into the category of artistic ways along with such familiar arts as Noh the tea ceremony and flower arranging This reflects the family headship system of instruction to carry on the school s traditions Dr Karl Friday defines the term ryuha as branch of the current representing the onward flow of a stream of thought the branches betoken the splitting off that occurs as insights are passed from master to students generation after generation His chapter shows how ryuha exist to hand on knowledge with pattern practice kata being the core of transmission Is it warrior s individualism that is prized in modern conformity ridden Japanese culture or is this an erroneous interpretation of the idealized warrior image by Westerners In the next chapter Dr Wayne VanHorne s research is persuading showing that the ultimate goal of the training is to foster individuals to contribute to the betterment of the collective society with social responsibility In the following chapter Dr John Donohue analyzes the organizational components of traditional martial arts training and relates them to modern pedagogical theories He concludes that the instructional theory embedded in martial arts training is at least as sophisticated and highly developed as are the techniques and philosophies of these systems In the next chapter he examines kata training as 1 a cultural activity that has been shaped by the structural characteristics of Japanese culture and kata training as 2 a highly structured and effective mechanism for imparting technical skill in the martial arts Kim Taylor provides the final chapter dealing with progressive instruction found in many kata based martial arts Using iaido sword drawing as an example he demonstrates how a set of practice can build one kata after the other from simple to more complex ideas and provide a deeper understanding of the entire set If you are interested in Japanese martial traditions you will find much in these ten chapters that clarify why the arts are taught according to a longstanding tradition and also why there have been evolutionary changes in the instructional methods There is sound logic for the old traditions as well as for the changes The scholarly research presented in this anthology will improve a teacher s way of instructing and help a student understand what to expect out of his or her studies

Developing Zeami Shelley Fenno Quinn, 2005-07-31 The great noh actor theorist and

playwright Zeami Motokiyo ca 1363 1443 is one of the major figures of world drama His critical treatises have attracted international attention ever since their publication in the early 1900s His corpus of work and ideas continues to offer a wealth of insights on issues ranging from the nature of dramatic illusion and audience interest to tactics for composing successful plays to issues of somaticity and bodily training Shelley Fenno Quinn s impressive interpretive examination of Zeami s treatises addresses all of these areas as it outlines the development of the playwright s ideas on how best to cultivate attunement between performer and audience Quinn begins by tracing Zeami s transformation of the largely mimetic stage art of his father s troupe into a theater of poiesis in which the playwright and actors aim for performances wherein dance and chant are re keyed to the evocative power of literary memory Synthesizing this remembered language of stories poems phrases and their prosodies and associated auras with the flow of dance and chant led to the creation of a dramatic prototype that engaged and depended on the audience as never before Later chapters examine a performance configuration created by Zeami the *nikyoku santai* as articulated in his mature theories on the training of the performer Drawing on possible reference points from Buddhist and Daoist thought the author argues that Zeami came to treat the *nikyoku santai* as a set of guidelines for bracketing the subjectivity of the novice actor thereby allowing the actor to reach a certain skill level or threshold from which his freedom as an artist might begin

Legacies of the Sword Karl F. Friday, Seki Humitake, 1997-07-01 Western scholars and educators are generally far less familiar with the samurai in his original and ostensibly primary role as warrior and masters of arms than in his other functions as landowner feudal lord literature or philosopher Yet any attempt to comprehend fully the samurai without considering his military abilities and training *bugei* is futile With verve and wit Karl Friday combines the results of nearly two decades of fieldwork and archival research to examine samurai martial culture from a broad perspective as a historical phenomenon as a worldview and as a system of

Rethinking Aesthetics Ritu Bhatt, 2013 Rethinking Aesthetics is the first book to bring together prominent voices in the fields of architecture philosophy aesthetics and cognitive sciences to radically rethink the relationship between body and design These essays argue that aesthetic experiences can be nurtured at any moment in everyday life thanks to recent discoveries by researchers in neuroscience phenomenology somatics and analytic philosophy of the mind who have made the correlations between aesthetic cognition the human body and everyday life much clearer The essays by Yuriko Saito Juhani Pallasmaa and Richard Shusterman among others range from an integrated mind body approach to chair design to Zen Buddhist notions of mindfulness to theoretical accounts of existential relationships with buildings to present a full spectrum of possible inquiries By placing the body in the center of design Rethinking Aesthetics opens new directions for rethinking the limits of both essentialism and skepticism

Noetics Without a Mind Stavros Kousoulas, Andrej Radman, Heidi Sohn, 2024-11-11 Addressing the intricate socio techno environmental dimension of noesis within the current climate of social and urban challenges necessitates a transdisciplinary approach In pursuit of this objective NWM incorporates contributions that delve into sense making processes involved in the individuation of humans technologies and their affective environments These contributions offer diverse perspectives that critically examine the production of sense and its heterogeneous potentials for transindividuation Key questions include What transductive relations emerge in the entanglements between technology affects and the production of our offloaded memories and desires How do these relations shape the sensible apprehension of our lives and the lives of our milieus In

what ways can they be expressed beyond the conventional Western ocularcentric and annotational fixations of generic sciences What new senses are required to navigate the complexity of the present And collectively and technologically how do we sense the effects of our actions Drawing inspiration from Gregory Bateson how can we cultivate a different sensory perspective to foster a transformative mode of thinking NWM provides a platform for thinkers who boldly traverse disciplinary boundaries encompassing a diverse range of fields These include but are not limited to affect and affordance theories architecture art and cultural studies philosophy and philosophy of technology digital media studies feminist theories film theory social sciences and literature *The Oxford Handbook of Ethics and Art* James Harold, 2023 Art has not always had the same salience in philosophical discussions of ethics that many other elements of our lives have There are well defined areas of applied ethics corresponding to nature business health care war punishment animals and more but there is no recognized research program in applied ethics of the arts or art ethics Art often seems to belong to its own sphere of value separate from morality The first questions we ask about art are usually not about its moral rightness or virtue but about its beauty or originality However it is impossible to do any serious thinking about the arts without engaging in ethical questions Themes in the History of Japanese Garden Art Wybe Kuitert, 2002-01-01 Revised and updated Themes in the History of Japanese Garden Art presents new interpretations of the evolution of Japanese garden art Its depth and much needed emphasis on a practical context for garden creation will appeal to art and literary historians as well as scholars students and appreciators of garden and landscape art Asian and Western BOOK JACKET **Allegories of Desire** Susan Blakely Klein, 2020-10-26 One of the more intriguing developments within medieval Japanese literature is the incorporation into the teaching of waka poetry of the practices of initiation ceremonies and secret transmissions found in esoteric Buddhism The main figure in this development was the obscure thirteenth century poet Fujiwara Tameaki grandson of the famous poet Fujiwara Teika and a priest in a tantric Buddhist sect Tameaki's commentaries and teachings transformed secular texts such as the Tales of Ise and poetry anthologies such as the Kokin waka shu into complex allegories of Buddhist enlightenment These commentaries were transmitted to his students during elaborate initiation ceremonies In later periods Tameaki's specific ideas fell out of vogue but the habit of interpreting poetry allegorically continued This book examines the contents of these commentaries as well as the qualities of the texts they addressed that lent themselves to an allegorical interpretation the political economic and religious developments of the Kamakura period that encouraged the development of this method of interpretation and the possible motives of the participants in this school of interpretation Through analyses of six esoteric commentaries Susan Blakeley Klein presents examples of this interpretive method and discusses its influence on subsequent texts both elite and popular **Spaces Speak, Are You Listening?** Barry Blesser, Linda-Ruth Salter, 2009-09-18 How we experience space by listening the concepts of aural architecture with examples ranging from Gothic cathedrals to surround sound home theater We experience spaces not only by seeing but also by listening We can navigate a room in the

dark and hear the emptiness of a house without furniture Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony The unique acoustics of religious spaces acquire symbolic meaning Social relationships are strongly influenced by the way that space changes sound In *Spaces Speak Are You Listening* Barry Blesser and Linda Ruth Salter examine auditory spatial awareness experiencing space by attentive listening Every environment has an aural architecture The audible attributes of physical space have always contributed to the fabric of human culture as demonstrated by prehistoric multimedia cave paintings classical Greek open air theaters Gothic cathedrals acoustic geography of French villages modern music reproduction and virtual spaces in home theaters Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space Some listeners can learn to see objects with their ears but even without training we can all hear spatial geometry such as an open door or low ceiling Integrating contributions from a wide range of disciplines including architecture music acoustics evolution anthropology cognitive psychology audio engineering and many others *Spaces Speak Are You Listening* establishes the concepts and language of aural architecture These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well being Aural architecture is not the exclusive domain of specialists Accidentally or intentionally we all function as aural architects
