Compass of Society Henry C. Clark,2007-01-01 *Compass of Society* rethinks the French route to a conception of commercial society in the seventeenth and eighteenth centuries Henry C Clark finds that the development of market liberalism far from being a narrow and abstract ideological episode was part of a broad gauged attempt to address a number of perceived problems generic to Europe and particular to France during this period In the end he offers a neo Tocquevillian account of a topic which Tocqueville himself notoriously underemphasized namely the emergence of elements of a modern economy in eighteenth century France and the place this development had in explaining the failure of the Old Regime and the onset of the Revolution *Compass of Society* will aid in understanding the conflicted French engagement with liberalism even up to the twenty first century

Through Strangers' Eyes Sylvie Romanowski,2005 Considering the stranger as a figure of ambiguity Sylvie Romanowski explains why the genre was so useful to the Enlightenment The question of why showing ambiguous strangers is important in that period is addressed in the book s introduction by setting the Enlightenment in the historical context of the seventeenth century Romanowski then examines Montaigne s *Des Cannibales* showing how these first outsiders relate to their eighteenth century successors She next considers Montesquieu s *Lettres persanes* in its entirety studying the voices of the men the women and the eunuchs She also studies other examples of the genre Jacket

The Spirit of Montesquieu's Persian Letters Constantine Christos Vassiliou,Jeffrey Church,Alin Fumurescu,2023-05-08 This book s primary purpose is to commemorate the 300th anniversary of Montesquieu s *Persian Letters* a seminal book in

classical liberal thought *Persian Letters* is a delightfully rich sympathetic satire of commercial society's promise and discontents covering a wide range of issues and themes that shaped the direction of liberal modernity. It consists of a series of letters largely written by two Persian travelers to Paris who allow modern readers to view Parisian life from the perspective of an outsider. The volume includes contributions from prominent scholars of Montesquieu's and early career scholars who have recently unearthed new and exciting avenues for understanding this important hinge figure in modern political thought.

Freedom in French Enlightenment Thought Mary Efrosini Gregory, 2010. *Freedom in French Enlightenment Thought* examines how five eighteenth century French theorists Montesquieu, Diderot, Rousseau, Voltaire and Condorcet kindled the flame of freedom in America and France. Each thinker laid down a building block that would eventually inspire the language in constitutions around the world. They held that citizens have certain inalienable rights that are dictated by natural law and endowed to all by our Creator; that these rights include equality before the law, justice, safety and security of persons and property and freedom of speech, press, assembly and religion. Montesquieu recommended three separate branches of government that function independently of each other. Diderot held that there is no true sovereign except the nation; that there is no true legislator except the people. Rousseau advised that the individual will must be subordinate to the general will and private interest to that of the community; he warned against legislators who act from their own financial interests and enact laws to aggrandize themselves. Voltaire believed that selfishness, greed and the desire for luxury are not only part of human nature but that they compel people to achieve trade with others; search, explore and invent; the passions are the engine that makes capitalism run and that stimulate all human endeavor. Condorcet, a champion of civil rights, boldly proclaimed equality for women, blacks and the poor. The philosophes held that free and universal public education will permit more citizens to participate in the progress of the arts and sciences and will improve the standard of living among all strata of society. An unrestrained press permits citizens to make informed decisions. Their polemics have indeed changed the face of the world.

Journeys to the Other Shore Euben, 2007-09

Journeys to the Other Shore Roxanne L. Euben, 2008-07-01 The contemporary world is increasingly defined by dizzying flows of people and ideas But while Western travel is associated with a pioneering spirit of discovery the dominant image of Muslim mobility is the jihadi who travels not to learn but to destroy *Journeys to the Other Shore* challenges these stereotypes by charting the common ways in which Muslim and Western travelers negotiate the dislocation of travel to unfamiliar and strange worlds In Roxanne Euben's groundbreaking excursion across cultures geography history genre and genders travel signifies not only a physical movement across lands and cultures but also an imaginative journey in which wonder about those who live differently makes it possible to see the world differently In the book we meet not only Herodotus but also Ibn Battuta the fourteenth century Moroccan traveler Tocqueville's journeys are set against a five year sojourn in nineteenth century Paris by the Egyptian writer and translator Rifa'a Rafi al-Tahtawi and Montesquieu's novel *Persian Letters* meets with the memoir of an East African princess Sayyida Salme This extraordinary book shows that curiosity about the unknown the quest to understand foreign cultures critical distance from one's own world and the desire to remake the foreign into the familiar are not the monopoly of any single civilization or epoch Euben demonstrates that the fluidity of identities cultures and borders associated with our postcolonial globalized world has a long history one shaped not only by Western power but also by an Islamic ethos of travel in search of knowledge

Foreign Bodies Madeleine Dobie, 2001 Building on the critical foundations established by Edward Said in *Orientalism* *Foreign Bodies* examines the relationship between the Orientalist tradition in French art and literature and France's colonial history It focuses on a central dimension of this exchange the prevalent figure of the oriental woman and the interplay of race and gender in both domestic and colonial history It also offers a genealogy of contemporary French attitudes to Islamic culture in which beliefs about sexuality and gender relations continue to occupy a privileged place The author examines the extent to which the rhetorical status and political implications of Orientalism register the changing circumstances of French colonial activity tracing the convergence or divergence of colonial practice and the literary record She also argues against the tendency in both historical and theoretical writing on colonialism to divide center from margins metropolitan from colonial Instead she shows how colonial products and ideas permeated the

domestic culture and shaped its evolution Finally the book proposes that the feminine figures of Orientalist texts are often interwoven with representations of language and more specifically with representations of language as an alien and resistant code something other than the transparent medium of ideas It suggests that in promoting awareness that language is not simply the neutral medium of thought and experience these veiled figures of language function as foreign bodies creating disruptive effects within an economy orchestrated toward the production of knowledge of the other However the book also argues against the view espoused by certain critics that the self reflexivity of Orientalist writing fully counteracts its polarizing political effects arguing instead for a process of double reading that acknowledges both the geopolitical power encoded within Orientalist representation and the ways in which specific texts resist this power Bitcoin: A
