Han Dynasty , *The History of China* , [London and the Making of Provincial Literature](#) Joseph Rezek,2015-08-28 In the early nineteenth century London publishers dominated the transatlantic book trade No one felt this more keenly than authors from Ireland Scotland and the United States who struggled to establish their own national literary traditions while publishing in the English metropolis Authors such as Maria Edgeworth Sydney Owenson Walter Scott Washington Irving and James Fenimore Cooper devised a range of strategies to transcend the national rivalries of the literary field By writing prefaces and footnotes addressed to a foreign audience revising texts specifically for London markets and celebrating national particularity provincial authors appealed to English readers with idealistic stories of cross cultural communion From within the messy and uneven marketplace for books Joseph Rezek argues provincial authors sought to exalt and purify literary exchange In so doing they helped shape the Romantic era belief that literature inhabits an autonomous sphere in society London and the Making of Provincial Literature tells an ambitious story about the mutual entanglement of the history of books and the history of aesthetics in the first three decades of the nineteenth century Situated between local literary

scenes and a distant cultural capital enterprising provincial authors and publishers worked to maximize success in London and to burnish their reputations and build their industry at home Examining the production of books and the circulation of material texts between London and the provincial centers of Dublin Edinburgh and Philadelphia Rezek claims that the publishing vortex of London inspired a dynamic array of economic and aesthetic practices that shaped an era in literary history

Boys of the Cloth Vincent J. Miles, 2012-10-02 Drawing on the author's unusual background as a seminarian turned scientist and business executive *Boys of the Cloth* presents a unique analysis of the sexual abuse crisis in the Catholic Church The book combines a first hand account of seminary life during the 1960s a period that turns out to be crucial for understanding the crisis with explorations of the history of the seminary system current scientific knowledge about abusive behavior and the Church's own investigations into the epidemic of abuse by its priests Through the interplay between these topics two paradoxical conclusions emerge First that the epidemic was caused by an ancient reform intended to eradicate rather than encourage clerical corruption Second that it was reversed by modern Church policies with no obvious connection to sexual abuse *Boys of the Cloth* will transform your understanding of predatory behavior by priests and of measures that will be crucial to prevent it
