Legal Secrets Kim Lane Scheppelle, 1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppelle answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppelle also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality

American Secrets José Liste-Noya, Eduardo Barros-Grela, 2011-09-16 Predicated upon the principles of political freedom cultural openness religious tolerance individual self reliance and ethnic diversity the United States of America has been tempted recurrently by the lures of the secret *American Secrets* explores this political historical and cultural phenomenon from many often surprisingly overlapping angles in these analyses of the literary and cultural uses and abuses of secrecy within a democratic culture Through analyses of diverse literary works and cultural manifestations from Mark Twain's anti imperialist prophecies to 9 11 conspiracy theories from the traumas of the Vietnam war to the homophobia of the American military establishment from the unresolved dilemmas of nuclear politics to the secret ecologies shunted aside by the exploitation of the environment from the questionings of national identity on the ethnic and trans sexual margins to the confessional modes of poetry and the poetics of the unspeakable and unrepresentable these essays reveal the politics within the poetics and indissociably the poetics fueling the politics of secrecy in its ambivalent deployment Secrecy often seems to be a question without an answer or an answer that either seems to beg the question or to be a question itself These essays address this paradox with their own questioning explorations In answering such questions the volume as a whole provides an illuminating overview of the pervasiveness of the secret and its modalities in American culture while also dealing specifically with the poetics of the secret in its various historically recurrent literary manifestations
