airframe, alongside the II-f with which it shared its powerplant. The design's intention by the RLM was the small single-motors, but after some

formal testing, Loeblich concluded that Piesch would only require fuel and, ultimately, more space. Thus, the DFB 100, its successor, acquired a single, centre fin and nozzles. Using as its fuel 11.5-lit (per 10 per cent aqueous solution of hydrogen peroxide plus oxygenine as a stabiliser) and 2-lit (per aqueous solution of sodium and

potassium permanganate) to promote decomposition), the Walter R 1000 motor was to propel the prototype at speeds of up to 1000km/h (610mph). It was clear from the outset that this was a major achievement and Loeblich was ordered to Messerschmitt's Augsburg research centre with his research and development team in January 1935.

Thus the DFB 100 metamorphosed into the Messerschmitt Me 163 'Komet'.

The Me 163 'Komet'

The 'Kommet', which provided the projected Me 163 was similar to a little over two months, was a radical and adventurous approach to the problem of how to defeat the heavily armed and protected bomber aircraft which were flown in formations designed to create an impenetrable defence line. Its designation, all of them were decided by the RLM, is somewhat misleading. As Messerschmitt AG actually had little to do with its development, which remained in the hands of its creator. In the spring of 1931, the prototype of the new aircraft began gliding tests, flown to a height of 30,000 ft (9,144m). It was soon achieving speeds of up to 1000km/h (610mph) while showing a high degree of controllability, and during the summer it was sent to the rocket development establishment at Peenemünde where on the Baltic coast, to be fitted with a rocket motor – an improved model of the Walter R1 incorporating a degree of thrust control but retaining 11.5-lit and 2-lit as its fuel.

The development programme at Peenemünde was fraught with accidents, some fatal, as time after time the volatile fuels spontaneously exploded. On one occasion, an entire building was demolished; moreover, it also resulted in the Me 163 V1 breaking the world speed record repeatedly until the test pilot, Hans Ottmar, finally exceeded 1000km/h (610mph), almost being killed in the process when the aircraft became suddenly uncontrollable as compression shock waves caused by airflow over the wing surface locally exceeding the speed of sound induced negative lift and massive vibration. In the event, Ottmar managed to regain control and land successfully. The RLM impressed, ordered prototypes of an operational aircraft, the Me 163, to be armed with a

pair of MG 151 20mm (0.8in) cannon and powered by a more powerful R100-A2 rocket motor using the compressed-but-uncondensable combination of 11.5-lit and 2-lit (20 per cent hydrogen hydride, 87 per cent methane, 11 per cent water as its fuel and producing 1000kg (2200lb) of thrust. Around 2,000 tonnes (2 tons) of propellant very nearly had the entire weight of the aircraft was enough to take it to its operational ceiling of 13,100m (43,000ft) in 1.35 minutes, and the pilot then had a further four and a half minutes of powered flight available; thus, he would actually have been gliding, unpowered, during most of his mission.

Two Me 163s had been handed over to a special Luftwaffe unit early in 1942 to allow pilot formation to begin, though it was long before training actually commenced. The high landing speed of the 'Kommet' (around 200km/h (120mph) combined with the fact that the pilot was committed to a slow turn, leaving no power available to slow him to regain height for a second attempt, resulted in many accidents, most of them fatal. The first operational unit, equipped with Me 163s, was armed, with a pair of 20mm (0.787 in) cannon in the wing roots and a considerable degree of armour protection for the pilot, began forming at Wehrmacht in May 1943, and the first went into action as a DFB 100 on 10 August. It proved to be a success some days later, when Luftwaffe fighter had downed a B-17 near Leipzig. In all, some 200 Me 163s in various versions were constructed and eight by 6 week old to Japan, where the powered and over 50 powered versions were built before the war's end, but the aircraft was only a very limited success, according to its followers. For little more than 10 American B-17s. An improved version, known originally as the Ju 163, was produced at Jukos and then taken over by Messerschmitt as the Me 263. It was somewhat larger, had a wheel undercarriage rather than skids, and was

powered by a Walter R100 motor. It was produced in prototype form only.

The Selbstvernichtungsflieger

In fact, like the Me 163, the 'Kommet' was too little, too late. Its development was the subject of a campaign by the summer of 1941 that individual fighter pilots had been to Germany. After bombing, and until such as the R100 and R1000 were formed as a single group (which proved that as an accepted Me 163 tactic using the R100 aircraft that with tactical aircraft. They had a measure of success between 1 July 1941 and the end of March 1942, when they ceased to operate. They accounted for around 100 Allied bombers, but only 10 of them by winning. In April 1943, Selbstvernichtungsflieger was named from volunteers, they trained for 10 days in training tactics, and then went into action. In all, they trained and downed eight, but at a high cost in themselves, a total of 11 of 100s and 100s. It was potentially self-sacrificial Selbstvernichtungsflieger was to be employed, then clearly a much less sophisticated aircraft, using the in the way of strategic resources, could be employed instead of some of the best pilot-trained fighters of the entire period.

At the point we need to take a very short detour to consider the nature of Selbstvernichtungsflieger. It was never the stated intention to require it even as a means to control suicide in Germany in the way that it was in Japan, and great pains were taken to maintain that the very device was actually the case. The Selbstvernichtungsflieger were expected only to employ their aircraft as weapons in the last resort (though medals to the Sturmgeschütz were required to see in both that they would indeed do this if necessary), and to make every effort to ensure that the attack off them with the possibility of escape. As all of the initial effort (including the R1000) 100s,

Hitler's Secret War Charles Whiting, 2021-09-23 In the shadows was another war An unputdownable account of the Nazi spy operation and how it ultimately failed During the Second World War there was behind the scenes a bitter conflict was stamped Top Secret It was a war of infiltration and misdirection espionage and assassination And the Nazis were determined not to let anyone best them Revealing the full extent of Nazi's secret intelligence networks bestselling author Charles Whiting takes the reader into organisations like the Abwehr Germany's renowned military intelligence bureau and features interviews with key figures like such key figures as Giskes who fooled the Americans at the Battle of the Bulge and Ritter who stole the highly classified US Norden bombsights There are accounts of hubris heroism and cowardice stunning triumphs and excruciating defeats all out of the public eye and revealed only decades later Over a period of thirty years Whiting met and interviewed a huge number of Nazi and Allied survivors involved in what came to be known as The War in the Shadows The result is an extraordinary and gripping story combining great cunning with staggering incompetence Perfect for readers of Ben Macintyre and Max Hastings Hitler's Secret War outdoes the best spy novel and demonstrates yet again that fiction cannot rival history **The Secret War for the Middle East** Youssef Aboul-Enein, 2013-10-15 It can be argued that the Middle East during the World War II has been regarded as that conflict's most overlooked theater of operations Though the threat of direct Axis invasion never materialized beyond the Egyptian Western Desert with Rommel's Afrika Korps this did not limit the Axis from probing the Middle East and cultivating potential collaborators and sympathizers

These actions left an indelible mark in the socio political evolution of the modern states of the Middle East This book explores the infusion of the political language of anti Semitism nationalism fascism and Marxism that were among the ideological byproducts of Axis and Allied intervention in the Arab world The status of British dominated Middle East was tailor made for exploitation by Axis intelligence and propaganda German and Italian intelligence efforts fueled anti British resentments their influence shaped the course of Arab nationalist sentiments throughout the Middle East A relevant parallel to the pan Arab cause was Hitler s attempt to bring ethnic Germans into the fold of a greater German state In theory as the Sudeten German stood on par with the Carpathian German so too according to doctrinal theory did the Yemeni stand in union with the Syrian in the imagination of those espousing pan Arabism As historic evidence demonstrates this very commonality proved to be a major factor in the development of relations between Arab and Fascist leaders The Arab nationalist movement amounted to nothing more than a shapeless fragmented counter position to British imperialism imported to the Arab East via Berlin for Nazi aspirations

America's Secret War against Bolshevism David S. Foglesong, 2014-02-01 From the Russian revolutions of 1917 to the end of the Civil War in 1920 Woodrow Wilson's administration sought to oppose the Bolsheviks in a variety of covert ways Drawing on previously unavailable American and Russian archival material David Foglesong chronicles both sides of this secret war and reveals a new dimension to the first years of the U S Soviet rivalry Foglesong explores the evolution of Wilson's ambivalent attitudes toward socialism and revolution before 1917 and analyzes the social and cultural origins of American anti Bolshevism Constrained by his espousal of the principle of self determination by idealistic public sentiment and by congressional restrictions Wilson had to rely on secretive methods to affect the course of the Russian Civil War The administration provided covert financial and military aid to anti Bolshevik forces established clandestine spy networks concealed the purposes of limited military expeditions to northern Russia and Siberia and delivered ostensibly humanitarian assistance to soldiers fighting to overthrow the Soviet government In turn the Soviets developed and secretly funded a propaganda campaign in the United States designed to mobilize public opposition to anti Bolshevik activity promote American Soviet economic ties and win diplomatic recognition from Washington *Serbia's Secret War* Philip J. Cohen, 1996

An entire piece of Serbian history is missing And in the middle of the latest Yugoslav war Europe's worst blood bath since World War II Serbian politicians propagandists and revisionist historians have made a cynical attempt at replacing the missing piece by rewriting the Holocaust record They claim that Serbs were not Nazi collaborators in genocide but purely victims of the same atrocities that befell the Jews and that Serbian aspirations for a Greater Serbia are not driven by a murderous nationalistic hatred but rather are propelled by a victim's desire to lay claim to a safe homeland a Serbian

Promised Land Thus has the current spilling of blood been justified Philip J Cohen argues that the existence of such a propaganda campaign emanating from Belgrade began in the earliest days of the post World War II era and since then has been reflected in the world media as well as in popular commentary and scholarly analysis More astonishing is that this campaign has been widely successful particularly in Israel Remarkable for its broad portrayal and penetrating examination of the Yugoslav social and political experience Serbia's Secret War draws heavily on documents that have been previously unavailable to the West Some of the written record has been translated and is published here for the first time Destined to be regarded as an important contribution to the field Cohen's careful study of the Serbian role in the Second World War will dramatically alter how scholars policy makers and the general public view the bloodshed in the former Yugoslavia and how they will come to understand the reasons behind it
