Self And Simulacra:

Self and Simulacra Liz Waldner, 2001 From airy lyric to ornate lament couched in the Latinate language of Gray's Botany or the lushness of Sir Thomas Browne *Self and Simulacra* explores the motive force of longing in the growing of identity

Reading Simulacra M. W. Smith, 2001-09-06 Traces the ways in which our culture has increasingly become a culture of simulations and offers strategies for discerning meaning in a world where the difference between what is real and what is simulated has collapsed

The Modern Construction and Postmodern Deconstruction of Self Kire Sharlamanov, Mia Kostovska, 2025-02-21 This book aims to explain the self as understood decades ago and its evolution in the time of postmodernism Approaching it primarily from a sociological perspective while incorporating insights from psychology and philosophy it portrays the modern self as a unitary coherent unified subject created in the time of modernity which during postmodernism has evolved into a fluid decentralized and fragmented subject with increasingly independent multiple identities The creation of the modern self has been influenced by individualization rationalization and power Each factor is explored in a separate chapter detailing its impact on the development of the modern Cartesian self The authors draw on the theories of Goffman Bauman and Baudrillard to illustrate the changing nature of the self viewing it as a performer a fluid entity and a simulacrum While Goffman is not strictly a postmodern author his ideas foreshadow postmodernism particularly regarding the transformation of the self Bauman and Baudrillard as key figures in postmodern thought provide valuable insights into this transformation of the self in contemporary times The book uniquely connects two time periods in which the self evolves arguing that social factors influence its changing characteristics As these social factors shift over time so does the self Key aspects of the self and its evolution are examined through an original multidimensional approach that spans a longer time interval

Self-Organization and Society Takatoshi Imada, 2008-04-15 Self organization is a generic term describing the capacity of a system to change its own structure by itself while interacting with the environment In this sense self organization is not environment determined or environment adaptive but is self determined and self adaptive The concept of self organization was born in the 1960s and attempts were made to establish a theory based on the logic of a system and its control In contrast the 1980s introduced a view based on the logic of creative individuals and on fluctuations Antithetical differences exist between the two The former regards the system of aggregated individuals as the object of consideration where self organization is the sum of the practices of a

system led by control or self control in particular The latter focuses on the practices of individuals deviating from the logic of a system making the existing system fluctuate and transforming its structure This volume attempts to integrate these viewpoints through inquiry into the structure of the self and through self reflexion A new horizon thus opens for the synthesis of planning control action theory and spontaneous performative action theory *Freedom of the Self* Jeffrey F.

Keuss,2010-07-01 *Freedom of the Self* revitalizes the question of identity formation in a postmodern era through a deep reading of Christian life in relation to current trends seen in the Emergent and Missional church movements By relocating deep identity formation as formed and released through a renewed appraisal of kenotic Christology coupled with readings of Continental philosophy Derrida Levinas Marion and popular culture Keuss offers a bold vision for what it means to be truly human in contemporary society as what he calls the kenotic self In addition to providing a robust reflection of philosophical and theological understanding of identity formation from Aristotle and Augustine through to contemporary thinkers *Freedom of the Self* suggests some tangible steps for the individual and the church in regard to how everyday concerns such as economics literature and urbanization can be part of living into the life of the kenotic self **Alienation, Society, and the Individual**

R. Felix Geyer,Walter R. Heinz,1992-01-01 The concept of alienation is an umbrella concept that includes powerlessness meaninglessness social isolation cultural estrangement and self estrangement For researchers the study of alienation is a three fold task first understanding the discrepancy between individual values and actions and general living and working conditions second analyzing the overt and latent forms of oppression in social structures third accounting for social circumstances that hinder or facilitate individual or collective action against those alienating structures *Alienation Society and the Individual* provides a timely and broadly representative overview of the most recent developments in alienation research and theory *Alienation Society and the Individual* makes it clear that alienation research has come of age Further theoretical developments remain important and as demonstrated In this volume which revives theoretical debate so as to reformulate classical concepts in view of developments in modern society the concept of alienation is now increasingly applied to empirical research in a variety of fields Included here are theory driven evaluations of empirical research on migrant workers as well as comparative studies on differing liberation ideologies in South Africa This volume reflects the effects of political developments in Eastern Europe on Marxist alienation theory While Marxist theory remains important it is no longer directed exclusively toward criticism of capitalist society New applications include a critique of Eastern European state socialism analysis of consumer rather than capitalist society and uncommon examples of empirical research carried out within a Marxist framework The book concludes with a chapter that evaluates recent theoretical and methodological innovations and sets priorities for future research *Alienation Society and the Individual* offers an unusual combination of theory and practice that make it a state of the art volume It will be read by sociologists political scientists social psychologists philosophers and anthropologists **Fantasies of Self-Mourning** Ruben Borg,2019-01-07 In *Fantasies of*

Self Mourning Ruben Borg describes the formal features of a posthuman cyborgian imaginary at work in modernism The book's central claim is that modernism invents the posthuman as a way to think through the contradictions of its historical moment Borg develops a posthumanist critique of the concept of organic life based on comparative readings of Pirandello Woolf Beckett and Flann O'Brien alongside discussions of Alfred Hitchcock Chris Marker Bela Tarr Ridley Scott and Mamoru Oshii The argument draws together a cluster of modernist narratives that contemplate the separation of a cybernetic eye from a human body or call for a tearing up of the body understood as a discrete organic unit capable of synthesizing desire and sense perception

Jean Baudrillard Brian Gogan, 2017-11 This work is the first book length treatment of Jean Baudrillard as a rhetorical theorist

Macht Birgit Haas, 2005 *Roth and Celebrity* Aimee L. Co-opting Culture B. Garrick Harden, Robert Carley, 2009-01-01 Working from the idea that Sociology and Cultural Studies have developed distinct and valuable toolkits for understanding culture Harden and Carley have brought together a collection of essays that address the ways in which the cultures around race sex and gender are mediated through or intersect with politics society and economy

Critical Aesthetics and Postmodernism Paul Crowther,1996 In this monograph Paul Crowther seeks to overcome some of the antagonistic positions taken in recent debates about postmodernism He addresses such issues as the relation between art and politics artistic creativity and sublimity and the postmodern sensibility His analysis of these themes centres on the interplay between what is constant and what is historically variable in human experience *New Visualities, New Technologies* J. Macgregor Wise,2016-05-13 Back in the 1980s Jean Baudrillard wrote that public space was collapsing due to a double obscenity The most intimate operation of your life becomes the potential grazing ground of the media The entire universe also unfolds unnecessarily on your home screen He termed this the ecstasy of communication But today your everyday life is not just the potential grazing ground of the media but of anyone with a camera and the entire universe unfolds not just at home but in the palm of your hand virtually anywhere you travel Bringing together a transdisciplinary team of leading scholars and artists from North America Europe and Asia this volume documents and theorizes this new visibility It focuses on the proliferation of a range of new visual technologies examining questions of subjectivity agency and surveillance as well as mapping and theorizing new practices of visibility within this new visual assemblage *New Visualities New Technologies* addresses the pressing need for the conceptual understanding of new forms of seeing looking presenting and hiding **The Problem of Invented Religions** Steven J. Sutcliffe,Carole M Cusack,2017-08-15 Invented religions have been described as modern religions which advertise their invented status and reject traditional strategies of authorisation

But what does it mean for a religious formation to be made up and how might this status affect perceptions of its legitimacy or authenticity in wider society Based in original fieldwork and archival sources and in the secondary literature on invented and constructed formations this volume explores the allure of as well as the limits of the invention of religion Through a series of case studies the contributors discuss strategies of mobilization and legitimation for new traditions at their point of emergence as well as taking issue with simplistic interpretations of the phenomenon which neglect wider cultural and political dimensions This book was originally published as a special issue of Culture and Religion Tiny Surrealism Roger Rothman, 2012-12-01 New light on both Dal's well known and little studied works and his work as a response to modernism through a focus on Dal's identification with the small and the marginal
