Modeling, Estimation and Control of Systems with Uncertainty G.B. DiMasi, A. Gombani, A.B. Kurzhanski, 2013-03-12 This volume contains the papers that have been presented at the Conference on Modeling and Control of Uncertain Systems held in Sopron Hungary on September 3-7 1990 organised within the framework of the activities of the System and Decision Sciences Program of IIASA the International Institute for Applied Systems Analysis The importance of the subject has drawn the attention of researchers all over the world since several years In fact in most actual applications the knowledge about the system under investigation presents aspects of uncertainty due to measurement errors or poor understanding of the relevant underlying mechanisms For this reason models that take into account these intrinsic uncertainties have been used and techniques for the analysis of their behavior as well as for their estimation and control have been developed The main ways to deal with uncertainty consist in its description by stochastic processes or in terms of set valued dynamics and this volume collects relevant contributions in both directions However in order to avoid undesirable distinctions between these approaches but on the contrary to stress the unity of ideas we decided to organize the papers according to the alphabetical order of their authors We should like to take this opportunity to thank IIASA for supporting the Conference and the Hungarian National Member Organization for the kind hospitality in Sopron Finally we would like to express our gratitude to Ms Donna Huchthausen for her valuable secretarial assistance Vienna February 20 1991 GIOVANNI B. **Modeling, Estimation, and Control of Systems with Uncertainty** Giovanni B. Robustness of Dynamic Systems with Parameter Uncertainties Mohamed Mansour, Silvano Balemi, Werner

Truöl, 2012-12-06 Robust Control is one of the fastest growing and promising areas of research today In many practical systems there exist uncertainties which have to be considered in the analysis and design of control systems In the last decade methods were developed for dealing with dynamic systems with unstructured uncertainties such as H_∞ and L₁ optimal control For systems with parameter uncertainties the seminal paper of V L Kharitonov has triggered a large amount of very promising research An international workshop dealing with all aspects of robust control was successfully organized by S P Bhattacharyya and L H Keel in San Antonio Texas USA in March 1991 We organized the second international workshop in this area in Ascona Switzerland in April 1992 However this second workshop was restricted to robust control of dynamic systems with parameter uncertainties with the objective to concentrate on some aspects of robust control This book contains a collection of papers presented at the International Workshop on Robust Control held at the Centro Stefano Franscini Monte Verita Ascona Switzerland on April 12-17 1992 as well as a list of open problems presented during a discussion session at the workshop Thirtyfive leading researchers from all over the world working in the area of robust control of dynamic systems with parameter uncertainties were invited to present their recent results and to discuss with their colleagues the recent advances in this field
