Modeling Creativity and Knowledge-Based Creative Design John S. Gero, Mary Lou Maher, 2013-05-13 Over the last decade research into design processes utilizing ideas and models drawn from artificial intelligence has resulted in a better understanding of design particularly routine design as a process Indeed most of the current research activity directly or indirectly deals only with routine design Not surprisingly many practicing designers state that the level of understanding represented by these models is only of mild interest because they fail to embody any ideas about creativity This volume provides a set of chapters in the areas of modeling creativity and knowledge based creative design that examines the potential role and form of computer aided design which supports creativity It aims to define the state of the art of computational creativity in design as well as to identify research directions Published at a time when the field of computational creativity in design is still immature it should influence the directions of growth and assist the field in reaching maturity

Design Computing and Cognition'22 John S Gero,2023-01-04 This book reports research and development that represent the state of the art in artificial intelligence in design design cognition design neurocognition and design theories from the Tenth International Conference on Design Computing and Cognition held in Glasgow UK in 2022 The 48 chapters are grouped under the headings of natural language processing and design design cognition design neurocognition learning and design creative design and co design shape grammars quantum computing and human behavior These contributions are of particular interest to design researchers and design educators as well as to users of advanced computation and cognitive science This book contains knowledge about the cognitive and neurocognitive behavior of designers which is valuable to those who need to gain a better understanding of designing *Human-Computer Interaction* Steve Howard,Judy Hammond,Gitte Lindgaard,2013-06-05 The theme of the 1997 INTERACT conference Discovering New Worlds ofHCI signals major changes that are taking place with the expansion of new technologies into fresh areas of work and leisure throughout the world and new pervasive powerful systems based on multimedia and the internet HCI has a vital role to play in these new worlds to ensure that people using the new technologies are empowered rather than subjugated to the technology that they increasingly have to use In addition outcomes from HCI research studies over the past 20 years are now finding their way into many organisations and helping to improve and enhance work practices These factors have strongly influenced the

INTERACT 97 Committee when creating the conference programme with the result that besides the more traditional HCI research and education focus found in previous INTERACT conferences one strand of the 1997 conference has been devoted to industry and another to multimedia The growth in the IFIP TC13 committee itself reflects the expansion of HCI into new worlds Membership of IFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world In 1997 IFIP TC13 breaks new ground by holding its sixth INTERACT conference in the Asia Pacific region This is a significant departure from previous INTERACT conferences that were all held in Europe and is especially important for the Asia Pacific region as HCI expands beyond its traditional base

Experimental Design Research Philip Cash, Tino Stanković, Mario Štorga, 2016-05-17 This book presents a new multidisciplinary perspective on and paradigm for integrative experimental design research It addresses various perspectives on methods

analysis and overall research approach and how they can be synthesized to advance understanding of design. It explores the foundations of experimental approaches and their utility in this domain and brings together analytical approaches to promote an integrated understanding. The book also investigates where these approaches lead to and how they link design research more fully with other disciplines e.g. psychology, cognition, sociology, computer science, management. Above all, the book emphasizes the integrative nature of design research in terms of the methods, theories, and units of study from the individual to the organizational level. Although this approach offers many advantages, it has inherently led to a situation in current research practice where methods are diverging and integration between individual, team, and organizational understanding is becoming increasingly tenuous, calling for a multidisciplinary and transdisciplinary perspective. Experimental design research thus offers a powerful tool and platform for resolving these challenges. Providing an invaluable resource for the design research community, this book paves the way for the next generation of researchers in the field by bridging methods and methodology. As such, it will especially benefit postgraduate students and researchers in design research as well as engineering designers.

Advances in Representation Andrea Giordano, Michele Russo, Roberta Spallone, 2024-08-05. This book presents contributions which discuss the impact of eXtended Reality (XR) and Artificial Intelligence (AI) technologies considered jointly in the fields of Cultural Heritage and Innovative Design. The rapid development of technologies, tools, and devices requires a controlled expansion of the theoretical content and application areas as well as careful monitoring of the disciplines that can be involved, starting with the AI-XR pair. XR, an acronym for extended reality, has emerged in recent years as a concept encompassing AR, VR, virtual reality, and MR, mixed reality, offering new ways of interacting with the real. In this sense, the fields of application open to the worlds of tangible and intangible cultural heritage, architectural, environmental, infrastructural, and product design, and education as a place for advanced training and as a tool for educational enhancement.
