Deutschland, Whose Model? Patricia Annette Davis, Simon Reich, 1996 Germany's Difficult Passage to Modernity Carl Lankowski, 2001-12-01 Germany's institutional anatomy its norms and the spirits that animate it can only be properly understood if one takes into account such factors as its economic power and central position within Europe This volume traces the difficult passage of German society to modernity offering new perspectives on the German question largely characterized by the absence of key ideological underpinnings of democracy in the early modern period and a constitutional exceptionalism on the eve of the 20th century The essays describe the organizational infrastructure and behavioral norms that account for the success of Germany's postwar economy and polity but also register the tensions between the increasingly individualist outlook of post 1968 Germans and the country's highly organized and ritualistic decision making structures which often severely test the democratic foundations of the republic However Germany is not unique in its efforts to find a balance between traditional and modern forces that have shaped its history This volume demonstrates that Germany's experience past and present teaches broader lessons that speak to the central concerns of our time what are the historical precursors of and vital attitudes towards democracy How much structural variation will be feasible in political economies embedded in Europe after

the introduction of the Euro and in the context of economic and other globalization The considerable insights into these questions provided by this volume celebrate the inspiration given to colleagues and students who have worked with Andrei S Markovits to whom it is dedicated West Germany Today (RLE: German Politics) Karl Koch,2014-12-17 This authoritative study written by experts in their fields and originally published in 1989 provides a comprehensive introduction to aspects of West German society politics and economics Individual chapters investigate West German politics education industrial relations the media and the relations between the two German states **Polder Politics** F.
