Histories of Archaeology Tim Murray, Christopher Evans, 2008-09-04 In recent years there has been an upsurge of interest in the history of the discipline of archaeology Local national and international histories of archaeology that deal with institutions concepts categories and the social and political contexts of archaeological practice have begun to influence the development of archaeological theory This volume contributes to these developments by reprinting 19 significant papers Spanning much of the last 200 years and global in coverage and outlook the papers provide a thorough grounding in the historiography of archaeology and will enhance understanding of the origins and growth of its theory and practice A general introduction which is itself a contribution to historiography orients readers by outlining core themes and issues in the field

Archives, Ancestors, Practices Nathan Schlanger, Jarl Nordbladh, 2008-06-01 In line with the resurgence of interest in the history of archaeology manifested over the past decade this volume aims to highlight state of the art research across several topics and areas and to stimulate new approaches and studies in the field With their shared historiographical commitment the authors leading scholars and emerging researchers draw from a wide range of case studies to address major

themes such as historical sources and methods questions of archaeological practices and the practical aspects of knowledge production visualizing archaeology and the multiple roles of iconography and imagery and questions of identity at local national and international levels Building Blocks Jose Muñoz Alvis, 2020-05-07 Building blocks are practical materials for playing learning and working at kindergartens schools universities and companies How did building blocks which were primarily established as toys for children come to be practical materials used in professional and educational settings This study explores the historical implications of particular sets of building blocks in the interdisciplinary consolidation and transformation of techniques materials discourses and subjects By mapping the genealogy of building blocks from French gifts to their current systematization as interlocked blocks this study proposes that building blocks should be understood not exclusively as concrete objects but as the materiality of a combinatorial program which delineates a modular system characterized by a code of composition a context neutrality and a semantic component Handbook of Digital 3D Reconstruction of Historical Architecture Sander Münster, Fabrizio Ivan Apollonio, Ina Bluemel, Federico Fallavollita, Riccardo Foschi, Marc Grellert, Marinos Ioannides, Peter Heinrich Jahn, Richard Kurdiovsky, Piotr Kuroczyński, Jan-Eric Lutteroth, Heike Messemer, Georg Schelbert, 2024-04-18 This open access book is a handbook for students experts and interested parties who want to learn more about digital 3D reconstruction of historical architecture The book provides answers to the core questions of the subject What is a digital 3D model or a digital 3D reconstruction How are they created and what are they used for Practical instructions condensed knowledge explanations of technical terms and references to example projects literature and further references provide information of varying density and thus enable an individual introduction to the subject The book combines extensive knowledge on the topic of digital 3D reconstruction of historical architecture and provides practical instructions for independent implementation Up to now there has been no cross disciplinary vocabulary for technical terms in this field so this publication makes a start The book is aimed at students experts in the field and the interested public and offers various possibilities for the different target groups to delve deeply into the subject The book was created within the research network Digital 3D Reconstruction as Tools for Research in Architectural History which was funded by the German Research Foundation DFG from 2018 to 2023 The authors combined their expertise in the fields of art and architectural history architecture university teaching and media informatics **Women in the History of Science** Hannah Wills, Sadie Harrison, Erika Lynn Jones, Farrah Lawrence-Mackey, Rebecca Martin, 2023-03-06 Women in the History of Science brings together primary sources that highlight women's involvement in scientific knowledge production around the world Drawing on texts images and objects each primary source is accompanied by an explanatory text questions to prompt discussion and a bibliography to aid further research Arranged by time period covering 1200 BCE to the twenty first century and across 12 inclusive and far reaching themes this book is an invaluable companion to students and lecturers alike in exploring women's history in the fields of science technology mathematics medicine and culture While women are too often excluded from

traditional narratives of the history of science this book centres on the voices and experiences of women across a range of domains of knowledge By questioning our understanding of what science is where it happens and who produces scientific knowledge this book is an aid to liberating the curriculum within schools and universities

Materials of the Mind James Poskett, 2019-05-10 This is not only the first global history of nineteenth century science but the first global history of phrenology Phrenology was the most popular mental science of the Victorian age From American senators to Indian social reformers this new mental science found supporters around the globe Materials of the Mind tells the story of how phrenology changed the world and how the world changed phrenology This is a story of skulls from the Arctic plaster casts from Haiti books from Bengal and letters from the Pacific Drawing on far flung museum and archival collections and addressing sources in six different languages Materials of the Mind is an impressively innovative account of science in the nineteenth century as part of global history It shows how the circulation of material culture underpinned the emergence of a new materialist philosophy of the mind while also demonstrating how a global approach to history can help us reassess issues such as race technology and politics today

The Cambridge History of Science: Volume 6, The Modern Biological and Earth Sciences David C. Lindberg, Peter J. Bowler, Ronald L. Numbers, Roy Porter, 2003 This book in the highly respected Cambridge History of Science series is devoted to the history of the life and earth sciences since 1800 It provides comprehensive and authoritative surveys of historical thinking on major developments in these areas of science on the social and cultural milieus in which the knowledge was generated and on the wider impact of the major theoretical and practical innovations The articles are written by acknowledged experts who provide concise accounts of the latest historical thinking coupled with guides to the most important recent literature In addition to histories of traditional sciences the book covers the emergence of newer disciplines such as genetics biochemistry and geophysics The interaction of scientific techniques with their practical applications in areas such as medicine is a major focus of the book as is its coverage of controversial areas such as science and religion and environmentalism

Being Modern Robert Bud, Paul Greenhalgh, Frank James, Morag Shiach, 2018-10-10 In the early decades of the twentieth century engagement with science was commonly used as an emblem of modernity This phenomenon is now attracting increasing attention in different historical specialties Being Modern builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940 Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction Being Modern paints a rich picture Seventeen distinguished contributors from a range of fields including the cultural study of science and technology art and architecture English culture and literature examine the issues involved The book will be a valuable resource for students and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part and to supersede such tired formulations as Science and culture
