Modern Architecture in Europe Dennis J. De Witt, Elizabeth R. De Witt, 1987 Modern Architecture in Europe Dennis J. De Witt, Elizabeth R. De Witt, 1987 A Field Guide to Landmarks of Modern Architecture in Europe Miriam F. Stimpson, 1985 **The Monumental Era** Franco Borsi, 1987 **The Architecture of Europe** Doreen Yarwood, 1991-05

The richness and diversity of European architecture over the past two centuries captured in a comprehensive survey with almost 200 illustrations of building types in 23 countries Modern Architecture in Europe Dennis J. De Witt, 1987-10-01 Shows and describes more than five hundred notable examples of architecture in Great Britain Scandinavia and Western Europe *Shaping the Great City* Eve Blau, Monika Platzer, 1999 The explosion of architectural ideas during the last decades of the Hapsburg Empire and in the first adventurous years of the new republics of Central Europe that followed it is the subject of this stimulating and wide ranging study **Modern Architecture in Europe**, 1929 **The Architecture of Empire in Modern Europe** Miel Groten, 2025-10-01 Empires stretched around the world but also made their presence felt in architecture and urban landscapes The Architecture of Empire in Modern Europe traces the entanglement of the European built environment with overseas imperialism in the nineteenth and twentieth centuries As part of imperial networks between metropole and colonies in cities as diverse as Glasgow Hamburg or Paris numerous new buildings were erected such as factories mission houses offices and museums These sites developed into the physical manifestations of imperial networks As Europeans designed used and portrayed them these buildings became meaningful imperial places that conveyed the power relations of empire and Eurocentric self images Engaging with recent debates about colonial history and heritage this book combines a variety of sources an interdisciplinary approach and an international scope to produce a cultural history of European imperial architecture across borders **The Ambiguous Legacy of Socialist Modernist Architecture in Central and Eastern Europe** Mariusz Sokołowicz, Aleksandra Nowakowska, Błażej Ciarkowski, 2023-04-28 This book examines the unique socialist modernist architecture built in the twentieth century in Central and Eastern Europe as a source of heritage and of existing and potential value for the present and future generations Due to the historical context in which it was created such architecture remains ambiguous On the one hand the wider public associates it with the legacy of the unpleasant period of the real socialist economic regime Yet on the other hand it is also a manifestation of social modernization and the promotion of a significant proportion of the population This book focuses particularly on concrete heritage a legacy of modernist architecture in Central and Eastern Europe and it was this material that enabled their rebuilding after World War II and modernization during the following decades The authors search for the value of modernist architecture and using case studies from Poland Bulgaria Northern Macedonia Lithuania and Slovenia verify to what extent this heritage is embedded in the local socio economic milieu and becomes a basis for creating new values They argue that the challenge is to change the ways we think about heritage from looking at it from the point of view of a single monument to

thinking in terms of a place with its own character and identity that builds its relation to history and its embeddedness in the local space Furthermore they propose that the preservation of existing concrete structures and adapting them to modern needs is of great importance for sustainability With increasing awareness of the issue of preserving post war architectural heritage and the strategies of dissonant heritage management this multidisciplinary study will be of interest to architecture historians conservators heritage economists urban planners and architects
