Modern Landscape Architecture A Critical Review:

Modern Landscape Architecture Marc Treib, 1994-07-25 Twenty two essays that provide a forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline These twenty two essays provide a rich forum for assessing the tenets accomplishments and limits of modernism in landscape architecture and for formulating ideas about possible directions for the future of the discipline During the 1930s Garrett Eckbo Dan Kiley and James Rose began to integrate modernist architectural ideas into their work and to design a landscape more in accord with the life and sensibilities of their time Together with Thomas Church whose gardens provided the setting for California living they laid the foundations for a modern American landscape design This first critical assessment of modern landscape architecture brings together seminal articles from the 1930s and 1940s by Eckbo Kiley Rose Fletcher Steele and Christopher Tunnard and includes contributions by contemporary writers and designers such as Peirce Lewis Catherine Howett John Dixon Hunt Peter Walker and Martha Schwartz who examine the historical and cultural framework within which modern landscape designers have worked There are also essays by Lance Necker Reuben Rainey Gregg Bleam Michael Laurie and Marc Treib that discuss the designs and legacy of the Americans Tunnard Eckbo Church Kiley and Robert Irwin Dorothy E Imbert takes up Pierre Emile Legrain and French modernist gardens of the 1920s and Thorbjørn Andersson reviews experiments with stylized naturalism developed by Erik Glemme and others in the Stockholm park system

The American Lawn Georges Teyssot, 1999 The site of political demonstrations sporting events and barbecues and the object of loving if not obsessive care and attention the lawn is also symbolically tied to our notions of community and civic responsibility serving in the process as one of the foundations of democracy

Inventing the Charles River Karl Haglund, 2002-11-22 An illustrated account of the creation of the Charles River Basin focusing on the precarious balance between transportation planning and the stewardship of the public realm The Charles River Basin extending nine miles upstream from the harbor has been called Boston's Central Park Yet few realize that this apparently natural landscape is a totally fabricated public space Two hundred years ago the Charles was a tidal river edged by hundreds of acres of salt marshes and mudflats Inventing the Charles River describes how before the creation of the basin could begin the river first had to be imagined as a single public space The new esplanades along the river changed the way Bostonians perceived their city and the basin with its expansive views of Boston and Cambridge became an iconic image of the metropolis The book focuses on the precarious balance between transportation planning and stewardship of the public realm Long before the esplanades were realized great swaths of the river were given over to industrial enterprises and transportation millponds bridges landfills and a complex network of road and railway bridges In 1929 Boston's first major highway controversy erupted when a four lane road was proposed as part of a new esplanade At twenty year intervals three riverfront road

disputes followed successively more complex and disputatious culminating in the lawsuits over Scheme Z the Big Dig's plan for eighteen lanes of highway ramps and bridges over the river More than four hundred photographs maps and drawings illustrate past and future visions for the Charles and document the river's place in Boston's history
