Modern Matters Principles Practice In Conserving Recent Architecture:

Conservation of Modern Architecture Susan Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike

Modern Matters English Heritage, 1996 The contributions to this book consider recent developments in the protection and care of twentieth century buildings and examines the philosophical methodological and practical problems associated with conserving our recent past Part I discusses philosophy protection and management Part II investigates the progress that has been made in dealing with the practical issues of conserving modern buildings with special attention given to common materials such as concrete and metal windows A selection of international case studies provide useful examples of the problems that may be encountered

The Challenge of Change: Dealing with the Legacy of the Modern Movement Dirk van den Heuvel, Maarten Mesman, Bert Lemmens, 2008-09-15 Conservation of architecture and the conversation of Modern architecture in particular has assumed new challenges Rather than attempting to return a Modern building to its resumed original state the challenge of these proceedings is to revalue the essence of the manifold manifestations of Modern architecture and redefine its meanings in a rapidly changing world of digital revolution worldwide mobility and environmental awareness This volume aims to provide a variety of platforms for the exchange of ideas and experience A large international group of architects historians scholars preservationists and other parties involved in the processes of preserving renovating and transforming Modern buildings has been invited to investigate the paradox of the Modern monument and to reflect on the manifold dilemmas of change and continuity The general theme is elaborated through five sub themes The sub theme Change and Continuity addresses the tensions between change and continuity from a historical theoretical perspective Restructuring Cities and Landscapes focuses on the larger scale of city and landscape while Shifts in Programme and Flexibility draws attention to the scale of the building or building complex and questions limits of re use and flexibility The fourth sub theme deals with education and the fifth sub theme Progress Technology and Sustainability considers specific issues of techniques and materials

Routledge Companion to Global Heritage Conservation Vinayak Bharne, Trudi Sandmeier, 2019-02-12 The act of identifying protecting restoring and reusing buildings districts and

built landscapes of historic and cultural significance is at its best a reflective and consequential process of urban and socio economic reform It has the potential to reconcile conflicting memories meanings and cultural tensions bridging and expanding the perceived boundaries of multiple disciplines towards bigger aspirations of city making and social justice How and where do such aspirations overlap and differ across nations and societies across the world In places with different histories governance structures regulatory stringency and populist dispositions who are the specific players and what are the actual processes that bring about bigger and deeper change beyond just the conservation of an architectural or urban entity of perceived value This collection of scholarly articles by theorists academics and practitioners explores the global complexity guises and potential of heritage conservation Going from Tokyo to Cairo Shenzhen to Rome and Delhi to Moscow this volume examines a vast range of topics indigenous habitats urban cores vernacular infrastructure colonial towns squatters burial sites war zones and modern landmarks It surfaces numerous inherent issues water stress deforestation social oppression poverty religion immigration and polity expanding the definitions of heritage conservation as both a professional discipline and socio cultural catalyst This book argues that the intellectual and praxis limits of heritage conservation as the agency of reading defining and intervening with built heritage can be expansive aimed at bigger positive change beyond a specific subject or object plural enmeshed with multiple fields and specializations and empathetic born from the actual socio political realities of a place

Matter, Materiality and Modern Culture Paul Graves-Brown, 2012-11-12 Matter Materiality and Modern Culture offers a new approach to the study of contemporary objects to give the reader a new understanding of the relationship between people and their material world It asks how the very stuff of our world has shaped our societies by addressing a broad array of questions including why do Berliners have such strange door keys should the Isle of Wight pop festival be preserved could aliens tell a snail shell from a waste paper basket why did Victorian England make so much of death and burial

Engaging with Heritage and Historic Environment Policy Hana Morel, Michael Dawson, 2021-06-17 A comprehensive review of policy and practice in the historic environment this book exposes the tensions challenges and difficulties faced by the heritage sector at a time of political volatility This collection comes at a key moment for planning policy in the historic environment of England The papers reflect a wide range of views and experience in the practical environment of policy and implementation Contributors give perspectives on both policy and practice from legal counsel to local authorities from the country's largest NGO to the museums sector Some conclusions are controversial providing an important insight into the operation of national and local government The thrust of the volume is the need to close the gap between research and policy production Written when the UK government's White Paper Planning for the Future August 2020 was in preparation the chapters explore the implementation of policy its unexpected and unanticipated outcomes and the enduring legacies of guidance and established practice It highlights tensions within the sector and the need for collaboration and partnership This book is the most recent and comprehensive review of how the heritage sector has evolved

and draws special attention to the importance of the historic environment not just in planning policy but for the country as a whole The chapters in this book were originally published in The Historic Environment Policy Practice **Managing Historic Sites and Buildings** David Baker,Gill Chitty,2013-02-01 Managing Historic Sites and Buildings looks at the choices and the tensions that exist in conservation and interpretation of the heritage Preservation and presentation are central activities arguably means and ends in the conservation of the historic environment But are they self reinforcing or do they work against each other In a series of essays which span from prehistoric sacred site to Second World war military remains from medieval monastery to 1970s housing estate we look at contemporary concerns and debates about the way the past is shaped physically and metaphorically by these two aspects of heritage management Starting from the position that the fundamental purpose of the whole process is to communicate understanding about the human past these essays examine how far the ideologies strategies tactics and techniques of preservation and presentation are mutually supportive the success of integrated approaches that are inclusive of social economic and green environmental concerns is understood but the value of developing truly sustainable management for individual historic places is only just becoming evident At the heart of such an approach lies a crucial relationship between the activity of preserving historic places and of promoting understanding of their significance *Analysing Buildings from Context to Detail in Time* Hielkje Zijlstra,2009 Technology provided the author of this book with the inspiration to develop a more comprehensive research method to assess buildings *Analysing Buildings from Context to Detail in time* ABCD Research Method Technology at academic level should be considered in the analysis of a building In this book the focus is on construction engineering the study of the requirements associated with constructing buildings Providing information on practice is a key element in construction engineering which is a learning process Changes are made during the life of a building and they might be made differently if the history and technical aspects of the building were studied in greater detail Both maintenance and changes require us to understand the building concerned Architectural Conservation in Europe and the Americas John H. Stubbs,Emily G. Makaš,2011-05-04 From such well known and long vexed sites as the Athenian Acropolis to more contemporary locales like the Space Age Modernist capital city of Bras lia the conflicting and not always neatly resolvable forces that bear upon preservation are addressed as clearly and thoughtfully as the general reader could hope for New York Review of Books an astonishing feat of research compilation and synthesis Context The book delivers the first major survey concerning the conservation of cultural heritage in both Europe and the Americas Architectural Conservation in Europe and the Americas serves as a convenient resource for professionals students and anyone interested in the field Following the acclaimed Time Honored this book presents contemporary practice on a country by country and region by region basis facilitating comparative analysis of similarities and differences The book stresses solutions in architectural heritage protection and the contexts in which they were developed Urban Histories in Practice Jeffrey Kruth,Steven Rugare,2022-09-08 This volume brings together ideas about the material

and social transformation of cities by asking what is the relationship between history memory and the contemporary city The urgency of this question grows in the contexts of rapid urbanization in the Global South and urban decline in the deindustrializing areas of the Global North Within these spaces multiple disciplines shape our capacity to know the contemporary city The work presented here invites the reader to undertake critical and creative approaches regarding how these disciplines might shape this process ultimately making it more equitable and just Using various methods the contributors engage in critical readings of specific built and discursive legacies in numerous global contexts Differing forms of a social agenda permeate each piece but none is utopian or totalizing Rather the emphasis is on various forms of close reading The authors begin with the city as found and address each context in specific and precise terms The contributions here bring together histories in critical and creative ways while also catalyzing future possibilities In this way these writings frame urban history and morphology discourse not only as arenas for theoretical posturing but also as calls for action
