Psychological Aspects of Early Breast Cancer Colette Ray, Michael Baum, 2013-03-07 Physical illness cannot be effectively treated other than in the context of the psychological factors with which it is associated The body may have the disease but it is the patient who is ill Research psychologists from a number of different backgrounds have in the past few decades turned increasingly to the study of physical illness and there is now an extensive literature on preventive behaviors the role of stress in the etiology of illness the patient's reactions to illness and its treatment and the physician patient relationship At the same time practicing clinical psychologists have extended their concern beyond the treatment of specifically psychiatric disorders to include also the psychological care of people experiencing distress through illness or injury Traditionally these patients have tended to fall through the net unless their distress is so great that it assumes the proportion of a psychiatric disorder that can then be treated in its own right Because the physical disorder is the primary one its existence has detracted from the salience of the very real emotional disturbance to which it can give rise Moreover emotional reactions in this setting being the norm seems to have been regarded as not meriting special attention and care This situation is changing and it is not just psychologists or psychiatrists who are responsible for the shift in attitudes Within general medicine itself there is now a renewed emphasis on the care of the whole patient and not just the disease

Love and Loss Colin Murray Parkes, 2013-05-13 Loving and grieving are two sides of the same coin we cannot have one without risking the other Only by understanding the nature and pattern of loving can we begin to understand the problems of grieving Conversely the loss of a loved person can teach us much about the nature of love Love and Loss the result of a lifetime's work has important implications for the study of attachment and bereavement In this volume Colin Murray Parkes reports his innovative research that enables us to bring together knowledge of childhood attachments and problems of bereavement resulting in a new way of thinking about love bereavement and other losses Areas covered include patterns of attachment and grief loss of a parent child or spouse in adult life social isolation and support The book concludes by looking at disorders of attachment and considering bereavement in terms of its implications on love loss and change in a wider context Illuminating the structure and focus of thinking about love and loss this book sheds light on a wide range of psychological issues It will be essential reading for professionals working with bereavement as well as graduate students of

psychology psychiatry and sociology Clinical Counselling in Medical Settings Susan Davison, Christopher Rance, Peter Thomas, 2013-12-19 Clinical Counselling in Medical Settings offers an honest examination of the possibilities and limitations of counselling in a range of medical settings and patient groups It shows how each setting has unique features that influence the therapeutic process With numerous clinical examples covering settings such as a rehabilitation centre a pain relief clinic and a hospice this book will prove essential reading not only for counsellors and psychotherapists but also to all mental health professionals The Anatomy of Bereavement Beverley Raphael, 2003-12-16 First published in 1985 Routledge is an imprint of Taylor Francis an informa company **Sims' Symptoms in the Mind** Femi Oyeboade, 2008-04-25 SIMS SYMPTOMS IN THE MIND has since its first publication in 1988 become established as the leading introductory textbook on clinical psychopathology This new edition has been fully updated to include advances in neuropsychology and cognitive neuroscience and changes can be found in the chapters on memory disturbance disorders of time pathology of perception disorders of speech and language affect and emotional disorders and disorders of volition and execution In some cases novel classifications of the abnormalities under consideration have been provided together with additional pathological phenomena including palinopsia akinetopsia zeittraffer phenomenon exosomesthesia many of which have been rediscovered or imported from neurology The popular and distinctive features are the use of figures tables and illustrative case examples which have been further enhanced with additional case examples from the classical literature autobiographical narratives and fiction New section headings provide firmer thematic unity to the content Check boxes summarize important points such as classification of particular areas Additional examples of psychopathology are included which are drawn from a wide source including fiction autobiography and clinical textbooks Includes an extended range of abnormalities including those which have previously been neglected such as alloaesthesia palinaptia teleopsia pelopsia akinetopsia palinopsia and paraprosoptia Fully updated description of the theoretical aspects of memory and its disturbance Fully integrated neuropsychological concepts of imagery and internal mental representations in the chapter on abnormalities of perception
