Modern And Ancient Alluvial Fan Deposits:

Modern and Ancient Alluvial Fan Deposits Tor Helge Nilsen, 1985 **Selected List of References to Modern and Ancient Alluvial Fan Deposits** Geological Survey (U.S.), Selected List of References to Modern and Ancient Alluvial Fan Deposits Tor Helge Nilsen, T. E. Moore, 1980 Principles of Alluvial Fan Morphology Dan Bowman, 2018-11-09 This book offers a comprehensive overview of the alluvial fan phenomena including all terminology morphology sedimentology controlling factors processes and the human impact It combines the knowledge dispersed widely in existing literature with regional case studies color figures and photographs The chapters provide a useful basis to understand alluvial fans and a selection of papers attached to each chapter offers additional more focused reading This volume is aimed at engineers planners and especially students in earth sciences *The Geology of Fluvial Deposits* Andrew D. Miall, 2013-12-20 Fluvial deposits represent the preserved record of one of the major nonmarine environments They accumulate in large and small intermontane valleys in the broad valleys of trunk rivers in the wedges of alluvial fans flanking areas of uplift in the outwash plains fronting melting glaciers and in coastal plains The nature of alluvial assemblages their lithofacies composition vertical stratigraphic record and architecture reflect an interplay of many processes from the wandering of individual channels across a floodplain to the long term effects of uplift and subsidence Fluvial deposits are a sensitive indicator of tectonic processes and also carry subtle signatures of the climate at the time of deposition They are the hosts for many petroleum and mineral deposits This book is about all these subjects The first part of the book following a historical introduction constructs the stratigraphic framework of fluvial deposits step by step starting with lithofacies combining these into architectural elements and other facies associations and then showing how these in turn combine to represent distinctive fluvial styles Next the discussion turns to problems of correlation and the building of large scale stratigraphic frameworks These basin scale constructions form the basis for a discussion of causes and processes including autogenic processes of channel shifting and cyclicity and the larger questions of allogenic tectonic eustatic and climatic sedimentary controls and the development of our ideas about nonmarine sequence stratigraphy Geology and Geomorphology of Alluvial and Fluvial Fans D. Ventra, L.E. Clarke, 2018-07-04 Alluvial and fluvial fans are the most widespread depositional landform bordering the margins of highland regions and actively subsiding continental basins across a broad spectrum of tectonic and climatic settings They are significant to the local morphodynamics of mountain regions and also to the evolution of sediment routing systems affecting the propagation and preservation of stratigraphic signals of environmental change over vast areas The volume presents case studies discussing the geology and geomorphology of alluvial and fluvial fans from both active systems and ancient ones preserved in the stratigraphic record It brings together case studies from a range of continents climatic and tectonic settings some introducing innovative monitoring and analysis techniques and it provides an overview of current debates in the field This volume will be of particular interest to geologists geomorphologists sedimentologists and the general reader with an

interest in Earth science Arid Lands Water Evaluation and Management Robert Maliva, Thomas Missimer, 2012-06-09 A large part of the global population lives in arid lands which have low rainfall and often lack the water required for sustainable population and economic growth This book presents a comprehensive description of the hydrogeology and hydrologic processes at work in arid lands It describes the techniques that can be used to assess and manage the water resources of these areas with an emphasis on groundwater resources including recent advances in hydrologic evaluation and the differences between how aquifer systems behave in arid lands versus more humid areas Water management techniques are described and summarized to show how a more comprehensive approach to water management is required in these areas including the need to be aware of cultural sensitivities and conditions unique to many arid regions The integration of existing resources with the addition of new water sources such as desalination of brackish water and seawater along with reusing treated wastewater will be required to meet future water supply needs Also changing climatic conditions will force water management systems to be more robust so that future water supply demands can be met as droughts become more intense and rainfall events become more intense A range of water management techniques are described and discussed in order to illustrate the methods for integrating these measures within the context of arid lands conditions Bibliography of Alluvial-fan Deposits Tor Helge Nilsen, Thomas E. Moore, 1984 **Geomorphology of Desert Environments** Anthony J. Parsons, A. D. Abrahams, 2009-03-20 About one third of the Earth's land surface experiences a desert climate and this area supports approximately 15% of the planet's population This percentage continues to grow and with this growth comes the need to acquire and apply an understanding of desert geomorphology Such an understanding is vital in managing scarce and fragile resources and in mitigating natural hazards This authoritative reference book is comprehensive in its coverage of the geomorphology of desert environments and is arranged thematically It begins with an overview of global deserts proceeds through treatments of weathering hillslopes rivers piedmonts lake basins and aeolian surfaces and concludes with a discussion of the role of climatic change Written by a team of international authors all of whom are active in the field the chapters cover the spectrum of desert geomorphology U.S. Geological Survey Circular , 1984
