The Ashgate Research Companion to Modern Theory, Modern Power, World Politics Nevzat Soguk, Scott G Nelson, 2016-04-28 Deliberately eschewing disciplinary and temporal boundaries this volume makes a major contribution to the de traditionalization of political thinking within the discourses of international relations Collecting the works of twenty five theorists this Ashgate Research Companion engages some of the most pressing aspects of political thinking in world politics today The authors explore theoretical constitutions critiques and affirmations of uniquely modern forms of power past and present Among the themes and dynamics examined are textual appropriation and representation materiality and capital formation geopolitical dimensions of ecological crises connections between representations of violence and securitization subjectivity and genderization counter globalization politics constructivism biopolitics post colonial politics and theory as well as the political prospects of emerging civic and cosmopolitan orders in a time of national religious and secular polarization Radically different in their approaches the authors critically assess the discourses of IR as interpretive frames that are indebted to the historical formation of concepts and to particular negotiations of power that inform the main methodological practices usually granted primacy in the field Students as well as seasoned scholars seeking to challenge accepted theoretical frameworks will find in these chapters fresh insights into contemporary world political

AI Surveillance and its Impact on Global Power

Structure Arun Teja Polcumpally, 2025-09-26 This book explores AI's geopolitical impact particularly its influence on global power structures and the interplay between states and private companies. It explores whether Neo Realism or Neo Gramscian theory better explains the effects of AI surveillance. Two hypotheses are examined: first, China's export of AI surveillance will challenge the U.S.'s superpower status; second, private companies will surpass states in power through AI. The research supports the first hypothesis but finds limited evidence for the second. Using congruence analysis, it evaluates these theories with data from reports, indices, and policy papers. Findings show Neo Realism aligns with observations emphasizing state to remain as the primary agency in conducting international relations. In contrast, Neo Gramscian theory underlines interactions between world order and social factors and hits at the emergence of private companies as new agencies in explicitly conducting international relations. However, there is limited evidence to support structural shifts within the state that provides greater influence to AI or platform companies. The book critiques both theories, highlighting their limitations in addressing AI's general purpose nature, emergent agencies, and socio-political transformations. Policy recommendations include robust domestic AI legislation, international collaboration, and a governance body representing states, industry, and the public to ensure balanced AI geopolitics and governance.

Geocultural Power Tim Winter, 2019-09-30

Launched in 2013, China's Belt and Road Initiative is forging connections in infrastructure, trade, energy, finance, tourism, and culture across Eurasia and Africa. This extraordinarily ambitious strategy places China at the center of a geography of overland and maritime connectivity stretching across more than sixty countries and incorporating almost two-thirds of the world's population. But what does it mean to revive the Silk Roads for the twenty-first century? *Geocultural Power* explores this question by considering how China is couching its strategy for building trade, foreign relations, and energy and political security in an evocative topography of history. Until now, Belt and Road has been discussed as a geopolitical and geoeconomic project. This book introduces geocultural power to the analysis of international affairs. Tim Winter highlights how many countries, including Iran, Sri Lanka, Kenya, Malaysia, Indonesia, Pakistan, and others, are revisiting their histories to find points of diplomatic and cultural connection. Through the revived Silk Roads, China becomes the new author of Eurasian history and the architect of the bridge between East and West. In a diplomatic dance of forgetting, episodes of violence, invasion, and bloodshed are left behind for a language of history and heritage that crosses borders in ways that further the trade ambitions of an increasingly networked China-driven economy.

Rotary International and the Selling of American Capitalism

Brendan Goff, 2021-07-06 Rotary International spreads America's good news. The organization spent the interwar years convincing Main Street and the world at large that America's promise lay in cooperation and service under capitalism values that could knit the globe together. In the process, Brendan Goff argues, Rotary became an extension of US power.

Globalization and

Capitalist Geopolitics Daniel Woodley, 2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non western states to challenge and overcome domination of the rest of the world by the West This book argues that although the US continues to preside over a quasi imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order

The Futures of Racial Capitalism Gargi Bhattacharyya, 2023-10-23 Capitalism appears to be endlessly in crisis but without ever loosening its hold on our lives New modes of racism and exclusion emerge but the old ones never go away We continue to struggle to live and survive in its wake but are unable still now to build commonality with each other In this incisive book Gargi Bhattacharyya revisits debates about racial capitalism and its violence through differentiation Taking the four lenses of prisons borders debt and platforms Bhattacharyya reveals how this moment of capitalist crisis positions humans as expendable but differentially so in a process that remakes longstanding racialized hierarchies Uncovering practices and techniques embedded in the shifting processes of accumulation and state power the chapters illuminate how value is extracted from populations through non wage routes and indebtedness This engaging introduction to racial capitalism offers an interlocking and insightful analysis of capitalist renewal essential for students and scholars interested in issues of race racism and inequality
