architects of the twentieth century yet despite her lasting influence few outside the field know her name Her work has been instrumental in the development of the late twentieth century design ethic and her early years working with architectural luminaries such as Louis Kahn and Dan Kiley prepared her to bring a truly modern and audaciously abstract sensibility to the landscape design tradition In Cornelia Hahn Oberlander Making the Modern Landscape Susan Herrington draws upon archival research site analyses and numerous interviews with Oberlander and her collaborators to offer the first biography of this adventurous and influential landscape architect Born in 1921 Oberlander fled Nazi Germany at the age of eighteen with her family going on to become one of the few women to graduate from Harvard University s Graduate School of Design in the late 1940s For six decades she has practiced socially responsible and ecologically sensitive planning for public landscapes including the 1970s design of the Robson Square landscape and its adjoining Provincial Law Courts one of Vancouver s most famous spaces Herrington places Oberlander within a larger social and aesthetic context chronicling both her personal and professional trajectory and her work in New York Philadelphia Vancouver Seattle Berlin Toronto and Montreal Oberlander is a progenitor of some of the most significant currents informing landscape architecture today particularly in the area of ecological focus In her thorough biography Herrington draws much deserved attention to one of the truly important figures in landscape architecture

The Modern Garden Pierluigi Serraino,2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals

Public Garden Management: a Global Perspective BIJAN DEHGAN,2014-04-15 Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing managing and

maintaining one Although suitable as a textbook its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden a fact reflected in the extensive reference citations The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he she was in a natural but well ordered garden environment Thus began the art of garden making Many volumes have been written on every applicable subject discussed in this and similar publications Indeed the voluminous literature on history design horticulture and numerous related subjects is nothing short of overwhelming Accordingly anyone involved in management of public gardens whether as a director or area supervisor and irrespective of the type and size of such facility would have to have familiarity with various aspects of garden organization and administration However despite the enormous number and diversity of such publications there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book These volumes provide the essential background information on plants animals management maintenance fundraising and finances as well as history art design education and conservation They also cover a host of interrelated subjects and responsible organization of such activities as creating a childrens garden horticultural therapy conservatories zoological gardens and parks hence administration of multidimensional public gardens Nearly 500 full color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management The 15 chapters begin with the need for public gardens types of public gardens historical backgrounds as well as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival Visitors of zoological gardens expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the publics desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles

involved in public garden management it does not claim to be a substitute for broader familiarity Theory in Landscape Architecture Simon R. Swaffield, 2002-11-22 Basic theoretical texts for landscape architects *Contemporary Landscapes of Contemplation* Rebecca Krinke, 2005-11-14 Contemplative landscape and contemplative space are familiar terms in the areas of design landscape architecture and architecture Krinke and her highly regarded contributors set out to explore definitions theories and case studies of contemplative landscapes The contributors Marc Treib John Beardsley Michael Singer Lance Necker Heinrich Hermann and Rebecca Krinke have spent their careers researching critiquing and making landscapes Here they investigate the role of contemplative space in a post modern world and examine the impact of nature and culture on the design or interpretation of contemplative landscapes The essays drawn from both scholarship and personal experience explore the links between spaces designed to provide health benefits and contemplative space Becoming a Landscape Architect Kelleann Foster, 2010-05-20 Explore exciting options for a career in landscape architecture Blending aesthetics and environmental consciousness landscape architecture is one of the fastest growing fields according to the US Department of Labor *Becoming a Landscape Architect* gives you a comprehensive survey of the field as it is practiced today and explains how to get started and how to succeed in this exciting creative and in demand profession Featuring more than thirty five interviews with leading landscape architects and more than 250 illustrations the guide covers everything an aspiring landscape architect needs to know from education and training design specialties and work settings to preparing an effective portfolio and finding a job in residential ecological commercial and parks design Complete guide to the profession of landscape architecture one of today's fastest growing fields More than thirty five interviews with leading landscape designers and educators give you an idea of what it's really like to work as a landscape architect Over 250 striking illustrations and a lively interior make the book visually appealing as well as informative Explains different educational paths and their prerequisites and requirements Author Kelleann Foster is Associate Professor and Assistant Department Head Department of Landscape Architecture Pennsylvania State University and Managing Partner Visual Interactive Communications Group
