Modern Philosophy The Seventeenth And Eighteenth Centuries:

Modern Philosophy Richard Francks,2004-01-01 Through vivid and witty prose Richard Francks presents the ideas that have informed the development of philosophy as we know it Our current approaches to central philosophical problems the existence of God the mind body problem the idea of the self and the existence of the world originated in the texts of these six thinkers as did broader questions about political and social philosophy This book is ideal for anyone encountering the ideas of these thinkers for the first time **Beginnings of Modern Philosophy** Jack Thomson,2018 A history of Western philosophy is

a progressive story of the best answers to the most interesting and important questions we have asked in our attempts to understand the world and our experience in it from the beginning of our time on Earth Examples of such questions are What can we know and how can we come to know it What is the fundamental nature of our world and ourselves How can we best live and organise our individual and collective lives most satisfyingly and happily From early childhood to very old age we all ask philosophical questions because we feel the need to understand our human situation and condition This history is divided into 11 major Parts presented in 7 separate Books covering the main developments in science and philosophy over the past 2 500 years During this time some radically different schools of thought have emerged all integrally related to the history of the times societies and cultures from which they arose Book 2 The Beginnings of Modern Philosophy the Seventeenth and Eighteenth Centuries Nicolaus Copernicus s discovery that the Earth was not the centre of the universe but a relatively small star orbiting the sun undermined the authority of the established Church and paved the way for the scientific revolution of the seventeenth century The seventeenth century has been called The Age of Reason its philosophy being dominated by rationalism the belief that all knowledge comes from deductive reasoning and not from sense experience In contrast the eighteenth century was called The Age of Enlightenment in which empiricism reliance on observation and experimental verification held sway **Debates in Modern Philosophy** Stewart Duncan,Antonia LoLordo,2013-09-13 Debates in Modern

Philosophy Essential Readings and Contemporary Responses provides an in depth engaging introduction to important issues in modern philosophy It presents 13 key interpretive debates to students and ranges in coverage from Descartes Meditations to Kant s Critique of Pure Reason Debates include Did Descartes have a developed and consistent view about how the mind interacts with the body Was Leibniz an idealist or did he believe in corporeal substances What is Locke s theory of personal identity Could there be a Berkeleian metaphysics without God Did Hume believe in causal powers What is Kant s transcendental idealism Each of the thirteen debates consists of a well known article or book chapter from a living philosopher followed by a new response from a different scholar specially commissioned for this volume Every debate is prefaced by an introduction written for those coming upon the debates for the first time and followed by an annotated list for further reading The volume starts with an introduction that explains the importance and relevance of the modern period and its key debates to philosophy and ends with a glossary that covers terms from both the modern period and the study of the

history of philosophy in general Debates in Modern Philosophy will help students evaluate different interpretations of key texts from modern philosophy and provide a model for constructing their own positions in these debates *Women and Liberty, 1600-1800* Jacqueline Broad, Karen Detlefsen, 2017 There have been many different historical intellectual accounts of the shaping and development of concepts of liberty in pre Enlightenment Europe This volume is unique for addressing the subject of liberty principally as it is discussed in the writings of women philosophers and as it is theorized with respect to women and their lives during this period The volume covers ethical political metaphysical and religious notions of liberty with some chapters discussing women s ideas about the metaphysics of free will and others examining the topic of women s freedom or lack thereof in their moral and personal lives as well as in the public socio political domain In some cases these topics are situated in relation to the emergence of the concept of autonomy in the late eighteenth century and in others with respect to recent feminist theorizing about relational autonomy and internalized oppression Many of the chapters draw upon a wide range of genres including polemical texts poetry plays and other forms of fiction as well as standard philosophical treatises Taken as a whole this volume shows how crucial it is to recover the too long forgotten views of female and women friendly male philosophers of the seventeenth and eighteenth centuries In the process of recovering these voices our understanding of philosophy in the early modern period is not only expanded but also significantly enhanced toward a more accurate and gender inclusive history of our discipline The Rise of Modern Philosophy Tom Sorell, 1993 Modern philosophy in the West is said to have begun with Bacon and Descartes Their methodological and metaphysical writings in conjunction with the discoveries that marked the seventeenth century scientific revolution are supposed to have interred both Aristotelian and scholastic science and the philosophy that supported it But did the new or modern philosophy effect a complete break with what preceded it Were Bacon and Descartes untainted by scholastic influences The theme of this book is that the new and traditional philosophies have more in common than the orthodox account suggests In two survey articles and thirteen essays on individual philosophers the contributors show that the rise of modern philosophy was much more complicated and much more interesting than is usually thought They consider not only metaphysics and the sciences but also claims of Machiavelli Hobbes and Spinoza to have invented modern ethics and politics These two aspects of modernity in philosophy are connected for the first time The book offers a broad view of the early modern philosophers covering not only the much studied major figures but also relatively neglected writers Mersenne Gassendi White and Sergeant **A Short History Western Philosophy** Johannes Hirschberger, 2019-07-23 A study of the historical development of philosophy both requires and stimulates intellectual detachment The person who limits himself to the present can easily fall a prey to passing fashions he becomes a slave of the latest ism Intellectually rootless and inexperienced he succumbs to something that may exercise considerable attraction at this particular moment but that soon withers and passes For example Ernst Haeckel s theories once exercised an enormous fascination on all sorts of people they were even hailed as the definitive word in

philosophy Nowadays they are more likely to cause amusement than anything else The same may be said of Nietzsche's philosophy or materialism or vitalism or idealism *The Continuum Companion to Plato* Gerald A. Press, 2012-04-26 This comprehensive reference guide includes over 140 entries on every aspect of Plato's thought **The History of European Philosophy** Walter Taylor Marvin, 1917 **Catalogue** University of Oregon, 1928 **Classical Modern Philosophy** Jeffrey Tlumak, 2013-01-11 Classical Modern Philosophy introduces students to the key philosophers of the seventeenth and eighteenth centuries and explores their most important works Jeffrey Tlumak takes the reader on a chronological journey from Descartes to Kant tracing the themes that run through the period and their interrelations The main texts covered are Descartes' *Meditations on First Philosophy* Spinoza's *Ethics* Locke's *Essay Concerning Human Understanding* Leibniz's *Discourse on Metaphysics and Monadology* Berkeley's *A Treatise Concerning the Principles of Human Knowledge* and Three Dialogues between Hylas and Philonous Hume's *An Enquiry Concerning Human Understanding* and *Dialogues Concerning Natural Religion* Kant's *Critique of Pure Reason* Classical Modern Philosophy is the ideal textbook to accompany a course in the history of modern philosophy but each chapter can also be studied alone as an introduction to the featured philosopher or work Jeffrey Tlumak outlines and assesses prominent interpretations of the texts and surveys the legacy of each great thinker
