Modern Plantation In The Third World:

The Modern Plantation in the Third World Edgar Graham, Ingrid Floering, 2024-02-01 Originally published in 1984 this was the first study to define and rationalise the character and functions of the plantation in the contemporary world The author Edgar Graham was uniquely placed to do this having had long experience of Unilever's plantations in West Africa Zaire Malaysia and the Pacific Writing as a pragmatist from observed fact his starting point was the fact that the modern plantation bears very little resemblance to that of the past on which most hostile accounts are still based Two changes altered the very nature of the issue First the 20th Century plantation existed within an economic framework controlled by independent governments Secondly the rapid development in technology has revolutionised most aspects of plantation production The result it is argued is that the modern plantation offers host governments the option of using this as the most efficient way of utilising available factors of production to provide a maximum social return Exemplified by case studies this study presents a powerful argument for the continue use of the plantation system when properly applied to a variety of tropical crops

Unfolding Crisis in Assam's Tea Plantations Deepak K. Mishra, Vandana Upadhyay, Atul Sarma, 2014-03-21 As the Indian economy integrates into global circuits of production exchange and accumulation the burdens of adjustment are shared unequally by different sectors classes and regions This study unravels the livelihood strategies and living conditions of labour in the tea gardens of Assam The tea sector has been undergoing a crisis since the 1990s with stagnant production decline in exports and closures of many tea gardens leading to large scale retrenchments in the labour force Based on a detailed analysis of secondary data and primary field research the study examines the extent types and implications of inter generational occupational mobility or immobility among tea garden labourers in Assam In the process it reflects on how even a sector that had brought capital and labour from outside and contributed significantly to the country's export earnings failed to create dynamic growth linkages within the local economy The experience of the labour force in the Assam tea sector the authors argue is important for making sense not only of the development dynamics of the region but of the contradictory ways in which forces of globalisation and neo liberal reforms have been reshaping the worlds of labourers in the margins The book will be of interest to students and scholars of labour studies development studies management studies and studies of north east India as well as to policy makers and those in the tea industry

Natural Resource Endowment and the Fallacy of Development in Cameroon Fonjong, Lotsmart, 2019-10-05 Cameroon is rich in petroleum minerals tropical forests wildlife water systems fertile lands and much more Paradoxically however most citizens live in abject poverty and without jobs potable water electricity good healthcare and roads This book is a thoughtful interrogation of some of the structural factors driving persistent poverty in Cameroon in the midst of natural resource abundance It engages in a multidimensional critical analysis of the impact of natural resources on basic development indicators and concludes that good resource governance and sound management are the missing link Natural resources alone will not create socio economic prosperity void of good management with a clear development vision and strategy in Cameroon The book assembles a wide diversity of analysis views perspectives and recommendations from economists development experts social and political scientists on Cameroon's current development inertia What emerges in the end is a coherent interdisciplinary analysis of the
