Modern Political Regimes Patterns And Institutions:

Modern Political Regimes Roy C. Macridis, 1986 *Dynamic Patterns of Political Regime Changes from Authoritarian Rule in the Third World* Kyoung-Ryung Seong, 1990 Understanding Comparative Politics Mehran Kamrava, 2002-11-01

Comparative politics has undergone significant theoretical changes in recent decades. Particularly since the 1980s, a new generation of scholars have revamped and rejuvenated the study of the subject. Mehran Kamrava examines current and past approaches to the study of comparative politics and proposes a new framework for analysis. This is achieved through a comparative examination of state and social institutions, the interactions that occur between them and the political cultures within which they operate. The book also offers a concise and detailed synthesis of existing comparative frameworks that up to now at least have encountered analytical shortcomings on their own. Although analytically different in its arguments and emphasis from the current Mainstream genre of literature on comparative politics, the present study is a logical outgrowth of the scholarly works of the last decade or so. It will be essential reading for all students of comparative politics.

Classes and Elites in Democracy and Democratization Eva Etzioni Halevy, 2020-03-25. This collection of readings has been compiled on the assumption that for an adequate explanation of the success and failure, the strengths and weaknesses of democracy, it is necessary to resort to both class and elite theories and to strive for the future development of the extant beginnings of a synthesis between them. For this purpose, it presents the most central and intellectually outstanding readings that illustrate the manner in which the two theories have analyzed democracy as well as democratization in various parts of the world.

New Directions In Comparative Politics Howard J. Wiarda, 2018-03-09. As must reading for anyone interested in comparative politics, this text is designed to address the theoretical developments and approaches important to the comparative study of political systems today. These include developmentalism, dependency theory, corporatism, state-society relations, political economy, public policy analysis, indigenous theories of change, rational choice, and the new institutionalism. This text sees the new diversity of approaches as healthy and invigorating. The diversity in comparative politics over the past two decades has been reflected in prior editions of this book. Whereas these separate approaches once may have been regarded as fragmentary, now scholars have come to regard the diverse lines of inquiry as lending complementary tools of analysis to our complex modern world. The emerging methods of comparative study often provide causeways between previous islands of theory. In this new edition, all the main approaches to comparative politics are represented in chapter-length treatment. Several contributors revisit the topics they addressed in the prior editions, e.g., Tony Smith on dependency analysis, Lawrence Graham on public policy, and Joel Migdal on state-society relations. Most significantly, the third edition introduces readers to new provocative analyses such as Paul Adams on corporatism, Anthony Gill on political economy, Ronald Inglehart on political culture, Gerardo Munck on rational choice, A. H. Somjee on indigenous theory, and Frank L. Wilson on the new institutionalism. Introductory and concluding essays by editor Howard J. Wiarda integrate the book, placing the different

approaches in perspective *The Relationship between Regime "Type" and Civic Education* Hui Li, 2021-09-28 Using comparative qualitative methodology this book examines three Chinese societies Taiwan Hong Kong and Mainland China as specific cases of democratic hybrid and authoritarian regimes presenting the theoretical underpinnings of civic education in contexts other than liberal democracy It highlights on the concept of good citizens in these three regime contexts and explores how these concepts are reflected in civic education and perceived by students in the three societies The book focuses on three levels of comparison to ensure that all relevant issues can be identified Level 1 regime type Level 2 curriculum and policy formulations Level 3 students personal experiences These three levels are linked with each other and form a continuous process of civic education implementation in Taiwan Hong Kong and Mainland China *Elite*

Foundations of Liberal Democracy John Higley, Michael Burton, 2006-07-27 This compelling and convincing study represents the culmination of the authors several decades of research on the pivotal role played by elites in the success or failure of political regimes Revising the classical theory of elites and politics John Higley and Michael Burton distinguish basic types of elites and associated political regimes They canvas political change during the modern historical and contemporary periods to identify circumstances and ways in which the sine qua non of liberal democracy a consensually united elite has formed and persisted The book considers an impressive body of cases examining how consensually united elites have fostered forty five liberal democracies and how disunited or ideologically united elites have thus far prevented liberal democracy in more than one hundred other countries The authors argue that obstacles to the emergence of elites propitious for liberal democracy are more formidable than democratization enthusiasts recognize They assess prospects for the transformation of disunited and ideologically united elites where they now exist ask whether current challenges to Western liberal democracies will undermine their consensually united elites and explore what the rise of the distinctive elite clustered around George W Bush may portend for America s liberal democracy The authors powerful and important argument reframes our thinking about liberal democracy and questions optimistic assumptions about the prospects for its spread in the twenty first century

Love, 2006-02-09 Nancy Love s concise yet complete volume aims to inform students of their choices among political values By exploring the assumptions of various ideologies and comparing their positions students begin to understand political alternatives to be able to choose among them in essence they learn to think democratically Offering historical and analytic context for the selections in her companion reader *Dogmas and Dreams* Love challenges students to consider the various ways ideological frameworks shape political actions Reframing her approach in this second edition Love examines how traditional left right ideologies liberalism and conservatism socialism and fascism are shifting to adapt to new

political realities in an ever turbulent post 9 11 world She also discusses why alternative ideologies feminism environmentalism fundamentalism and globalization may better convey our global political future While pushing the boundaries of the left right political spectrum she looks at how grassroots social movements offer alternative ways to view ideological differences from cluster concepts to micro discourses and even a planetary galaxy Expanded coverage includes a new chapter on nationalism and globalization which examines the work of Samuel Huntington Kenichi Ohmae Benjamin Barber and many more to explore fundamentalism in Islamic politics increased coverage of global environmental politics including Shiva s Stolen Harvest and Kelly s Thinking Green examining the relationships between developed and developing countries fresh material on socialist politics post 1989 and the rise of neo fascist movements in the United States and Europe including analysis of Hayden and Flacks The Port Huron Statement at 40 and Bob Moser s The Age of Rage an updated feminism chapter that considers the impact of third wave post colonial and so called power feminists and incorporates new analysis of Wollstonecraft s A Vindication of the Rights of Woman and Mohanty s Under Western Eyes Revisited
