Northern Scotland Orkney And Shetland:

Northern Scotland, Orkney and Shetland Great Britain. Ordnance Survey, 2005-02-01 *The Northern Earldoms* Barbara E. Crawford, 2013-08-08 The medieval earldoms of Orkney and Caithness were positioned between two worlds the Norwegian and the Scottish They were a maritime lordship divided or united by the turbulent waters of the Pentland Firth This unlikely combination of island and mainland territory survived as a single lordship for 600 years against the odds Growing out of the Viking maelstrom of the early Middle Ages it became an established and wealthy principality which dominated northern waters with a renowned dynasty of earls Despite their peripheral location these earls were fully in touch with the kingdoms of Norway and Scotland and increasingly subject to the rulers of these kingdoms How they maintained their independence and how they survived the clash of loyalties are themes explored in this book from the early Viking age to the late medieval era when the powerful feudal Sinclair earls ruled the islands and regained possession of Caithness This is a story of the time when the Northern Isles of Scotland were part of a different national entity which explains the background to the non Gaelic culture of this locality when links across the North Sea were as important as links with the kingdom of Scotland to the south

Northern and Insular Scots Robert McColl Millar, 2007-01-26 The Scots dialects of northern Scotland Orkney and Shetland are among the most traditional varieties of English exhibiting features not current elsewhere for centuries Until recently they were spoken in communities whose traditional occupations have encouraged the equation of speech with local identity They have all also been affected by contact with Gaelic or Norse or both In recent years however the decline of traditional industries has been matched by the discovery of oil off their coasts encouraging in migration of speakers of many varieties of English and other languages How well have these varieties maintained their traditional natures at the start of the 21st century

The Cross Goes North Martin Carver, 2005 37 studies of the adoption of Christianity across northern Europe over 1000 years and the diverse reasons that drove the process In Europe the cross went north and east as the centuries unrolled from the Dingle Peninsula to Estonia and from the Alps to Lapland ranging in time from Roman Britain and Gaul in the third and fourth centuries to the conversion of peoples in the Baltic area a thousand years later These episodes of conversion form the basic narrative here History encourages the belief that the adoption of Christianity was somehow irresistible but specialists show the underside of the process by turning the spotlight from the missionaries who recorded their triumphs to the converted exploring their local situations and motives What were the reactions of the northern peoples to the Christian message Why would they wish to adopt it for the sake of its alliances In what way did they adapt the Christian ethos and infrastructure to suit their own community How did conversion affect the status of farmers of smiths of princes and of women Was society wholly changed or only in marginal matters of devotion and superstition These are the issues discussed here by thirty eight experts from across northern Europe some answers come from astute re readings of the texts alone but most are owed to a combination of history art history and archaeology working together MARTIN CARVER is Professor of Archaeology University of York
