Not Another Cube:

Beyond Contact Brian McConnell, 2001-03-20 SETI has become a popular past time with the release of the SETI home screen saver which analyzes data from the Arecibo radio telescope for signs of extraterrestrial life This book explains how likely it is that someone will be found what kind of signals are being looked for and how to communicate with them

Art/Commerce Maria A. Slowinska, 2014-09-15 This book offers a compelling perspective on the striking similarity of art and commerce in contemporary culture Combining the history and theory of art with theories of contemporary culture and marketing Maria A Slowinska chooses three angles space object experience persona to bridge present and past aesthetic appearance and theoretical discourse and traditional divisions between art and commerce Beyond both pessimistic and celebratory rhetorics Art Commerce illuminates contemporary phenomena in which the aestheticization of commerce and the commercialization of aesthetics converge

Chronophobia Pamela M. Lee, 2006-02-17 An examination of the pervasive anxiety about and fixation with time seen in 1960s art In the 1960s art fell out of time both artists and critics lost their temporal bearings in response to what E M Cioran called not being entitled to time This anxiety and uneasiness about time which Pamela Lee calls chronophobia cut across movements media and genres and was figured in works ranging from kinetic sculptures to Andy Warhol films Despite its pervasiveness the subject of time and 1960s art has gone largely unexamined in historical accounts of the period Chronophobia is the first critical attempt to define this obsession and analyze it in relation to art and technology Lee discusses the chronophobia of art relative to the emergence of the Information Age in postwar culture The accompanying rapid technological transformations including the advent of computers and automation processes produced for many an acute sense of historical unknowing the seemingly accelerated pace of life began to outstrip any attempts to make sense of the present Lee sees the attitude of 1960s art to time as a historical prelude to our current fixation on time and speed within digital culture Reflecting upon the 1960s cultural anxiety about temporality she argues helps us historicize our current relation to technology and time After an introductory framing of terms Lee discusses such topics as presentness with respect to the interest in systems theory in 1960s art kinetic sculpture and new forms of global media the temporality of the body and the spatialization of the visual image in the paintings of Bridget Riley and the performance art of Carolee Schneemann Robert Smithson's interest in seriality and futurity considered in light of his reading of George Kubler's important work *The Shape of Time* Remarks on the History of Things and Norbert Wiener's discussion of cybernetics and the endless belaboring of the present in sixties art as seen in Warhol's *Empire* and the work of On Kawara
