Frontiers of Human Centricity in the Artificial Intelligence-Driven Society 5.0 Sameh Reyad, 2024-12-07

According to Serpa in MDPI encyclopedia 3 Society 5.0 can be realized as a concept and a guide for social development with a profound impact on current societal structures in multiple levels Society 5.0 achieves advanced convergence between cyberspace and physical space enabling AI based on big data and robots to perform or support as an agent the work and adjustments that humans have done up to now Deguchi et al 4 define Society 5.0 as a highly intelligent society based on generation processing exchange of data and more specifically knowledge through the connection of the physical environment with the cyberspace Achieving Society 5.0 with these attributes would enable the world to realize economic development while solving key social problems It would additionally contribute to achieving the SDGs established by the United Nations Despite the differences in formulation of the names of these periods and societies it is obvious that each of them became a basis for step like growth in developed society at specific time periods scale character and depth of these changes are different in different countries Consequently to address the aims of the book it seeks exploratory empirical interpretive and theoretical research built on either primary or secondary data The approaches suggested are not exhaustive and can be

extended upon by the researchers. In addition, the book will contribute towards the UN's sustainable development goals. In support of UN's efforts towards a more digital economy, this book aims to debate and discuss the history, genesis, future opportunities and challenges of transitioning to Society 5.0 and provides a holistic perspective on a variety of topics, special topics which contribute towards the optimal attainment of the SDGs, particularly in terms of social dimensions. Finally, this book provides a platform for researchers, academics and professionals to the transition and technological enablers of industrial revolutions through empirical or exploratory studies that use a variety of innovative approaches. The target audience of the book includes researchers and scholars who will find in its comprehensive knowledge about Industry 4.0, Industry 5.0, Society 5.0 and its contribution to economic growth and sustainable development goals (SDGs). Furthermore, the book's secondary target audience are teachers, managers, strategists, professionals, governments and policymakers.

Bio-inspired Swarm Robotics and Control: Algorithms, Mechanisms, and Strategies Bhowmick, Parijat, Das, Sima, Arvin, Farshad, 2024-04-23

The academic community is currently facing the challenge of navigating the complexities of swarm robotics. This field demands understanding the design, control and coordination of autonomous robotic swarms. The intricacies of developing algorithms that facilitate communication, cooperation and adaptation among simple individual agents remain a formidable obstacle. Addressing issues like task allocation, formation control, path planning and decentralized decision making are pivotal to unlocking the true potential of swarm robotics.

Bio-inspired Swarm Robotics and Control: Algorithms, Mechanisms, and Strategies immerses readers in the cutting edge realm of swarm robotics, a discipline inspired by the intricate choreography observed in biological systems like insect colonies, bird flocks and fish schools. Encompassing a rich array of bio-inspired algorithms, mechanisms and strategies, the text elucidates how robots can communicate, cooperate and adapt within dynamic environments. The book propels robotics automation and artificial intelligence advancements by fostering interdisciplinary connections and charting a course toward more efficient and resilient multi-robot systems. This book is ideal for biologists, engineers and computer scientists to join forces in unlocking the full potential of swarm robotics.
