Strike Songs of the Depression Timothy P. Lynch,2009-11-12 The Depression brought unprecedented changes for American workers and organized labor As the economy plummeted employers cut wages and laid off workers while simultaneously attempting to wrest more work from those who remained employed In mills mines and factories workers organized and resisted striking for higher wages improved working conditions and the right to bargain collectively As

workers walked the picket line or sat down on the shop floor they could be heard singing This book examines the songs they sang at three different strikes the Gastonia North Carolina textile mill strike 1929 Harlan County Kentucky coal mining strike 1931 32 and Flint Michigan automobile sit down strike 1936 37 Whether in the Carolina Piedmont the Kentucky hills or the streets of Michigan the workers songs were decidedly class conscious All show the workers understanding of the necessity of solidarity and collective action In Flint the strikers sang The trouble in our homestead Was brought about this way When a dashing corporation Had the audacity to say You must all renounce your union And forswear your liberties And we ll offer you a chance To live and die in slavery As a shared experience the singing of songs not only sent the message of collective action but also provided the very means by which the message was communicated and promoted Singing was a communal experience whether on picket lines at union rallies or on shop floors By providing the psychological space for striking workers to speak their minds singing nurtured a sense of community and class consciousness When strikers retold the events of their strike as they did in songs they spread and preserved their common history and further strengthened the bonds among themselves In the strike songs the roles of gender were pronounced and vivid Wives and mothers sang out of their concerns for home family and children Men sang in the name of worker loyalty and brotherhood championing male solidarity and camaraderie Informed by the new social history this critical examination of strike songs from three different industries in three different regions gives voice to a group too often deemed as inarticulate This study the only book length examination of this subject tells history from the bottom up and furthers an understanding of worker culture during the tumultuous Depression years

Unruly Rhetorics Jonathan Alexander, Susan C. Jarratt, Nancy Welch, 2018-10-26 What forces bring ordinary people together in public to make their voices heard What means do they use to break through impediments to democratic participation Unruly Rhetorics is a collection of essays from scholars in rhetoric communication and writing studies inquiring into conditions for activism political protest and public assembly An introduction drawing on Jacques Rancière and Judith Butler explores the conditions under which civil discourse cannot adequately redress suffering or injustice The essays offer analyses of unruliness in case studies from both twenty first century and historical sites of social justice protest The collection concludes with an afterword highlighting and inviting further exploration of the ethical political and pedagogical questions unruly rhetorics raise Examining multiple modes of expression embodied print digital and sonic Unruly Rhetorics points to the possibility that unruliness more than just one of many rhetorical strategies within political activity is constitutive of the political itself

*Community of Suffering and Struggle* Elizabeth Faue, 2016-08-01 Elizabeth Faue traces the transformation of the American labor movement from community forms of solidarity to bureaucratic unionism Arguing that gender is central to understanding this shift Faue explores women s involvement in labor and political organizations and the role of gender and family ideology in shaping unionism in the twentieth century Her study of Minneapolis the site of the important 1934 trucking strike has broad implications for labor history as a whole Initially the

labor movement rooted itself in community organizations and networks in which women were active both as members and as leaders This community orientation reclaimed family relief and education as political ground for a labor movement seeking to re establish itself after the losses of the 1920s But as the depression deepened women perceived as threats to men seeking work lost their places in union leadership in working class culture and on labor s political agenda When unions exchanged a community orientation for a focus on the workplace and on national politics they lost the power to recruit and involve women members even after World War II prompted large numbers of women to enter the work force In a pathbreaking analysis Faue explores how the iconography and language of labor reflected ideas about gender The depiction of work and the worker as male the reliance on sport military and familial metaphors for solidarity and the ideas of women s place these all reinforced the representation of labor solidarity as masculine during a time of increasing female participation in the labor force Although the language of labor as male was not new in the depression the crisis of wage earning as a crisis of masculinity helped to give psychological power to male dominance in the labor culture By the end of the war women no longer occupied a central position in organized labor but a peripheral one

### **Independent Intellectuals in the United States, 1910-1945**

Steven Biel, 1995-02-01 A new intellectual community came together in the United States in the 1910s and 1920s a community outside the universities the professions and in general the established centers of intellectual life A generation of young intellectuals was increasingly challenging both the genteel tradition and the growing division of intellectual labor Adversarial and anti professional they exhibited a hostility to boundaries and specialization that compelled them toward an ambitious and self conscious generalism and made them a force in the American political literary and artistic landscape This book is a cultural history of this community of free lance critics and an exploration of their collective effort to construct a viable public intellectual life in America Steven Biel illustrates the diversity of the body of writings produced by these critics whose subjects ranged from literature and fine arts to politics economics history urban planning and national character Conceding that significant differences and conflicts did exist in the works of individual thinkers Biel nonetheless maintains that a broader picture of this vibrant culture has been obscured by attempts to classify intellectuals according to political or ideological persuasions His book brings to life the ways in which this community sought out alternative ways of making a living devised strategies for reaching and engaging the public debated the involvement of women in the intellectual community and incorporated Marxism into its evolving search for a decisive intellectual presence in American life Examined in this lively study are the role and contributions of such figures as Randolph Bourne Max Eastman Crystal Eastman Walter Lippmann Margaret Sanger Van Wyck Brooks Floyd Dell Edmund Wilson Mable Dodge Paul Rosenfeld H L Mencken Lewis Mumford Malcolm Cowley Matthew Josephson John Reed Waldo Frank Gilbert Seldes and Harold Stearns
