Policing Trevor Jones, Tim Newburn, 2006-04-18 Policing is changing rapidly and radically An increasingly complex array of public private and municipal bodies as well as public police forces are engaged in the provision of regulation and security Consequently it is difficult to think of security provision primarily in terms of what the public police do and so the terminology of fragmented or plural policing systems has become well established within criminology and police science Plural policing is now a central issue within criminology and police studies throughout the world and there is now a large and

growing body of research and theory concerned with its extent nature and governance To date however this work has been dominated by Anglo American perspectives This volume takes a detailed comparative look at the development of plural policing and provides the most up to date work of reference for scholars in this field Edited by two of the world s leading authorities on policing and including individual contributions from internationally recognised experts in criminology and police studies this is the first ever volume to focus on plural policing internationally and to draw together empirical evidence on its developments in a formal comparative framework Changing of the Guards Alex Luscombe, Kevin Walby, Derek Silva, 2022-06-15 Although service outsourcing has spread throughout Canada s prisons and jails into its police courts and national security institutions and along the border in recent decades the expanding scope and pace of corporate involvement in criminal justice functions has not been closely investigated Changing of the Guards provides a comprehensive assessment of privatization and private influence across the twenty first century Canadian criminal justice system It illuminates the many consequences of public private arrangements for law and policy transparency accountability the administration of justice equity and public debate Within the contexts of policing sentencing imprisonment border control and national security the contributors explore crucial questions about legitimacy policy diffusion racism inequality corruption and democracy itself Changing of the Guards is a long overdue account of the social political and historical uniqueness of the Canadian criminal justice field and the key issues raised by this trenchant analysis are relevant both within and beyond Canada Policing in Europe Antoinette Verhage, 2010 The Journal of Police Studies is a quarterly which is oriented towards high standard quality contributions on policing issues and phenomena that are of interest to the police Topics are approached from a specialist and if required multidisciplinary point of view The volume looks to answer questions regarding the developments of police and police cooperation in Europe at the supranational level as well as explore the reactions of police organizations in individual European countries to the process of transnationalisation in terms of the design of and philosophy within police organizations

Selling Security Alison Wakefield, 2012-12-06 In recent years there has been massively increased demand for the services of the private security industry which has now assumed a far greater role in policing areas that were once the sphere of the police for example shopping malls leisure parks and transportation terminals This book provides a detailed account of the developments in urban planning public policy and the commercial world which have promoted the development of private security and provides a unique examination of security teams in operation in three very different environments a shopping mall a retail and leisure complex and an arts centre The study is set within a broader context that considers changes in retail and leisure patterns that have promoted the development of large multi purpose developments shifts in town centre planning to create more secure high street retail and leisure facilities and the promotion of CCTV and security patrols Finally the book considers the ethical issues that arise with the massively increased use of private security and the broader policy issues which arise Crime and Deviance in Cyberspace David S. Wall, 2017-07-05 This volume

presents the reader with an interesting and at times provocative selection of contemporary thinking about cybercrimes and their regulation. The contributions cover the years 2002-2007 during which period internet service delivery speeds increased a thousand fold from 56kb to 56mb per second. When combined with advances in networked technology these faster internet speeds not only made new digital environments more easily accessible but they also helped give birth to a completely new generation of purely internet related cybercrimes ranging from spamming, phishing and other automated frauds to automated crimes against the integrity of the systems and their content. In order to understand these developments the volume introduces new cybercrime viewpoints and issues but also a critical edge supported by some of the new research that is beginning to challenge and surpass the hitherto journalistically driven news stories that were once the sole source of information about cybercrimes.

Regulating the Security Industry Mahesh Nalla, Tim Prenzler, 2020-01-24. It is widely acknowledged that the size of the security industry has increased in virtually every country around the world, often eclipsing conventional police forces in personnel numbers and expenditures. Security providers differ from law enforcement officers in many ways yet the nature of their crime reduction activities brings them into frequent contact with citizens, drawing to the forefront issues of training, professionalism and accountability. Unlike police officers whose training and licensing standards are well established, regulations for security providers are often minimalist or entirely absent. This volume brings together research on regulatory regimes and strategies from around the globe covering both the large private security sector and the expanding area of public sector non-police protective security. It examines the nature and extent of licensing and monitoring and the minimum standards imposed on the industry by governments across the world. The chapters in this book were originally published in the *International Journal of Comparative and Applied Criminal Justice*.

Corporate Investigations, Corporate Justice and Public-Private Relations Clarissa A. Meerts, 2019-08-26. This book seeks to understand the investigation and settlement of employer-employee disputes within companies. It argues that there is effectively no democratic knowledge about or control over corporate security due to companies' preference for private out-of-court settlements when faced with norm violations raised by employees. This book fills the knowledge gap by providing an overview of the corporate security sector including legal frameworks and an analysis of the role and powers of private investigative services, in-house security, forensic accountants and forensic legal investigators. It draws on close observation, case studies and interviews with practitioners in and around the industry.

Corporate Investigations, Corporate Justice and Public-Private Relations also looks at public-private relationships in this sector to propose policy remedies applicable to all corporate security providers regardless of the disparate professional backgrounds and skill sets of their staff.
