Fundamental and applied research in natural sciences have led to crucial developments in the ongoing 4th global industrial revolution in the course of which information technology has become deeply embedded in industrial management research and innovation and just as deeply in education and everyday life. Materials science and nanotechnology, plasma and solid state physics, photonics, electrical and electronic engineering, robotics and metrology, signal processing, e-learning, intelligent and soft computing have long since been central research priorities for the Inter Academia Community (IAC), a body comprising 14 universities and research institutes from Japan and Central East European countries that agreed in 2002 to coordinate their research and education programs so as to better address today's challenges. The book is intended for use in academic, government, and industrial R & D departments as a reference tool in research and technology education. The 42 peer-reviewed papers were written by more than 119 leading scientists from 14 countries, most of them affiliated to the IAC. **Recent Advances in**
