Spencer, 2017-10-24 Toleration in Comparative Perspective is a collection of essays that explores conceptions of toleration and tolerance in Asia and the West It tests the common assumption in Western political discourse and contemporary political theory that toleration is a uniquely Western virtue Toleration in modern Western philosophy is understood as principled noninterference in the practices and beliefs of others that one disapproves of or at least dislikes Although toleration might be seen today as a quintessential liberal value precedents to this modern concept also existed in medieval times while Indigenous American stories about welcome challenge the very possibility of noninterference The modern Western philosophical concept of toleration is not always easily translated into other philosophical traditions but this book opens a dialogue between various traditions of thought to explore precisely the ways in which overlap and distinctions exist What emerges is the existence of a family of resemblances in approaches to religious and cultural diversity from a program of

pragmatic noninterference in the Ottoman Empire to deeper notions of acceptance and inclusiveness amongst the Newar People in the Kathmandu Valley The development of an Islamic ethic of tolerance the Daoist idea of all inclusiveness and Confucian ideas of broad mindedness respect and coexistence to the idea of the one in the many in Hindu thought are examined along with sources for intolerance tolerance and toleration in Pali Buddhism early modern Japan and contemporary India

Truth, Language, and History Donald Davidson, 2005-02-17 Truth Language and History is the much anticipated final volume of Donald Davidson s philosophical writings In the four groups of essays that comprise it Davidson continues to explore the themes that occupied him for more than fifty years the relations between language and the world speaker intention and linguistic meaning language and mind mind and body mind and world mind and other minds He asks what is the role of the concept of truth in these explorations And can a scientific world view make room for human thought without reducing it to something material and mechanistic Davidson s underlying picture which can be seen in many of these essays is that we are acquainted directly with the world not indirectly via some intermediary such as sense data representations or language itself that thought emerges in the first place through interpersonal communication in a shared material world and continues to develop as we engage each other in dialogue and that language depends on communication not vice versa This is the triangulating situation two creatures communicating about a common world about which Davidson has written elsewhere As for the mind body relation our ontology need posit nothing more than material objects and events but as explainers we require two mutually irreducible vocabularies mind and body In the last six essays Davidson finds interconnections between his own views and those of some of the major philosophers of the past Including a new introduction by his widow Marcia Cavell this volume completes Donald Davidson s colossal intellectual legacy
