Recent Developments In Geometry Proceedings Of The Ams Special Session In Geometry November 14 15 1987:

Recent Developments in Geometry Robert Everist Greene, 1989 This volume is the outgrowth of a Special Session on Geometry held at the November 1987 meeting of the AMS at the University of California at Los Angeles The unusually well attended session attracted more than sixty participants and featured over forty addresses by some of the day's outstanding geometers By common consent it was decided that the papers to be collected in the present volume should be surveys of relatively broad areas of geometry rather than detailed presentations of new research results A comprehensive survey of the field is beyond the scope of a volume such as this Nonetheless the editors have sought to provide all geometers whatever their specialties with some insight into recent developments in a variety of topics in this active area of research

Mathematical Reviews, 2005 *Invariant Theory* Robert M. Fossum, 1989 This volume contains the proceedings of the AMS Special Session on Invariant Theory held in Denton Texas in the fall of 1986 also included are several invited papers in this area The purpose of the conference was to exchange ideas on recent developments in algebraic group actions on algebraic varieties The papers fall into three main categories actions of linear algebraic groups flag manifolds and invariant theory and representation theory and invariant theory This book is likely to find a wide audience for invariant theory is connected to a range of mathematical fields such as algebraic groups algebraic geometry commutative algebra and representation theory Finite Geometries and Combinatorial Designs Earl Sidney Kramer, 1990 The proceedings of an AMS special session on finite geometries and combinatorial designs Topics range over finite geometry combinatorial designs their automorphism groups and related structures **Notices of the American Mathematical Society** American Mathematical Society, 1992 *Applied Mechanics Reviews*, 1987 *Index of Conference Proceedings* British Library. American Book Publishing Record, 1992 *Subject Guide to Books in Print*, 1997 *Celestial Mechanics* Donald Saari, Alain Chenciner, 2002 This volume reflects the proceedings from an international conference on celestial mechanics held at Northwestern University Evanston IL in celebration of Donald Saari's sixtieth birthday Many leading experts and researchers presented their recent results Don Saari's significant contribution to the field came in the late 1960s through a series of important works His work revived the singularity theory in the n body problem which was started by Poincare and Painleve Saari's solution of the Littlewood conjecture his work on singularities collision and noncollision on central configurations his decompositions of configurational velocities etc are still much studied today and were reflected throughout the conference This volume covers various topics of current research from central configurations to stability of periodic orbits from variational methods to diffusion mechanisms from the dynamics of secular systems to global dynamics of the solar systems via frequency analysis from Hill's problem to the low energy transfer orbits and mission design in space travel and more This classic field of study is very much alive today and this volume offers a comprehensive representation of the latest
