Machine Translation: From Research to Real Users Stephen D. Richardson, 2003-06-30 AMTA

2002 From Research to Real Users Ever since the showdown between Empiricists and Rationalists a decade ago at TMI 92 MT researchers have hotly pursued promising paradigms for MT including data driven approaches e.g statistical example based and hybrids that integrate these with more traditional rule based components During the same period commercial MT systems with standard transfer architectures have evolved along a parallel and almost unrelated track increasing their coverage primarily through manual update of their lexicons we assume and achieving much broader acceptance and usage principally through the medium of the Internet Webpage translators have become commonplace a number of online translation services have appeared including in their offerings both raw and postedited MT and large corporations have been turning increasingly to MT to address the exigencies of global communication Still the output of the transfer based systems employed in this expansion represents but a small drop in the ever growing translation marketplace bucket

Challenges for Arabic Machine Translation Abdelhadi Soudi, Ali Farghaly, Günter Neumann, Rabih Zbib, 2012-08-01 This book is the first volume that focuses on the specific challenges of machine translation with Arabic either as source or target language It nicely fills a gap in the literature by covering approaches that belong to the three major paradigms of machine translation Example based statistical and knowledge based It provides broad but rigorous coverage of the methods for incorporating linguistic knowledge into empirical MT The book brings together original and extended contributions from a group of distinguished researchers from both academia and industry It is a welcome and much needed repository of important aspects in Arabic Machine Translation such as morphological analysis and syntactic reordering both central to reducing the distance between Arabic and other languages Most of the proposed techniques are also applicable to machine translation of Semitic languages other than Arabic as well as translation of other languages with a complex morphology
