Religion As Belonging A General Theory Of Religion:

Religion as Belonging John S. Cumpsty, 1991-11-01 Religious studies having struggled to establish a phenomenological approach has been reluctant to go beyond observation and various interpretive strategies to theoretical explanation Insofar as it has ventured into explanation it has been heavily dependent for its theory upon those whose primary field of study is sociology anthropology or psychology This book attempts a general theory of religion on its own terms Part One lays a foundation for such a scientific study of religion A comprehensive and essential definition from which to generate a conceptual framework is sought through an examination of the nature of religious experience of religious discourse and of types of religious tradition In Part Two the consequences of the chosen theoretical understanding are unpacked into a conceptual framework and phenomena regarded as religious are located within it *Religion as Belonging* John S. Roberts, 2002 Religion Theology and the Human Sciences explores the religious consequences of the so called end of history and triumph of capitalism as they have impinged upon key institutions of social reproduction in recent times The book explores the imposition of managerial modernity upon successive sectors of society and shows why many people today feel themselves to be oppressed by systems of management that seem to leave them no option but to conform Richard Roberts seeks to challenge and outflank such seamless oppressive modernity through reconfiguration of the religious and spiritual field *The Construction of Belief* Aziz Esmail, Abdou

Handbook of Religion and Society David Yamane, 2016-07-15 The Handbook of Religion and Society is the most comprehensive and up to date treatment of a vital force in the world today It is an indispensable resource for scholars students policy makers and other professionals seeking to understand the role of religion in society This includes both the social forces that shape religion and the social consequences of religion This handbook captures the breadth and depth of contemporary work in the field and shows readers important future directions for scholarship Among the emerging topics covered in the handbook are biological functioning organizational innovation digital religion spirituality atheism and transnationalism The relationship of religion to other significant social institutions like work and entrepreneurship science and sport is also analyzed Specific attention is paid where appropriate to international issues as well as to race class sexuality and gender differences This handbook includes 27 chapters by a distinguished diverse and international collection of experts organized into 6 major sections religion and social institutions religious organization family life course and individual change difference and

inequality political and legal processes and globalization and transnationalism *Contemporary Encounters in Gender and Religion* Lena Gemzöe, Marja-Liisa Keinänen, Avril Maddrell, 2016-11-16 The fields of gender and religious studies have often been criticized for neglecting to engage with one another and this volume responds to this dearth of interaction by placing the fields in an intimate dialogue Taking a multi disciplinary approach and drawing on feminist scholarship the book undertakes theoretical and empirical explorations of relational and co constitutive encounters of gender and religion Through varied perspectives the chapters address three interrelated themes religion as practice the relationship between religious practice and religion as prescribed by formal religious institutions and the feminization of religion in Europe **Religion Today** Ross Aden, 2012-10-18 Introduces students to key concepts in religious studies through a compelling problem solving framework This new textbook features the following dynamic case studies opening each chapter that teach critical thinking skills and engage students in contemporary religious issues such as the intersection of science and religion a wide range of examples from world religions throughout the text clear introductions to classic and contemporary theories of religion both Eastern and Western and chapter summaries that include essential concepts a list of key terms and questions for individual reflection or class discussion Religion today guides students in understanding the complex role that religion plays in the world while also building a solid foundation in both religious studies and problem solving skills Review of Religious Research , 1992 **Religion and Education** Gert Biesta, Patricia Hannam, 2020-11-30 As diversity increases across the world there is renewed interest in the place of religion in the public sphere Is religion a private matter or of concern to everyone even if they are not religious What should religious education look like in the public sphere Is religious education something for everyone in all schools What is educational about religious education What is the justification for religious education How do we make sense of religion itself bearing in mind the wide variety of views and traditions The chapters in Religion and Education The Forgotten Dimensions of Religious Education deal with these questions focusing particularly on the two constituting elements of religious education religion and education Rather than discussing curriculum pedagogy and assessment the authors delve into more fundamental questions and concerns Through this they provide a range of different responses to the question of whether religion and education may have become the forgotten dimensions of contemporary religious education Covering different educational views and traditions and exploring a range of different religious ideas traditions and practices whilst connecting this all to the challenge of religious education in the public sphere this book seeks to make a contribution to the ongoing conversation about the importance of religious education for all Theorising Religion John Walliss, 2017-10-24 Religion is controversial and challenging Whilst religious forces are powerful in numerous societies they have little or no significance for wide swaths of public or private life in other places The task of theoretical work in the sociology of religion is therefore to make sense of this apparently paradoxical situation in which religion is simultaneously significant and insignificant The chapters of Part One consider the classical roots of ideas about religion that

dominated sociological ways of thinking about it for most of the twentieth century Each chapter offers sound reasons for continuing to find theoretical inspiration and challenge in the sociological classics whilst also seeking ways of enhancing and extending their relevance to religion today Part Two contains chapters that open up fresh perspectives on aspects of modern post modern and ultra modern religion without necessarily ignoring the classical legacy The chapters of Part Three chart new directions for the sociological analysis of religion by fundamentally re thinking its theoretical basis by extending its disciplinary boundaries and by examining previously overlooked topics

On Holy Ground: The Theory and Practice of Religious Education Liam Gearon, 2013-07-18 Religion has had notable and renewed prominence in contemporary public and political life Religious questions have also been freshly examined in philosophy and theology the natural sciences the social sciences psychology phenomenology politics and the arts These fields reflect complex multi disciplinary understandings of religion some hostile some accommodating For religious education this has all contributed to its own international renaissance Religious education in ensuring it is contemporary shares with these fields the same criticality the same distance between the study of religion and the religious life Yet what are the grounds of this modern religious education Through a systematic historical and contemporary cross disciplinary analysis answering this question is the ambitious task of the book Chapters include philosophy theology and religious education the natural sciences and religious education the social sciences and religious education psychology spirituality and religious education phenomenology and religious education the politics of religious education the aesthetics of religious education The central problem of all modern religious education remains this what are the grounds of religious education when religious education is no longer grounded in the religious life in the life of the holy Although this primarily appears to be an epistemological problem it soon becomes a moral and existential one The book will be of key interest to teachers theorists and researchers working in religious education

Circling the Elephant John J.

Thatamanil,2020-06-02 Christian theologians have for some decades affirmed that they have no monopoly on encounters with God or ultimate reality and that other religions also have access to religious truth and transformation If that is the case the time has come for Christians not only to learn about but also from their religious neighbors Circling the Elephant affirms that the best way to be truly open to the mystery of the infinite is to move away from defensive postures of religious isolationism and self sufficiency and to move in vulnerability and openness toward the mystery of the neighbor Employing the ancient Indian allegory of the elephant and blind folded men John J Thatamanil argues for the integration of three often separated theological projects theologies of religious diversity the work of accounting for why there are so many different understandings of the elephant comparative theology the venture of walking over to a different side of the elephant and constructive theology the endeavor of re describing the elephant in light of the other two tasks Circling the Elephant also offers an analysis of why we have fallen short in the past Interreligious learning has been obstructed by problematic ideas about religion and religions Thatamanil argues while also pointing out the troubling resonances between reified notions of religion and race He contests these notions and offers a new theory of the religious that makes interreligious learning both possible and desirable Christians have much to learn from their religious neighbors even about such central features of Christian theology as Christ and the Trinity This book envisions religious diversity as a promise not a problem and proposes a new theology of religious diversity that opens the door to robust interreligious learning and Christian transformation through encountering the other

Naturalism and Protectionism in the Study of Religions Juraj Franek,2020-02-06 How should we study religion Must we be religious ourselves to truly understand it Do we study religion to advance our knowledge or should the study of religions help to reintroduce the sacred into our increasingly secularized world Juraj Franek argues that the study of religion has long been split into two competing paradigms reductive naturalist and non reductive protectionist While the naturalistic approach seems to run the risk of explaining religious phenomena away the protectionist approach appears to risk falling short of the methodological standards of modern science Franek uses primary source material from Greek and Latin sources to show that both competing paradigms are traceable to Presocratic philosophy and early Christian literature He presents the idea that naturalists are distant heirs not only of the French Enlightenment but also of the Ionian one Likewise he argues that protectionists owe much of their arguments and strategies not only to Luther and the Reformation but to the earliest Christian literature This book analyses the conflict between reductive and non reductive approach in the modern study of religions and positions the Cognitive Science of Religion against a background of previous theories ancient and modern to demonstrate its importance for the revindication of the naturalist paradigm
