Religion Confronting Science And There Was Light:

Religion Confronting Science Donivan Bessinger,1991 Faith Confronts Nuclear Power John R. Gugel,2015-10-22

Faith Confronts Nuclear Power is a theological critique that attempts to call people to action in the battle against nuclear power Nuclear power is a sophisticated terribly expensive and frightfully dangerous way to boil water What is it doing to the earth our God created How do we care for the earth if we allow it to continue Looking at nuclear power through the eyes of faith a Lutheran pastor John Gugel is alarmed at the apparent lack of concern on this issue and seeks to call people to action

Creation, Catastrophe & Calvary John Templeton Baldwin,2000 In this scientific age what difference does it make whether I believe the world was created in six literal days and that the world was destroyed by a global flood In answering these questions Creation Catastrophe and Calvary shows how these beliefs are related to key issues such as the forgiveness of our sins and Sabbath observance Foreword Introduction Meet the Authors An Angel s Worldview The Days of Creation in Genesis 1 A Second Creation Account Biblical Evidence for the Universality of the Genesis Flood The Grand Canyon and the Genesis Flood The Geologic Column and Calvary The Rainbow Connection Implications for an Evangelical Understanding of the Atonement Evolution A Theory in Crisis The Role of Creation in Seventh day Adventist Theology Science and Theology Focusing the Complementary Lights of Jesus Scripture and Nature *The Creation/Evolution Controversy* James L. Hayward,1998-04-30 This collection of 447 annotated references provides an overview of the literature addressing the creation evolution controversy for students teachers lawyers writers historians scientists sociologists clerics and other interested persons Fifty four annotations in the chapter on historical references highlight influential volumes published between 1543 and 1980 classic works that inform the views of later writers These historical works are listed chronologically in order of publication The remaining 393 entries feature books published from 1981 the year of the Scopes II trial in Arkansas to 1996 and include works that address historical sociological philosophical religious cosmological geological biological and anthropological issues surrounding the creation evolution controversy The annotations are written in an informative impartial style Except for references in the chapter containing historical sources and in the chapter featuring works on the history of the creation evolution controversy references are grouped under theistic and non theistic headings An introductory essay describes the history of evolutionary theory and creationism and defines the distinguishing features of each thought system An annotated list of periodicals featuring articles on creationism and evolutionism is also provided With author title and subject indexes **Religions Confronted with Science & Technology** Marc Luyckx,1992 **Horace Kallen Confronts America** Matthew J. Kaufman,2019-07-03 During his more than fifty year writing career American Jewish philosopher Horace Kallen 1882 1974 incorporated a deep focus on science into his pragmatic philosophy of life He exemplified the hope among Jews that science would pave the way to full and equal integration In this intellectual biography Kaufman explores Kallen s life and illuminates how American scientific culture inspired not only Kallen s thought but also

that of an entire generation Kaufman reveals the ways in which Kallen shaped the direction of discussions on race ethnicity modernism and secularism that influenced the American Jewish community An ardent secularist Kallen was also a serious religious thinker whose Jewish identity as unique and idiosyncratic as it was exemplifies the modern responsiveness to the moral ideal of authenticity Kaufman shows how one man's quest for authenticity contributed to a gradual shift in Jewish self perception in America and how in turn his struggle led to America's embrace of Kallen's well known term cultural pluralism

Confronting Religious Denial of Science Catherine M. Wallace, 2016-07-05 Confronting Religious Denial of Science Christian Humanism and the Moral Imagination traces the cultural backstory of contemporary conflicts between biblical literalists who oppose evolution and New Atheists who insist that religion is so pernicious it should be outlawed if not exterminated That's a clash of fundamentalisms It's a zero sum game derived from high Victorian misunderstanding of both religion and science The God whom science supposedly replaces is the Engineer Almighty sitting at his keyboard controlling every event on earth But that's not a viable concept of God Far better Wallace argues to understand Christianity in Clifford Geertz's terms as a system of symbols that both constitutes a worldview and according to David Sloan Wilson encourages prosocial behavior That reframing makes it possible to reclaim what biblical scholars have said for decades the miracles of Jesus were confrontational symbolic actions They contradicted the political status quo in colonial Palestine not the laws of biology Prayer she explains is not magical thinking It's a creative highly disciplined introspective process most familiar to many people in forms like mindfulness meditation Wallace offers an intriguing exploration of issues that believers seldom discuss in ways that make sense to the religiously unaffiliated

Coping with Evil Bruce McCausland, 2006-08 I have much more to tell you but you cannot grasp it now But when the Spirit of truth comes He will guide you into the whole truth for He will not speak on His own authority but will tell what is told Him and will announce to you the things that are to come John 16 12 13 Williams translation Coping with Evil addresses one of the most important topics for all humanity evil The menace of evil seems stronger today than ever before Can evil be defeated Do we have the courage even to look at its root causes Drawing on the spiritual investigations of Rudolf Steiner Sri Aurobindo and others and from his own inner work Bruce McCausland takes us on a fascinating journey into the hidden recesses of this very timely subject helping us understand and cope with today's events and our daily lives What is evil What is its source or sources How should we view evil and those who perpetrate it Using what he calls a holoscopic approach McCausland stresses the importance of how we look at a problem Traditional means no longer suffice and have proven inadequate to the task By its very nature evil is illusive and fraught with emotion These obstacles must be overcome if we are to succeed in examining this manifold menace in a meaningful productive manner But whatever we do we cannot ignore it The greatest evil it has been noted is indifference toward evil

McCausland discusses the sources of evil in the form of spirit beings spiritual adversaries called Lucifer and Ahriman He explains how these two beings interact with each other and with humanity as the two extremes of evil with goodness in the center In the end we discover ways to deal with evil both as individuals and as a society In today s climate of fear and its exploitation on every side the question of evil has become an urgent matter of human survival Those who watch or read the news can use this guidebook to understand the forces at work behind daily events It guides the reader through the confusion caused by evil and toward inner freedom

Jonathan Edwards Confronts the Gods Gerald R. McDermott,2000-05-11 This is a study of how American theologian Jonathan Edwards 1703 58 battled deist arguments about revelation and God s fairness to non Christians Author Gerald McDermott argues that Edwards was preparing before his death a sophisticated theological response to Enlightenment religion that was unparalleled in the eighteenth century and surprisingly generous toward non Christian traditions

When Religious Faith Collides with Science Jan M. Long,2016-08-17 A 2014 Gallup Poll indicated that 26 percent of Americans believe that humans came into existence less than 10 000 years ago with a much larger 37 percent believing the world was created in six 24 hour days Those percentages represent around 83 million and 118 million people respectively suggesting these to be ideas that resonate with a large swath of the population Given the prevalence of such thinking the question looms Is it possible that so many people could be wrong or is science simply mistaken about some of these matters This book is very much about the importance process plays in the conclusions that are reachable with Jan Long proposing that process itself can answer such questions doing so in a way that offers credibility He proposes that process entails a set of well established rules for how knowledge is acquired and these can help guide the formation of a sacred construct about beginnings In the final analysis it is a process that seeks to replace dogmatic thinking with humble and tentative expressions about that which is knowable about the many mysteries of reality that convey to sentient beings awe and wonder

Prophets Facing Backward Meera Nanda,2003 The leading voices in science studies have argued that modern science reflects dominant social interests of Western society Following this logic postmodern scholars have urged postcolonial societies to develop their own alternative sciences as a step towards mental decolonization These ideas have found a warm welcome among Hindu nationalists who came to power in India in the early 1990s In this passionate and highly original study Indian born author Meera Nanda reveals how these well meaning but ultimately misguided ideas are enabling Hindu ideologues to propagate religious myths in the guise of science and secularism At the heart of Hindu supremacist ideology Nanda argues lies a postmodernist assumption that each society has its own norms of reasonableness logic rules of evidence and conception of truth and that there is no non arbitrary culture independent way to choose among these alternatives What is being celebrated as difference by postmodernists however has more often than not been the source of mental bondage and authoritarianism in non Western cultures The Vedic sciences currently endorsed in Indian schools colleges and the mass media promotes the same elements of orthodox Hinduism that have for centuries deprived the vast

majority of Indian people of their full humanity By denouncing science and secularization the left was unwittingly contributing to what Nanda calls reactionary modernism In contrast Nanda points to the Dalit or untouchable movement as a true example of an alternative science that has embraced reason and modern science to challenge traditional notions of hierarchy The Reform Advocate ,1915 Science and Religion John F. Haught,1995 Has science made religion intellectually implausible Does it rule out the existence of a personal God In an age of science can we really believe that the universe has a purpose And finally doesn't religion hold much of the blame for the present ecological crisis These questions form the nucleus of today's debate between science and religion This book is a guide for that debate identifying the questions isolating the issues and pointing to ways the questions can be resolved There are four possible ways says John F Haught that we can view the relationship between religion and science First they can stand in complete opposition the conflict position Or we can believe they are so different that conflict is impossible the contrast position A third approach holds that while science and religion are distinct each has important implications for the other A fourth way views them as different but mutually supportive BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **English**

Mechanics and the World of Science ,1903 **Modern Societies and the Science of Religions** Lammert Leertouwer,Dr G a Wiegers,Jan G Platvoet,2002-01-01 This volume gathers essays written by seventeen specialists in the science of religions It focuses on the social cultural institutional and political contexts of the Study of Religions in resp modern France Germany the Netherlands Spain the USA Turkey Israel Morocco Saudi Arabia South Africa Indonesia Japan and China *Paperbound Books in Print* 1995 Reed Reference Publishing,Reference Reed,1995-12 *Wonder Confronts Certainty* Gary Saul Morson,2023-05-16 A noted literary scholar traverses the Russian canon exploring how realists idealists and revolutionaries debated good and evil moral responsibility and freedom Since the age of Tolstoy Dostoevsky and Chekhov Russian literature has posed questions about good and evil moral responsibility and human freedom with a clarity and intensity found nowhere else In this wide ranging meditation Gary Saul Morson delineates intellectual debates that have coursed through two centuries of Russian writing as the greatest thinkers of the empire and then the Soviet Union enchanted readers with their idealism philosophical insight and revolutionary fervor Morson describes the Russian literary tradition as an argument between a radical intelligentsia that uncompromisingly followed ideology down the paths of revolution and violence and writers who probed ever more deeply into the human condition The debate concerned what Russians called the accursed questions If there is no God are good and evil merely human constructs Should we look for life's essence in ordinary or extreme conditions Are individual minds best understood in terms of an overarching theory or as Tolstoy thought by tracing the tiny alternations of consciousness Exploring apologia for bloodshed Morson adapts Mikhail Bakhtin's concept of the non alibi the idea that one cannot escape or displace responsibility for one's actions And throughout Morson isolates a characteristic theme of Russian culture how the aspiration to relieve profound suffering can lead to either heartfelt empathy

or bloodthirsty tyranny What emerges is a contest between unyielding dogmatism and open minded dialogue between heady certainty and a humble sense of wonder at the world s elusive complexity a thought provoking journey into inescapable questions

Buddhist Asia Christoph Kleine,Karénina Kollmar-Paulenz,Hubert Seiwert,2025-04-21 This volume seeks to chart and elucidate the diverse relationships between the religious and secular spheres in regions of Asia that were significantly influenced sometimes even dominated by Buddhist discourses ideas and institutions These regions include South Asia India Sri Lanka East and Southeast Asia China Japan Korea Vietnam Inner Asia Buryatia Mongolia Tibet and the Himalayan region Bhutan These regions were connected by communicative networks long before the global modern age They constituted an intricately entangled discursive sphere shaped by the cross regional spread of concepts and ideas from Buddhism and in East Asia Confucianism The volume sheds light on the prehistory and development of culturally specific forms of secularity and related concepts in Asia It comprises a wide range of texts spanning approximately 2000 years in many cases this is the first time that they have been presented in English The texts here are not merely reproduced but are also introduced and contextualized Through these materials the volume highlights the fact that distinctions akin to those between the religious and the secular were already prevalent in premodern Asia laying the groundwork for the various forms of secularity which took shape in the modern period

Indian Philosophy of Religion R.W. Perrett,2012-12-06 With a few notable exceptions analytical philosophy of religion in the West still continues to focus almost entirely on the Iudaeo Christian tradition In particular it is all too customary to ignore the rich fund of concepts and arguments supplied by the Indian religious tradition This is a pity for it gratuitously impoverishes the scope of much contemporary philosophy of religion and precludes the attainment of any insights into Indian religions comparable to those that the clarity and rigour of analytic philosophy has made possible for the Iudaeo Christian tradition This volume seeks to redress the imbalance The original idea was to invite a number of Indian and Western philosophers to contribute essays treating of Indian religious concepts in the style of contemporary analytical philosophy of religion No further restriction was placed upon the contributors and the resulting essays all previously unpublished exhibit a diversity of themes and approaches Many arrangements of the material herein are doubtless defensible The rationale for the one that has been adopted is perhaps best presented through some introductory remarks about the essays themselves
