Constructing Reality in Comparative Theology Paul S. Chung, 2022-09-29 Through an examination of Christian interaction with other religions Paul S Chung constructs a theology of comparative religion In the course of this construction he employs the work of Ernst Troeltsch Robert Bellah and Karl Barth while offering case studies of transformative interaction between Buddhism Christianity and Islam Chung's interdisciplinary approach opens up avenues for the inter religious understanding and melding for instance exploring the development of a Protestant Islam Throughout he provides new conceptions of the religions involved and the realities they assert

Faith Facing Reality John W. de Gruchy, 2022-10-21 The COVID 19 pandemic and the war in Ukraine have starkly reminded us of the realities that threaten our future on planet Earth Christian

faith is not a way of escaping these realities but of engaging them in the struggle for justice and peace motivated by love enabled by faith and sustained by hope This is based on the conviction that in Jesus Christ the reality of God has become redemptively embodied within the reality of the world Written within the context of South Africa but with global vision and in conversation with the legacy of Dietrich Bonhoeffer this book is an attempt to stir up discussion and inform action in connecting worldly and transcendent reality Inevitably this will be controversial not least because that is something that Bonhoeffer risked This is certainly true when it comes to the five realities that provide much of the book's substance the persistence of racism the will to power scientism and soulless technology the conflict in Israel Palestine and the threat of wars and pandemics Is it possible to believe in the God of Jesus Christ in such a world If so what does that mean and how does it help us live creatively redemptively and faithfully To answer these questions the author examines the meaning of faith the human desire for transcendence and the need for conversion wisdom solidarity and responsible freedom *The Search After Reality* Sundar Singh, 1925 **Language and Reality** Wilbur Marshall Urban, 2014-06-03 First published in 2002 This is Volume XV of seventeen in the Library of Philosophy series on Metaphysics Written in 1939 this book looks at Language and Reality and the Philosophy of Language and the Principles of Symbolism and is related to the movement of Logical Positivism initiated by Wittgenstein's *Tractatus Logico-Philosophicus* **The Reality of Religion** Henry Van Dyke, 1885

Edge of Reality William Thomas, 2017-11-15 This book contains a discussion with a new perspective on the old string theory problems With respect to where all those extra dimensions are we need to make the theory work mathematically It has been said by many scientists that we may need to look at the string theory problem with a fresh perspective or find new ways of thinking to resolve its challenges Let's have a little fun with open minds and a new way of looking into reality with our imaginations turned on as we discuss possible new solutions to resolving the string theory challenges Exercising the mind is one way to look into things that are out of the reach of direct experimentation Einstein utilized the thought experiments to revolutionize modern physics by means of imagination insight and logic This discussion proceeds in a language that anyone can follow regardless of background This is an intuitive discussion with respect to known and accepted foundational science principles focused on solving the string theory challenges **Fantastic Reality** Jack Conrad, 2012-06-02 Religion as defined by Marxism is fantastic reality Fantastic not in the trite sense that the claims religion makes about existence are verifiably untrue unreal or baseless but in the sense that nature and society are reflected in exaggerated form as leaping shadows as symbols or inversions So religion should not be dismissed as mere false consciousness Religion reflects something of the real but as Jack Conrad's book shows there is even more to it than that Religious ideas are not only determined by reality they can themselves become materially effective The ideas people have in their heads especially when mediated through institutions such as churches mosques and temples no matter how wrapped up in the godly and seemingly unrelated to the corporeal world impact on their surroundings *The Church Quarterly Review*, 1926 **Schleiermacher, the Study of Religion,**

and the Future of Theology Brent W. Sockness, Wilhelm Gräb, 2010 This volume documents a significant meeting in the history of Schleiermacher studies at which leading scholars from Europe and North America gathered to probe key features of Schleiermacher's theological and philosophical program in light of its contested place in the study of religion Offering fresh interpretations of Schleiermacher's theory of religion revisionary dogmatics and hermeneutics of culture the book critically re-examines Schleiermacher's thought with an eye on the contemporary divide between theology and religious studies Publisher's website
