Religion And The Environment:

Religion and the Environment Roger S. Gottlieb, 2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity's treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded

Religion and the Environment Susan Power Bratton, 2020-12-30 How does religion relate to our global environment Religion and the Environment provides a comprehensive and accessible introduction to this controversial question by covering the following important themes the religion environment interface pre and post industrial religious practices related to resource extraction and the rise of the Anthropocene an analysis of religious response to the impacts of contemporary industrialization globalization and urbanization religious thought leadership policy formation and grassroots activism relative to the environment Religion and the Environment will offer students and general readers a sophisticated yet accessible exploration of the relationship between religion and the environment through case studies ranging from climate change to the impacts of warfare This engaging book will be an excellent addition to introductory courses and those approaching the topic for the first time [Religion and the Environment](#) R. Tanner, C.

Mitchell, 2016-06-03 This book is an analysis of the whole frontier between religion and the environment It deals in turn with their interactions and the effects of each on the other in the major world religions It considers the religious impact on human uses of time space materials transport and foods and the environmental effects of religious influence on major topics such as

population pressures morbidity mortality marital arrangements contraception the treatment of animals and environmental management

Faith in Conservation Martin Palmer, Victoria Finlay, 2003-01-01 This book arising from over twenty years experience of working with the world's major faiths draws extensively upon joint World Bank and ARC Alliance of Religion and Conservation WWF World Wildlife Fund for Nature projects world wide It shows through stories land management myths investment policies legends advocacy and celebration the role the major faiths have do and can play in making the world a better place The major faiths are the oldest institutions in the world and have survived essentially because they are constantly evolving and changing There is much to be learnt by newer institutions such as the World Bank and the multitudes of NGOs about how to remain true to what you believe but change and grow as you develop The book explores issues of climate change forestry asset management education and biodiversity protection and does so using the techniques of the great faiths storytelling example and celebration It reveals a variety of world views and it asks us to see that our personal view may be just one amongst many The challenge of living with integrity in a pluralist world underlies the book and it offers models of how diversity is crucial in attempting to ensure we have a sustainable world

Faiths in Green Lukas Szrot, 2021-05-03 Faiths in Green addresses the complex and fraught relationship between religious identity and environmental concern in the United States particularly how that relationship has changed over time Examining the effects of religious upbringing belonging and disaffiliation on environmental concern across multiple religious groups over several decades the author shows where when how and why religious groups and their memberships have responded constructively to environmental change over time The author also visits the effects of gender social class race and politics on both religion and environmental concern in the U S Faiths in Green offers an in depth and accessible guide to understanding the at times incongruous relationship between religious beliefs and motivations as well as ways to follow cultural shifts that both drive and are driven by religious persons and institutions In examining how religious and cultural factors are linked to environmental concern over time Faiths in Green demonstrates the importance of morality and worldviews in confronting global hazards of unprecedented scale

Religion and the Environment Gregory Ernest Hitzhusen, 2006 This study examines the empirical studies within the environmental sociology literature to demonstrate the relevance of western Christian and Jewish ecotheology to environmental studies

Religion and the Environment: Connections: science, ethics, eco-feminism, consumerism, sustainability and spirituality Roger S. Gottlieb, 2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity's treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or

war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded

Religion in Environmental and Climate Change Dieter Gerten, Sigurd Bergmann, 2011-11-17 Climate change and other global environmental changes deserve attention by the the humanities they are caused mainly by human attitudes and activities and feed back to human societies Focussing on religion allows for analysis of various human modes of perception action and thought in relation to global environmental change On the one hand religious organizations are aiming to become greener on the other hand some religious ideas and practices display fatalism towards impacts of climate change What might be the fate of different religions in an ever warming world This book gathers recent research on functions of religion in climate change from theological ethical philosophical anthropological historical and earth system analytical perspectives Charting the spread from regional case studies to global scale syntheses the authors demonstrate that world religions and indigenous belief systems are already responding in highly dynamic ways to ongoing and projected climate changes in theory and practice for better or for worse The book establishes the research field religion in climate change and identifies avenues for future research across disciplines

Spirit of the Environment David E Cooper, Joy A Palmer, 2004-06-02 Spirit of the Environment brings spiritual and religious concerns to environmental issues Providing a much needed alternative to exploring human beings relationship to the natural world through the restrictive lenses of science ecology or even morality this book offers a fresh perspective to the field Spirit of the Environment addresses the environmental attitudes of the major religions the relationship between art and nature the Gaia hypothesis the non instrumental values which have inspired environmental concern Contributors range from a variety of disciplines including philosophy comparative religion education and social anthropology providing students with an intriguing survey on the role that spirituality and religion play in nature This is a vital collection for those eager to examine the relationship between the spiritual and the environment

Many Heavens, One Earth Clifford Chalmers Cain, 2012-01-01 Many Heavens One Earth is

a collection of first person voices from nine of the world religions In fifteen articles devotees and scholars reveal the contributions these traditions make to informing and motivating an ecological response to the environmental issues that beset planet earth The spiritual messages of world religions have an indispensable and decisive role to play in addressing these environmental problems for at their root these ecological issues are spiritual problems Unless greed is replaced by moderation and sharing materialism by spiritual insights and values consumerism by restraint and simpler living exploitation by respect and service and pollution by caring and protection nature s hospitality will be foolishly rebuffed and therefore our descendants will inherit a polluted and depleted earth Religion can be and must be a part of this replacement Since at least 90% of the world s people claim allegiance to various major world religious traditions religion can exert a crucial and transforming influence

Religion and Dangerous Environmental Change Dieter Gerten,2010 Given the increasing threats of environmental changes to human societies it is imperative to complement technological and economical problem solutions with alternative perspectives from the humanities and the arts This pioneering book attempts to advance climate and environmental sciences by including religion as a microcosm of cultural response to environmental change The authors are renowned in disciplines as diverse as hydrology religious studies theology cultural studies philosophy and visual arts They exemplify how religion can contribute to sustainable mitigation of climate change and to creative adaption to its impacts thus preparing for a deep cultivation of research on religion in environmental change

A Greener Faith Roger S. Gottlieb,2006-06-15 In a time of darkening environmental prospects frightening religious fundamentalism and moribund liberalism the remarkable and historically unprecedented rise of religious environmentalism is a profound source of hope In *A Greener Faith* Roger S Gottlieb chronicles the promises of this critically important movement illuminating its principal ideas leading personalities and ways of connecting care for the earth with justice for human beings He also shows how religious environmentalism breaks the customary boundaries of religious issues in political life Asserting that environmental degradation is sacrilegious sinful and an offense against God catapults religions directly into questions of social policy economic and moral priorities and the overall direction of secular society Gottlieb contends that a spiritual perspective applied to the Earth provides the environmental movement with a uniquely appropriate way to voice its dream of a sustainable and just world Equally important it helps develop a world making political agenda that far exceeds interest group politics applied to forests and toxic incinerators Rather religious environmentalism offers an all inclusive vision of what human beings are and how we should treat each other and the rest of life Gottlieb deftly analyzes the growing synthesis of the movement s religious social and political aspects as well as the challenges it faces in consumerism fundamentalism and globalization Highly engaging and passionately argued this book is an indispensable resource for people of faith environmentalists scholars and anyone who is concerned about our planet s future

Religion, Space, and the Environment Sigurd Bergmann,2014-02-04 Religions often nurture important skills that help believers locate themselves in

the world Religious perceptions practices emotions and beliefs are closely interwoven with the environments from which they emerge Sigurd Bergmann s driving emphasis here is to explore religion not in relation to but as a part of the spatiality and movement within the environment from which it arises and is nurtured Religion Space and the Environment emerges from the author s experiences in different places and continents over the past decade At the book s heart lie the questions of how space place and religion amalgamate and how lived space and lived religion influence each other Bergmann explores how religion and the memory of our past impact our lives in urban spaces how the sacred geographies in Mayan and northeast Asian lands compare to modern eco spirituality and how human images and practices of moving in with and through the land are interwoven with the processes of colonization and sacralizing and the practices of power and visions of the sacred among other topics

Church, Cosmvision and the Environment Evan Berry,Robert Albro,2018-06-27 Though currently only partially understood evolving interactions among Latin American communities of faith governments and civil societies are a key feature of the popular mobilizations and policy debates about environmental issues in the region This edited collection describes and analyses multiple types of religious engagement with environmental concerns and conflicts seen in modern Latin American democracies This volume contributes to scholarship on the intersections of religion with environmental conflict in a number of ways Firstly it provides comparative analysis of the manner in which diverse religious actors are currently participating in transnational national and local advocacy in places such as Peru Argentina Brazil Bolivia Ecuador Guatemala and Mexico It also considers the diversity of an often plural religious engagement with advocacy including Catholic Evangelical and Pentecostal perspectives alongside the effects of indigenous cosmological ideas Finally this book explores the specific religious sources of seemingly unlikely new alliances and novel articulations of rights social justice and ethics for the environmental concerns of Latin America The relationship between religion and environmental issues is an increasingly important topic in the conversations around ecology and climate change This book is therefore a pertinent and topical work for any academic working in Religious Studies Environmental Studies and Latin American Studies

Ecology and Religion in History David Spring,Eileen Spring,1974

Routledge Handbook of Religion and Ecology Willis Jenkins,Mary Evelyn Tucker,John Grim,2016-07-22 The moral values and interpretive systems of religions are crucially involved in how people imagine the challenges of sustainability and how societies mobilize to enhance ecosystem resilience and human well being The Routledge Handbook of Religion and Ecology provides the most comprehensive and authoritative overview of the field It encourages both appreciative and critical angles regarding religious traditions communities attitude and practices It presents contrasting ways of thinking about religion and about ecology and about ways of connecting the two terms Written by a team of leading international experts the Handbook discusses dynamics of change within religious traditions as well as their roles in responding to global challenges such as climate change water conservation food and population It explores the interpretations of indigenous traditions regarding modern environmental problems drawing on

such concepts as lifeway and indigenous knowledge This volume uniquely intersects the field of religion and ecology with new directions within the humanities and the sciences This interdisciplinary volume is an essential reference for scholars and students across the social sciences and humanities and for all those looking to understand the significance of religion in environmental studies and policy

How the World's Religions Are Responding to Climate Change Robin Globus Veldman, Andrew Szasz, Randolph Haluza-DeLay, 2016-02-04 A growing chorus of voices has suggested that the world's religions may become critical actors as the climate crisis unfolds particularly in light of international paralysis on the issue In recent years many faiths have begun to address climate change and its consequences for human societies especially the world's poor This is the first volume to use social science to examine how religions are helping to address one of the most significant and far reaching challenges of our time While there is a growing literature in theology and ethics about climate change and religion little research has been previously published about the ways in which religious institutions groups and individuals are responding to the problem of climate change Seventeen research driven chapters are written by sociologists anthropologists geographers and other social scientists This book explores what effects religions are having what barriers they are running into or creating and what this means for the global struggle to address climate change

RELIGIONS, ENVIRONMENT AND ECOLOGY GÜLHAN KARADAĞ AĞKURT, The egocentric approach places humans at the center of nature leading to the exploitation of natural resources However humans are only a part of nature and are entrusted with the responsibility of protecting it Nature is the Creator's work and humans are its caretakers In contrast to the materialistic worldview most religions emphasize respect for nature This work explores the perspectives on nature and the universe in major world religions such as Islam Christianity Judaism as well as in the philosophical belief systems of Buddhism and Hinduism The first chapter examines the relationship between ecology and religion analyzing environmental issues The second chapter discusses the value of nature in mystical beliefs such as Buddhism and Hinduism The third chapter focuses on the monotheistic religions Islam Christianity and Judaism and the importance they place on nature

God and the Green Divide Amanda J. Baugh, 2016-10-11 American environmentalism historically has been associated with the interests of white elites Yet religious leaders in the twenty first century have helped instill concern about the earth among groups diverse in religion race ethnicity and class How did that happen and what are the implications Building on scholarship that provides theological and ethical resources to support the greening of religion *God and the Green Divide* examines religious environmentalism as it actually happens in the daily lives of urban Americans Baugh demonstrates how complex dynamics related to race ethnicity and class factor into decisions to go green By carefully examining negotiations of racial and ethnic identities as central to the history of religious environmentalism this work complicates assumptions that religious environmentalism is a direct expression of theology ethics or religious beliefs

Many Heavens, One Earth Clifford Chalmers Cain, 2012-01-01 *Many Heavens One Earth* is a collection of first person voices from nine of the world's religions In
