Religion And The Sciences Of Life:

Religion and the Sciences of Life William McDougall,1932 **Religion and the Sciences of Life** William McDougall,William Mac Dougall,1934 *Religion and the Sciences of Life* William McDougall,1934 This volume collects a few of the many essays and addresses I have scattered in various journals and magazines during the last forty years together with three that have not previously appeared in their present form In selecting these essays I have been guided partly by the desire to present matter likely to be of interest to the general reader but also I have aimed at a certain unity of topic and argument a unity indicated by the title of the volume Man I contend is more than a machine and more than a mirror that reflects the world about him He is an active being with power to direct his strivings towards ideal goals and there is ground for belief that those goals are neither wholly illusory nor wholly unattainable Critics will say that the tone of this volume is pessimistic But that will be unjust I am constitutionally optimistic and if these essays strike a somber note that is the consequence of my lifelong studies of man his powers his efforts his successes his failures his follies his crimes and his dreams of nobility Man is a feeble and fallible creature and he is in a most difficult and dangerous situation The discerning reader will see that the more popularly written essay Was Darwin Wrong is intimately related to the larger questions discussed in the opening essays of the volume For the two essays on psychical research I offer no apology They sufficiently express my attitude to that field As for the essays on eugenic topics they will inevitably antagonize a considerable proportion of those who dip into this volume I am encouraged almost to hope that at some remote date my Eugenia scheme may be realized by some enlightened multi millionaire PsycINFO Database Record c 2009 APA all rights reserved Revival: Religion and the Sciences of Life (1934) McDougall William,2018-03-29 In author s own words In selecting these essays I have been guided partly by the desire to present matter likely to be of interest to the general reader but also I have aimed at a certain unity of topic and argument a unity indicated by the title of the volume A brief summary may help the reader to grasp that unity and to follow the somewhat scattered argument Man I contend is more than a machine and more than a mirror that reflects the world about him He is an active being with power to direct his strivings towards ideal goals and there is ground for belief that those goals are neither wholly illusory nor wholly unattainable There is no novelty about this view but there is novelty in the argument by which the conclusion is reached The same view has been propounded a thousand times by that form of wishful thinking which is commonly called philosophical In this case the conclusion has been forced by the pressure of the evidence during more than forty years of cold and sceptical inquiry The process is indicated in briefest outline in the first three essays of this volume Any reader who may desire to follow the process in more detail may turn to my various published works more especially to my Body and Mind which remains pivotal for all my later thinking **Rocks of Ages** Stephen Jay Gould,2011-07-20 People of good will wish to see science and religion at peace I do not see how science and religion could be unified or even synthesized under any common scheme of explanation or analysis but I also do not

understand why the two enterprises should experience any conflict So states internationally renowned evolutionist and bestselling author Stephen Jay Gould in the simple yet profound thesis of his brilliant new book *Writing with Bracing Intelligence* and elegant clarity Gould sheds new light on a dilemma that has plagued thinking people since the Renaissance Instead of choosing between science and religion Gould asks why not opt for a golden mean that accords dignity and distinction to each realm At the heart of Gould's penetrating argument is a lucid contemporary principle he calls NOMA for nonoverlapping magisteria a blessedly simple and entirely conventional resolution that allows science and religion to coexist peacefully in a position of respectful noninterference Science defines the natural world religion our moral world in recognition of their separate spheres of influence In elaborating and exploring this thought provoking concept Gould delves into the history of science sketching affecting portraits of scientists and moral leaders wrestling with matters of faith and reason Stories of seminal figures such as Galileo Darwin and Thomas Henry Huxley make vivid his argument that individuals and cultures must cultivate both a life of the spirit and a life of rational inquiry in order to experience the fullness of being human In his bestselling books *Wonderful Life* *The Mismeasure of Man* and *Questioning the Millennium* Gould has written on the abundance of marvels in human history and the natural world In *Rocks of Ages* Gould's passionate humanism ethical discernment and erudition are fused to create a dazzling gem of contemporary cultural philosophy As the world's preeminent Darwinian theorist writes I believe with all my heart in a respectful even loving concordat between science and religion

The Cambridge Companion to Science and Religion Peter Harrison, 2010-06-24 This book explores the historical relations between science and religion and discusses contemporary issues with perspectives from cosmology evolutionary biology and bioethics

God, Religion, Science, Nature, Culture, and Morality Yemant and Friends, 2014-11-11 Plain Talk about Us and Our Dealings with the Creator of Everything Most of us have never bothered to find out why we believe what we believe That's especially true for our thoughts and convictions about religion Perhaps we were otherwise too engaged Perhaps we simply adopted what our elders and peers appeared to believe Whatever the case isn't it time for us all to examine matters of religiosity more carefully At least we a bunch of retired professors no longer absorbed by professional duties thought the time had come to ponder why we had taken so much for granted No we did not see the need to dive yet deeper into ancient scriptures to find the ultimate truth We focused instead on universal convictions Why for instance do humans around the globe believe in creator gods Why do they envision kind gods who turn nasty on occasion And why do most people believe that the gods watch and judge every single one of us discern merit and then set our fortunes Can we really converse with the gods and if need be bribe them with good deeds and sacrifices And finally why are the gods inclined to grant us life after death If so why do we have choices between various forms of self continuance and recurrent physical existence in other organisms Given that some religions proclaim resurrection with retained identity whereas others propose alternating reincarnation how can such discrepant projections be equally true But we also examine the behavioral implications of

adherence to a religion Could it be that devotion to a creed empowers in rendering hope confidence and contentment And could such reactivity squelch fear inspire happiness and ultimately elevate health and longevity In these terms how would those fare who fail to enlist the help of supernatural forces Is it conceivable that humanity would be better off with religiosity than with secularism in which each individual determines what is good or bad for him or her what for their communities and what for the world at large

A Disquisition on Religion, Science and the State Christian Jaramillo,2010-12-20 Philosopher and historian Christian Jaramillo puts forward new and revolutionary approaches to understanding God the stances that religions should adopt the development of science and the States role in the pursuit of human freedom By studying the evolution of mankind and its religious societies over the past thirteen thousand years Jaramillo demonstrates that through syncretism man has ultimately worshipped the same one God under different names The author reaffirms the existence of God the validity of universal philosophers and the significance of religions in the construction of ancient and modern societies In this book Jaramillo proposes a new theology for life rejects immortality after death and unravels some of the religious myths that have created structural flaws for humanity in constructing their societies such as the deterioration of human habitat the destruction of ethnic groups and the many confrontations between races and peoples Jaramillo denounces the powerful obsession of religions in controlling mankind through their influence over State decisions to the detriment of the spiritual freedoms and inalienable natural liberties of man which supersede the State and inhibit science We believe that the works of this brilliant thinker will kick start a revolution in theological philosophical and social approaches all of which will remain the subject of hot debate in the coming centuries
