Law and Faith in a Sceptical Age Anthony Bradney, 2009-10-16 Law and Faith in a Sceptical Age is an analysis of the legal position of religious believers in a dominantly secular society Great Britain is a society based upon broadly liberal principles It claims to recognise the needs of religious believers and to protect them from discrimination But whilst its secular ideology pervades public discourse the vestigial remains of a Christian Protestant past are seen in things as varied as the structure of public holidays and the continued existence of established churches in both England and Scotland Religious Christian values also form the starting point for legal rules relating to matters such as marriage Active religious communities constitute a very small minority of the population however those who belong to them often see their religion as being the most important element of their identity Yet the world view of these communities is frequently at odds with both the prevailing liberal secular climate of Great Britain and its Christian Anglican past This necessarily entails a clash of ideologies that puts in question the secular majority's claim to want to protect religious minorities the possibility of it being able to sufficiently understand the needs of those minorities and the desirability or practicality of any accommodation between the needs of the various religious communities and the secular mainstream of society Law and Faith in a Sceptical Age addresses these issues by raising the question of whether a liberal secular state can protect religion Accommodation to different religious traditions forms part of the history of the legal systems of Britain This book asks whether further accommodation can and should be made

Weber's Legacy in a Postmodern Age Pasquale De Marco, 2025-05-09 Weber's Legacy in a Postmodern Age explores the legacy of Max Weber in a postmodern age Weber's

work on rationalization bureaucracy and the Protestant ethic has had a profound impact on our understanding of modern society However in recent decades postmodern thinkers have challenged Weber s Enlightenment ideals of rationality progress and objectivity This book explores the relationship between Weber s work on rationalization and postmodernism s critique of rationality We argue that these two currents are two sides of the same coin and that they can help us to understand the nature of modernity and the challenges facing the modern world The book begins by examining Weber s work on rationalization We show how Weber argued that the modern world is characterized by a relentless process of rationalization in which traditional values and beliefs are replaced by a cold calculating rationality This process has led to the rise of bureaucracy the decline of traditional communities and the loss of meaning in life We then turn to postmodernism s critique of rationality We show how postmodern thinkers have challenged the Enlightenment s faith in reason and progress They have argued that the modern world is characterized by fragmentation diversity and uncertainty This critique has been influential in a wide range of disciplines from literature and art to philosophy and social theory Finally we consider the relationship between Weber s work on rationalization and postmodernism s critique of rationality We argue that these two currents are two sides of the same coin Weber s work on rationalization shows us the dark side of modernity while postmodernism s critique of rationality shows us the limits of modernity Together these two currents can help us to understand the nature of modernity and the challenges facing the modern world This book is essential reading for anyone interested in the work of Max Weber postmodernism or the nature of modernity It is a major contribution to the fields of sociology philosophy and cultural studies If you like this book write a review on google books

Identity and Integration Bernhard Peters, 2017-03-02 Symbolic boundaries cultural differences and ethnic conflicts have gained significance and new meanings in a global situation characterized by the dissolution of traditional political and societal structures Communications and political and economic interactions increasingly cross the borders of states nations and ethnic communities and yet symbolic borders and separate group identities are nevertheless asserted The perceived efforts of migrants to maintain their cultural and ethnic identities are often blamed as a cause of conflict within nation states This intriguing volume recognizes that migrants with an Islamic background are seen as especially problematic cases Turks are the biggest category among Muslim migrants in Europe and more than one third of all Muslim migrants in Europe are

from Turkey Referring primarily to immigration from Turkey this book combines both exemplary case studies of Turks within Europe and theoretical papers with innovative perspectives on the relations between integration and identity **Catholic nuns and sisters in a secular age** Carmen M. Mangion, 2020-01-09 This is the first in depth study of post war female religious life It draws on archival materials and a remarkable set of eighty interviews to place Catholic sisters and nuns at the heart of the turbulent 1960s integrating their story of social change into a larger British and international one Shedding new light on how religious bodies engaged in modernisation it addresses themes such as the Modern Girl and youth culture 1968 generational discourse post war modernity the voluntary sector and the women s movement Women religious were at the forefront of the Roman Catholic Church s movement of adaptation and renewal towards the world This volume tells their stories in their own words *Educational Philosophy for a Post-secular Age* David Lewin, 2016-10-04 Educational Philosophy for a Post secular Age reinterprets post secular insights for educational theory by recognising that the persistence of religion in contemporary life raises new questions about the place of religion in education Two common assumptions are critically examined first that the better educated a society becomes the more secular it becomes and second that religion can and should be separated from public education For too long religion has had an uneasy relationship with education being seen either as a foreign invader a problem to be solved or as a mechanism by which to reinforce particular religious cultural or national identities In order to move educational theory beyond the debates about indoctrination and competing rights between parents children and nation states the argument undercuts rationalist conceptions of religion and education that tend to frame the debates in terms of competing truth claims or worldviews Drawing on a diverse range of theological philosophical and educational sources this book demonstrates the continuing significance of the Christian mystical tradition to educational theory It proposes an exploration of democratic education that brings together two apparently irreconcilable poles the meaning of religion in education and contemporary life and the need for a deliberative democratic process that is fit for the post secular age It argues that religious literacy can be served by democratic encounters in public religious education Educational Philosophy for a Post secular Age will be of interest to researchers academics and postgraduate students in the fields of the philosophy of education philosophy of religion education policy politics anthropology and cultural theory It will particularly appeal to those of both secular and religious persuasions interested in the place of religion in education and public life THE EVOLUTION OF RELIGION Sulabh Jain, 15-06-09 History has an unsettling effect on religion Like science history is fundamentally nothing more than a range of theories based on objective evidence Mythology becomes a byword for a traditions history and history in the objective sense that we understand it today becomes distorted Thus through time both myth and history blend into an entertaining story of the world around them and their role in that world
