*The True Religion of God*, Each person is born in a circumstance which is not of his own choosing The religion of his family or the ideology of the state is thrust upon him from the very beginning of his existence in this world By the time he reaches his teens he is usually fully brain washed into believing that the beliefs of his particular society are the correct beliefs that everyone should have However when some

people mature and are exposed to other belief systems they begin to question the validity of their own beliefs The seekers of truth often reach a point of confusion upon realizing that each and every religion sect ideology and philosophy claims to be the one and only correct way for man Indeed they all encourage people to do good So which one is right     *Religions, Beliefs and Education in the European Court of Human Rights* Nigel Fancourt, 2024-02-20 This book represents an exposition of judicial pedagogies as a new concept and discusses juridical educational issues in detail through an analysis of the educational claims and assumptions of judges decisions in the European Court of Human Rights ECtHR It sheds light on how within courtrooms around the world judges are increasingly being asked to decide upon issues of religion and belief in schooling whether about admissions policies curriculum planning or pupils and teachers dress and jewellery With key human rights principles at stake these proceedings are often fraught clashing with strong opinions about education and schooling Focusing on decisions made in the European Court of Human Rights ECtHR the author considers how the supranational court looks at these issues and considers the ECtHR s role within the European Education space Drawing upon research and scholarship surrounding these questions the book surveys a series of educational issues including curriculum and assessment and takes a comparative approach in the discussion of case studies to demonstrate the variety and depth of judges thinking Thus rather than considering the national or supranational legal principles and questions as jurisprudential issues typically about religion or human rights it reviews them from an educational perspective as folk theories of teaching and learning Finally it considers the implications of a theory of judicial pedagogy for the courts educational competence in deciding on these matters for education and educational policy research the European education space legal scholarship and for legal and judicial education Developing a novel and innovative approach to the pedagogies at play in a courtroom and providing fresh insights into the courts as agents of social change it will appeal to scholars and researchers working across the disciplines of education law and religious studies
