Religious Studies Theology And The University Conflicting Maps Changing Terrain:

Religious Studies, Theology, and the University Linell E. Cady, Delwin Brown, 2002-10-10 Explores the relationship between religious studies and theology and the place of each in the modern secular university

Religious Studies, Theology, and the University Linell E. Cady, Delwin Brown, 2002-10-10 This collection explores the highly contested relationship of religious studies and theology and the place of each if any in secular institutions of higher education The founding narrative of religious studies with its sharp distinction between teaching religion and teaching about religion grows less compelling in the face of globalization and the erosion of modernism These essays take up the challenge of thinking through the identity and borders of religious studies and theology for our time Reflecting a broad range of positions the authors explore the religious secular conceptual landscape that has dominated the modern West and in the process address the revision of the academic study of religion and theology now underway

Religious Studies, Theology, and Human Flourishing Justin Thomas McDaniel, Hector Kilgoe, 2024 Religious Studies Theology and Human Flourishing contains essays by nine prominent scholars of religious studies and theology on approaches to cultivating human flourishing within the field of positive psychology Part of The Humanities and Human Flourishing series this volume represents perspectives from north India to the buckle of the American Bible Belt and explores the implications of religious studies and theology for well being illuminating connections between theory pedagogy and practice

Christian Theology and the Secular University Paul A. Macdonald, Jr., 2017-02-24 If the secular university by definition is non sectarian or non denominational then how can it accommodate a discipline like Christian theology Doesn't the traditional goal of theological study which is to attain knowledge of the divine fundamentally conflict with the main goal of secular academic study which is to attain knowledge about ourselves and the world in which we live So why should theology be admitted or even care about being admitted into secular academic life And even if theology were admitted what contribution to secular academic life could it make Working from a Christian philosophical and theological perspective but also engaging a wide range of theologians philosophers and religious studies scholars *Christian Theology and the Secular University* takes on these questions arguing that Christian theology does belong in the secular university because it provides distinct resources that the secular university needs if it is going to fulfill what should be its main epistemic and educative ends This book offers a fresh and unique perspective to scholars working in the disciplines of theology philosophy and religious studies and to those in other academic disciplines who are interested in thinking critically and creatively about the place and nature of theological study within the secular university

Reinventing Religious Studies Scott S. Elliott, 2014-10-20 Reinventing Religious Studies offers readers an opportunity to trace the important trends and developments in Religious Studies over the last forty years Over this time the study of religion has been transformed into a critical discipline informed by a wide range of perspectives from sociology to anthropology politics to material culture and economics to cultural theory Reinventing Religious Studies brings together key

writings which have helped shape scholarship teaching and learning in the field All the essays are drawn from the CSSR Bulletin a provocative occasionally irreverent and always critical journal which has long been at the centre of debates in Religious Studies This collection will prove invaluable for students and scholars of theory and method in Religious Studies It offers readers a unique opportunity to understand the history of key issues in the study of religion and what remains central to the study of religion today

Theology and the End of Doctrine Christine Helmer, 2014-08-22 This book is about the crisis brought about by doctrine's estrangement from reality that is from actual lives experiences histories and from God By invoking the end of doctrine Christine Helmer opens a new discussion of doctrinal production that is engaged with the challenges and possibilities of modernity The end of doctrine refers on the one hand to unquestioning doctrinal reception which Helmer critiques and on the other represents an invitation to a new way of understanding the aim of doctrine in deeper connection to the reality that it seeks The book's first section offers an analysis of the current situation in theology by reconstructing a trajectory of Protestant theology from the turn of the twentieth century to today This history focuses primarily on the status of the word in theology and explains how changes in theology in the context of the political and social crisis in Europe in the 1920s and 1930s led to a distancing of the word from reality Helmer then turns to the constructive section of the book to propose a repositioning of theology to the world and to God Helmer's powerful work will inspire revitalized interest in both doctrine and theological inquiry itself

Comparative Secularisms in a Global Age L. Cady, E. Hurd, 2010-05-10 The history and politics of secularism and the public role of religion in France India Turkey and the United States It interprets the varieties of secularism as a series of evolving and contested processes of defining and remaking religion rather than a static solution to the challenges posed by religious and political difference

What is Religion? Nigel Ajay Kumar, 2014-01-15 What Is Religion is one of those questions rarely asked by Christian theologians who engage in interreligious discourse Nigel Ajay Kumar makes the case however that to answer this question is critical for Christian scholars who want to negotiate multiple religious identities as well as for those who want a clearer understanding of their own faith as religion Kumar takes a historical and theological approach to answering this question The history of the concept of religion is traced from biblical times to the Indian independence era Then a theological answer is offered not only by looking at the classical Indian theologian Pandipeddi Chenchiah but also by listening to other contemporary secular and theological voices This is the South Asian Edition of the original Wipf Stock edition 2013 with the same name

Explorations in Post-Secular Metaphysics Josef Bengtson, 2015-11-02 This book explores the metaphysical assumptions that underlie different interpretations of the relationship between religion and the secular faith and reason and transcendence and immanence It explores different answers to the question of how people of diverse religious and cultural identities can live together peacefully

Religion and Politics Johann P. Arnason, 2014-04-23 Combining theoretical and empirical research these 12 essays examine the role of religion and its prospects in Europe On the one hand the volume

discusses growing Islamic presence in Europe as a reminder of enduring religious pluralism not least in view of the high prominence given to Islamic experience in arguments against over generalised notions of secularisation On the other hand it explores the question of Christian motivated extremism and religious nationalism Against this background the contributors discuss the role of religion in other countries throughout the world including China Japan Russia and the MENA region

Religion within the Limits of History Alone Demian Wheeler,2020-09-01 Among the greatest challenges facing religious thinkers today is that created by historicism the notion that human beings and their myriad understandings of reality are utterly historical conditioned by contingent circumstances and tied to particular contexts In this book Demian Wheeler confronts the historicist challenge by delineating and defending a particular trajectory of historicist thought known as pragmatic historicism Rooted in the German Enlightenment and fully developed within the early Chicago school of theology pragmatic historicism is a predominantly American tradition that was philosophically nurtured by classical pragmatism and its intellectual siblings naturalism and radical empiricism Religion within the Limits of History Alone not only undertakes a detailed genealogy of this pragmatic historicist lineage but also sets forth a constructive program for contemporary theology by charting a path for its future development Wheeler shows that pragmatic historicism is an underdeveloped resource for contemporary theology since it offers a model for normative religious thought that is theologically compelling yet wholly nonsupernaturalistic deeply pluralistic unflinchingly liberal and radically historicist

Analytic Theology and the Academic Study of Religion William Wood,2021-01-28 Analytic theology can flourish in the secular academy and flourish as authentically Christian theology Analytic Theology and the Academic Study of Religion explains analytic theology to other theologians and scholars of religion while simultaneously explaining those other fields to analytic theologians William Wood defends analytic theology from some common criticisms but also argues that analytic theologians have much to learn from other forms of inquiry Analytic theology is a legitimate form of theology and a legitimate form of academic inquiry and it can be a valuable conversation partner within the wider religious studies academy Analytic Theology and the Academic Study of Religion articulates an attractive vision of analytic theology fosters a more fruitful interdisciplinary conversation and enables scholars across the religious studies academy to understand one another better

Locklin,2017-08 Teaching Civic Engagement offers a new conceptual model an examination of theoretical questions and concerns and a variety of concrete teaching strategies to assist faculty in engaging questions of civic belonging and social activism in religion classrooms The book explores the civic relevance of the academic study of religion
